Exploring Earth Science

In the not-too-distant future, huge tornadoes and monster storms have become a part of everyday life. Sent to spend the

summer in the heart of storm country with her meteorological engineer father, Jaden Meggs is surprised at the strides her father's company StormSafe, has made with custom shelters that keep her family safe in even the worst of storms. At her exclusive summer science camp, Eye On Tomorrow, Jaden meets Alex, a boy whose passion for science matches hers. Together, they discover that her father's company is steering storms away from the expensive neighborhoods and toward the organic farming communities that are in competition with his bio-engineered food company, NatureMade. Jaden must confront her father, but when she does, she uncovers a terrifying family secret and must call on both her scientific knowledge and her faith to save the people she loves most from one of her father's monster storms.

Mary Grace Soccio. My writing could not please this kindhearted woman, no matter how hard I tried. Although Gifted and Talented seventh-grade math posed no problem for me, the same was not true for Mrs. Soccio's English class. I was frustrated that my first assignment only netted me a C. I worked harder, making revision after revision, a concept I had never really put much faith in before. At last, I produced an essay that seemed the apex of what I was capable of writing. Although the topic of that essay is now lost to my memory, the grade I received was not: a B?. "The best I could do was a B??" The realization sank in that maybe I was not such a good writer. In those days, my youthful hubris did not understand about incapacity building. In other words, being challenged would result in my intellectual growth— an academic restatement of Nietzsche's "What does not destroy me, makes me stronger." Consequently, I asked to be withdrawn from Gifted and Talented English in the eighth grade.
