First Words Baby Signing (Scholastic Early Learning: First Steps)

Rather than cover hundreds of plants in abbreviated accounts like the typical field guide, the author has chosen a smaller selection of species to discuss in exhaustive detail, including only those plants he has eaten fifty times or more. This book contains as many as ten high-quality color photographs of each plant. These have been selected to facilitate identification and depict the plant parts at exactly the stage of growth in which they should be harvested. The accompanying text is accurate and thorough, giving readers of any experience level the confidence to harvest wild plants for food. Botanically, the text is accurate, yet it remains accessible to the layperson by using technical terms only when necessary. This book has many unique features that will appeal to naturalists, hikers, campers, survivalists, homesteaders, gardeners, chefs, Native Americans, and whole food enthusiasts. It contains a calendar of harvest times for wild produce, a step-by-step protocol for positive identification, an illustrated glossary tailored to the needs of foragers, a recommended reading list, plus special sections on conservation, safety, nutrition, harvest techniques, preparation methods, and storage. While this is not a regional guide, it will prove most useful to readers in the eastern US and Canada, the Rocky Mountains, and the Pacific Northwest.

More Than Pretty

Global Warming: Causes, Impacts and Solutions covers all aspects of global warming including its causes, impacts, and engineering solutions. Energy and environment policies and strategies are scientifically discussed to expose the best ways to reduce global warming effects and protect the environment and energy sources affected by human activities. The importance of green energy consumption on the reduction of global warming, energy saving and energy security are also discussed. This book also focuses on energy management and conservation strategies for better utilization of energy sources and technologies in buildings and industry as well as ways of improving energy efficiency at the end use, and introduces basic methods for designing and sizing cost-effective systems and determining whether it is economically efficient to invest in specific energy efficiency or renewable energy projects, and describes energy audit producers commonly used to improve the energy efficiency of residential and commercial buildings as well as industrial facilities. These features and more provide the tools necessary to reduce global warming and to improve energy management leading to higher energy efficiencies. In order to reduce the negative effects of global warming due to excessive use of fossil fuel technologies, the following alternative technologies are introduced from the engineering perspective: fuel cells, solar power generation technologies, energy recovery technologies, hydrogen energy technologies, wind energy technologies, geothermal energy technologies, and biomass energy technologies. These technologies are presented in

detail and modeling studies including case studies can also be found in this book.

Group Sequential and Confirmatory Adaptive Designs in Clinical Trials

This book provides an up-to-date review of the general principles of and techniques for confirmatory adaptive designs. Confirmatory adaptive designs are a generalization of group sequential designs. With these designs, interim analyses are performed in order to stop the trial prematurely under control of the Type I error rate. In adaptive designs, it is also permissible to perform a data-driven change of relevant aspects of the study design at interim stages. This includes, for example, a sample-size reassessment, a treatment-arm selection or a selection of a pre-specified sub-population. Essentially, this adaptive methodology was introduced in the 1990s. Since then, it has become popular and the object of intense discussion and still represents a rapidly growing field of statistical research. This book describes adaptive design methodology at an elementary level, while also considering designing and planning issues as well as methods for analyzing an adaptively planned trial. This includes estimation methods and methods for the determination of an overall p-value. Part I of the book provides the group sequential methods that are necessary for understanding and applying the adaptive design methodology supplied in Parts II and III of the book. The book contains many examples that illustrate use of the methods for practical application. The book is primarily written for applied statisticians from academia and industry who are interested in confirmatory adaptive designs. It is assumed that readers are familiar with the basic principles of descriptive statistics, parameter estimation and statistical testing. This book will also be suitable for an advanced statistical course for applied statisticians or clinicians with a sound statistical background.

Grammy Award-winning gospel singer, television star, and radio host Erica Campbell speaks to women of all shapes and sizes, demonstrating that true beauty is found not in external appearances, but in celebrating the person God made you to be. So many young women struggle with issues of low self-esteem, depression, self-degradation, and other unhealthy habits that manifest on the outside what's happening on the inside. And the rise of social media and the emphasis on

beauty as validation for self-worth have only added fuel to the fire. But Erica Campbell—Grammy-winning gospel star, reality TV star, and nationally-syndicated radio host—believes that we need to redefine beauty. We need to start to see ourselves the way God sees us—beautiful and perfectly made. True beauty, Erica believes, is about embracing who God made you to be. In *More Than Pretty*, she turns the mirror around, reflecting God’s Word, His affirmations, and His design for every woman. This book explores issues of self-esteem, identity, and God’s design for love and intimacy. She is candid about her own struggles, sharing honestly about her battle to feel “good enough” in an industry that fixates on outward appearances. Covering topics such as being honest about who we truly are, reflecting on what we have internalized about our appearances, uncovering and exposing the plan of the Enemy, and accepting God’s will for your life, Erica offers thoughtful, hard-won wisdom and encouragement to women from all walks of life, helping build confidence in and through the power of God.

Causes, Impacts and Solutions to Global Warming

Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.
