ACLS Review Made Incredibly Easy

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that

promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

In this book we give you all the essential information that you will need to successfully pass the certification course and exam on your first attempt. Joe and I have been teaching this course to healthcare professionals and students since 1984. We know what works and what doesn't when it comes to helping our students be successful. We had to develop almost all of the study materials for our students by ourselves because very little existed at the time. The Zombie Notes Study Charts were some of the first study aids we developed to help our students learn a large amount of information very quickly. We know that this format works very well because hundreds of thousands of healthcare professionals and students, in hospitals and colleges all over the world, have used this handy, no-nonsense chart to help them successfully pass the ACLS certification exams. Therefore, in order for you to be successful on the certification exam, and on the job, we expect you to memorize every bit of information contained within the Zombie Notes Study Charts and within this book. It is essential that you know this information by heart and can recall it at a moment's notice. This information is not only essential for the exam, but for your career, and the survival of your patients, as well.
