This book explores the wave of decentralization that has swept through Latin America and the projected institutional changes within the governments in the region. Although it notes the ways in which decentralization implies a critique of past governing patterns, the emphasis is on such potential consequences of governmental change as the strengthening of democratic participation in government and the improvement of local public service. The book draws upon institutional experiments carried out at the state level to examine which decentralization strategies work best in Latin America. It is organized around three major requirements for the success of decentralization: * Establishing the national fiscal framework * Moving government closer to the people * Improving municipal

service delivery. Tables illustrate the shift of revenues and expenditures from central authorities to intermediate levels of government.

GRABBING A GOLDEN DREAM WITH GOLDEN GLOVES Does boxing teach anything besides how to club someone into submission? Can it transcend its sordid reputation and instill love, compassion and honor in Americas most troubled kids? In this raw yet uplifting memoir about amateur boxing, author Peter Wood tells of his begrudging return to a world he thought hed left behind. He steps back into the mud of boxing, coaching two troubled teens who dreamas he once didof becoming Golden Gloves champions.His compelling story moves far beyond the grunt and sweat of the local gym. It explores the classrooms of a suburban high school and digs through the remains of unhappy childhoods. Its a story about how boxing is a way out, and how it cleanses the soul.This book brings the subculture of amateur boxing up close and weaves a powerful story of redemption, beating demons and battling for glory.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored. The first part starts from the "old" growth theory and bridges to the "new" growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

Michael E. Gerber, author of the #1 most successful business book ever, The E-

Myth, calls *Take the Fear Out of Franchising* a "great book" that is "a must for any prospective franchisee or franchisor." Written by one of the world's foremost authorities on franchising, Dr. John P. Hayes, *Take the Fear Out of Franchising* gets right to the nub of what's really important about buying, owning and operating a franchise. Many people who consider buying a franchise never do because they get stuck in the process. That's fear! Sadly, people often get stuck over points of little or no consequence, says Dr. Hayes, and that's because they fall into the trap of investigating franchising as an industry. He says that process forces people to concentrate on the wrong points of information and it is mostly a waste of time. It creates more fear and ultimately immobilizes people. Dr. Hayes introduces readers to five franchise tenets that explain why franchising works. He points out that while franchising is a fabulous methodology that has created countless millionaires, it's not foolproof, and it will not work for everyone. He then shows readers how to know if franchising will work for them, and he teaches readers how to investigate franchise opportunities by looking at the only data that really matters! Franchise executive Joe Caruso says *Take the Fear Out of Franchising* is a "serious guide" to selecting a franchise. Tony Foley, vice president of Global Sales for United Franchise Group, says the book is a "step-by-step realistic guide on how to make one of the most important decisions of your life." And Joe Mancuso, founder of CEO Clubs International, says, "Rather than fear franchising, just read the book." Dr. Hayes is the Titus Chair for Franchise Leadership at Palm Beach Atlantic University in West Palm Beach, Florida. He directs the Titus Center for Franchise Studies and teaches the franchise curriculum in the Rinker School of Business.

Professional technicians have relied on the Chilton Labor Guide estimated repair times for decades. This latest edition expands on that reliability by including technical hotline feedback and research from professional labor experts. The labor times reflect actual vehicle conditions found in the aftermarket, including rust, wear and grime. Available in both hardcover and CD-ROM, this completely revised manual provides thousands of labor times for 1981 through current year domestic and imported vehicles. All times reflect technicians' use of aftermarket tools and training.

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway

network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Dictionary of Civil Engineering

"In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.
