Proactive Citizenry, the company which created Cam from the parts of unwound teens, has a plan: to mass produce Rewound teens like Cam for military purposes. But below the surface is of that horror lies another shocking level of intrigue: Proactive Citizenry has been suppressing technology that could make unwinding completely unnecessary. As Conner, Risa and Lev uncover these shocking secrets, enraged teens begin to march on Washington to demand justice and a better future. But more trouble is brewing. Starkey's group of storked teens are growing more powerful and militant with each new recruit. And if they have their way, they'll burn the harvest camps to the group, and put every adult in them before a firing squad—which could destroy any chance America has for a peaceful future. Praise for UNWIND: "This is the kind of rare book that makes the hairs on your neck rise up. It is written with a sense of drama that should get it instantly snapped up for film." The Times "Gripping, brilliantly imagined futuristic thriller... The issues raised could not be more provocative - the sanctity of life, the meaning of being human - while the delivery could hardly be more engrossing or better aimed to teens." Publishers Weekly, starred review "a powerful, shocking, and intelligent novel It's wonderful, wonderful stuff." thebookbag.co.uk "This book challenges ones ideas about life, about morality, about religion, about fanatics. It is not a comfortable read but it is thought-provoking." Carousel

Sometimes achieving big things requires the ability to think small. This simple concept was the driving force that propelled the Volkswagen Beetle to become an avatar of American-style freedom, a household brand, and a global icon. The VW Bug inspired the ad men of Madison Avenue, beguiled Woodstock Nation, and has recently been re-imagined for the hipster generation. And while today it is surely one of the most recognizable cars in the world, few of us know the compelling details of this car's story. In *Thinking Small*, journalist and cultural historian Andrea Hiott retraces the improbable journey of this little car that changed the world. Andrea Hiott's wide-ranging narrative stretches from the factory floors of Weimar Germany to the executive suites of today's automotive innovators, showing how a succession of artists and engineers shepherded the Beetle to market through periods of privation and war, reconstruction and recovery. Henry Ford's Model T may have revolutionized the American auto industry, but for years Europe remained a place where only the elite drove cars. That all changed with the advent of the Volkswagen, the product of a Nazi initiative to bring driving to the masses. But Hitler's concept of "the people's car" would soon take on new meaning. As Germany rebuilt from the rubble of World War II, a whole generation succumbed to the charms of the world's most huggable automobile. Indeed, the story of the Volkswagen is a story about people, and Hiott introduces us to the men who believed in it, built it, and sold it: Ferdinand Porsche, the visionary Austrian automobile designer whose futuristic dream of an affordable family vehicle was fatally compromised by his patron Adolf Hitler's monomaniacal drive toward war; Heinrich Nordhoff, the forward-thinking German industrialist whose management innovations made mass production of the Beetle a reality; and Bill Bernbach, the Jewish American advertising executive whose team of Madison Avenue mavericks dreamed up the legendary ad campaign that transformed the quintessential German compact into an outsize worldwide phenomenon. *Thinking Small* is the remarkable story of an automobile and an idea. Hatched in an age of darkness, the Beetle emerged into the light of a new era as a symbol of individuality and personal mobility—a triumph not of the will but of the imagination.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying

field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

Graphic Violence provides an innovative introduction to the relationship between violence and visual media, discussing how media consumers and producers can think critically about and interact with violent visual content. It comprehensively surveys predominant theories of media violence and the research supporting and challenging them, addressing issues ranging from social learning, to representations of war and terrorism, to gender and hyper-masculinity. Each chapter features original artwork presenting a story in the style of a graphic novel to demonstrate the concepts at hand. Truly unique in its approach to the subject and medium, this volume is an excellent resource for undergraduate students of communication and media theory as well as anyone interested in understanding the causes and effects of violence in media.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even

profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science.”

Popular Science

This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and gasification. Research has been included from around the world, representing potential international solutions to what are global challenges, as well as crucial implications for ongoing research in this important field of study.

Solid Waste as a Renewable Resource

Jason Palmer loved being a soldier. But after returning from Iraq with an "other than honourable" discharge, he's finding rebuilding his life the toughest battle yet. Elena Cruz is a talented cop, the first woman to make Chicago's prestigious Gang Intelligence Unit. She's ready for anything the job can throw at her. Until Jason's brother, a prominent community activist, is murdered in front of his own son. Now, stalked by brutal men with a shadowy agenda, Jason and Elena must unravel a conspiracy stretching from the darkest alleys of the ghetto to the manicured lawns of the city's power brokers. In a world where corruption and violence are simply the cost of doing business, two damaged people are all that stand between an innocent child - and the killers who will stop at nothing to find him.

Assessments, understood as tools for tracking what and how well students have learned, play a critical role in the classroom. Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to

meet the vision of science education for the future as it has been elaborated in A Framework for K-12 Science Education (Framework) and Next Generation Science Standards (NGSS). These documents are brand new and the changes they call for are barely under way, but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education. The new Framework and the NGSS are designed to guide educators in significantly altering the way K-12 science is taught. The Framework is aimed at making science education more closely resemble the way scientists actually work and think, and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time. It structures science education around three dimensions - the practices through which scientists and engineers do their work, the key crosscutting concepts that cut across disciplines, and the core ideas of the disciplines - and argues that they should be interwoven in every aspect of science education, building in sophistication as students progress through grades K-12. Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework. This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision. The report offers a systems approach to science assessment, in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another. Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction, assessments designed to monitor science learning on a broader scale, and indicators designed to track opportunity to learn. New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential. The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students.

The untold story of the slaying of a Southern town's ex-slaves and a white lawyer's historic battle to bring the perpetrators to justice Following the Civil War, Colfax,

Louisiana, was a town, like many, where African Americans and whites mingled uneasily. But on April 13, 1873, a small army of white ex-Confederate soldiers, enraged after attempts by freedmen to assert their new rights, killed more than sixty African Americans who had occupied a courthouse. With skill and tenacity, The Washington Post's Charles Lane transforms this nearly forgotten incident into a riveting historical saga. Seeking justice for the slain, one brave U.S. attorney, James Beckwith, risked his life and career to investigate and punish the perpetrators—but they all went free. What followed was a series of courtroom dramas that culminated at the Supreme Court, where the justices' verdict compromised the victories of the Civil War and left Southern blacks at the mercy of violent whites for generations. *The Day Freedom Died* is an electrifying piece of historical detective work that captures a gallery of characters from presidents to townspeople, and re-creates the bloody days of Reconstruction, when the often brutal struggle for equality moved from the battlefield into communities across the nation.

Thinking Small

The act of worship, he explains, often implied engaging in collective rites regulated by playful behavior, the most common forms of which were group hymns and choral dances.

At the City's Edge

After her sister's brutal murder, Sabra swore vengeance. But now, her brother has sold her as mate to the highest bidder. Defiant of the custom, and unwilling to submit, dangerous trouble lies ahead. In order to survive, she's forced to accept the help of her mortal enemy. On the eve of the Savage Solstice, the werewolves hold a tournament. A fight to the death. The victor will become the new pack leader. In a culture where women have no rights, Sabra will challenge tradition and fight in the tournament. She will need all of her rage, strength, and training if she is to have a chance. But most of all, she'll need her heart, and it just may have been stolen by the man she hates more than anything. The wizards are coming All of Regia's best minds are working tirelessly to come up with a plan to save their world. A blood lock is set in place to hold the enemy back. But if it fails Will Forest's daughter hold the key to Regia's survival?

The First Americans

It is the ancient days of the Persian Empire. Hadassah was content in her quiet life in the Jewish quarter of the city of Babylon with her uncle Mordecai, who had raised her from childhood. But she was old enough to be married, and yet her uncle hadn't arranged a marriage for her. Meanwhile in Shushan, King Ahasuerus' marriage to the vain and selfish Vashti has ended, and a new wife must be found. Why not bring to him the most beautiful women of the kingdom, and let him choose? And so the loveliest young women of the empire are selected in local contests, and Hadassah is among those chosen to go to Shushan to meet the King. But as a Jewess in a foreign land with powerful enemies to her faith, she must conceal her true identity and take the Babylonian name of Esther. Will she find love with a man she has never met? And can she survive in a strict royal court controlled by the evil prime minister Haman, who wants to destroy her people?-Print ed.

Developing Assessments for the Next Generation Science Standards

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get

the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff’s clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You’ll Never Eat Lunch in this Town Again* of the music industry.

Saxon Math

One day in the early spring, Alice Winter came home from school, and, after the usual question at the door, "Is mamma at home?" rushed upstairs, and found to her great surprise that her papa was at home, talking very earnestly to Mrs. Winter. When Alice came into the room, Mr. Winter stopped talking, and she wondered very much what they could have been talking about so earnestly, as all she heard was her papa asking, "Do you think we had better take her with us?" "Why, papa! What is the matter? Are you going away? Are you sick? What made you come home so early?" were the questions which Alice gave rapidly, without waiting for an answer. Mr. Winter said, "Yes, dear, I am obliged to go to Nuremberg, Germany, on business immediately, and mamma is trying to make up her mind whether it is best for her to go with me. She does not like to leave you for so long a time, and we do not think it wise to take you with us, when you are getting on at school so nicely."

Dark Soul

Saxon Math Intermediate 3-5 has the following features: Daily lesson structure with continual practice and assessment; Builds foundational concepts and critical thinking skills; Real World Problem Solving and Applications; Students communicate mathematically. Possible adaptations for Saxon Math Intermediate 3-5 include: Flexible curriculum design that meets the 3-tier RTI model; Can be integrated into inclusion classrooms, pullout programs, or resource classrooms; Ensures that struggling students keep pace with the core curriculum; Works for students with learning disabilities and special needs. Manipulatives are integrated into many lessons to provide hands-on support for new concepts. - Publisher.

Boating Life

Thief. Murderess. Sacrificial messenger. Netriet has faced death many times but she never consented to the transformation she endured the last time her life was pulled back from the edge of death. She's compelled to live a solitary life for fear the shadow inside her will terrify others. Lonely, Netriet longs for acceptance and friendship. Joining up with the Fair, a haven for misfits, she believes she's found home and love with Merick. The ghosts of Merick's past haunt him. Helplessly

attracted to Netriet, he's sworn to help her destroy the shadow within, but losing his heart to her cripples him with fear. Mistakes and misunderstanding push her away and Merick's forced to watch her flee into the arms of another man. Torn between two men, Netriet's true nature is drawn to one, while the shadow yearns for the other. At war with the darkness, Netriet must choose, or let the shadow swallow her completely. The fate of Regia's new republic hangs in the balance as a new enemy arises, backed by a group of violent insurgents bent on destroying everything Forest has worked for. Desperate for intelligence about the terrorist group, Forest learns the leader wants not only to claim the throne, but also her life.
