Financial and Managerial Accounting

The 2008 Cumulative Supplement contains the following updates: Discussion of expected commercial value has been added to Chapter 22, since it is an integral part of the decision to expend funds on a research and development project. Given the large proportion of service-related businesses in the economy, we have added a new section to Chapter 23, in which we outline how to conduct profitability analysis for services. We have added substantially to Chapter 25, where we prioritize a number of techniques for improving the efficiency of the payroll process. These improvements cover the areas of timekeeping, self-service portals, the reduction of employee deductions, payroll payments, outsourcing, the use of a captive insurance company to reduce the cost of benefits, and management of the payroll department. In Chapter 26, we have added a discussion of the bullwhip effect on the cash forecast, as well as how it can be mitigated to achieve more

accurate cash forecasts. Chapter 27, which covers the planning and control of receivables, has been substantially bolstered with new information about credit policies and procedures, the review and processing of credit applications, granting credit, credit insurance, creating and delivering invoices, collecting cash, and managing the credit and collections staff. Chapter 28, which covers the planning and control of inventory, has been enhanced in a similar manner. It now includes in-depth discussions of the best ways to conduct inventory purchasing, receiving, storage, picking, and shipping.

Through a focus on accounting transactions, real-world industry examples, and robust assessment,

students develop a solid understanding of how to apply accounting principles and techniques in practice. Controllership

Privilege is about more than being white, wealthy, and male, as Michael Kimmel, Abby Ferber, and a range of contributors make clear in this timely anthology. In an era when 'diversity' is too often shorthand for 'of color' and/or 'female' the personal and analytical essays in this collection explore the multifaceted nature of social location and consider how gender, class, race, sexual orientation, (dis)ability, and religion interact to create nuanced layers of privilege and oppression. The individual essays (taken together) guide students to a deep understanding of the dynamics of diversity and stratification, advantage, and power. The fourth edition features thirteen new essays that help students understand the intersectional nature of privilege and oppression and has new introductory essays to contextualize the readings. These enhancements, plus the updated pedagogical features of discussion questions and activities at the end of each section, encourage students to examine their own beliefs, practices, and social location.

Financial Accounting for Management: An Analytical Perspective

For colleges and universities around the world, John Wiley & Sons is proud to announce Financial Accounting: IFRS Edition, by Jerry J. Weygandt, Paul D. Kimmel, and Donald E. Kieso, which incorporates International Financial Reporting Standards (IFRS) into the existing textbook framework. On almost every page, the book addresses every accounting topic from the perspective of IFRS while still highlighting key differences between IFRS and US GAAP. Following the reputation for accuracy, comprehensiveness, and currency, the authors have painstakingly created a book dedicated to assisting students learning accounting topics under the rules of IFRS.

Survey of Accounting

With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.
