### Chapter 6- Bones and Bone Tissues Flashcards | Quizlet

Short Answer Questions. 1. One way bones are classified is by their shape. How would you classify the bones fractured by Mrs. Morgan? 2. The body of Mrs. Morgan's vertebra is fractured. What type of bone tissue makes up the majority of the vertebral body? Describe the structure and function of this type of bone. 3.

### What are cavities in bone tissue where osteocytes are

GROUP OF CELLS FORM TISSUE..SO BONE TISSUE IS FORMED OF FIVE TYPES OF BONE CELLS. Bone tissue contains five basic types of bone cells. There are cells which are responsible for the response of the

### What tissue connects bones to bones? - Answers

Individual cells cannot make bone. A group of organized osteoblasts together with the bone made by a unit of cells is usually called the osteon. Ossification (or osteogenesis) in bone remodeling is the process of laying down new bone material by cells called osteoblasts. It is synonymous with bone tissue formation.

### Physical Exertion Affect Bone Growth Health And Social

Check the below NCERT MCQ Questions for Class 9 Science Chapter 6 Tissues with Answers Pdf free download. Adipose tissue (c) Bones (d) Cartilage. Answer. Answer: (b) Adipose tissue. Question 14. Bone matrix is rich in (a) Fluoride and calcium (b) Calcium and phosphorus (c) Calcium and potassium (d) Phosphorus and potassium.

### Chapter 5 Skeletal System Study Guide Answers

Answer to VLQ. Intramembranous ossification Endochondral ossification A. Which bones? B. Tissue that is replaced with bone? C. Rol

## Healthy Bones Matter: Quiz Questions | NIAMS

Describe the layers of bone tissue found here. The diaphysis of a long bone is made up almost entirely by compact bone. Compact bone is made up of lamella (layers) that are named according to their shape or position within compact bone.

- Concentric lamellae = circular shape; form the osteon.

## Answered: A Case Study on Bone Tissue Structure... | bartleby

True or False: Bone is a living, growing tissue. True or False: Your bones continue to gain density all your life. True or False: I can't do anything now to keep my bones healthy later in life. True or False: Childhood and teenage years are the best time to build up my bone "bank account." True or False: Osteoporosis causes bones to get

## Bone Classification/Long Bones Quiz - Quizizz

The right answer is c. Lacunae.. The cavities of the bone tissue where the osteocytes are present are known as lacunae. The lacunae are found lining in between the lamellae of the bone along with

## Answer Key to Short Answer Questions for

-sandwich like construction: two layers of compact bone sandwiching a layer of spongy bone (diploe) -both compact surfaces covered with periosteum; spongy bone lined with endosteum -moderate blow to skull can fracture outer compact bone; spongy bone may absorb impact and leave inner compact bone intact

## VLQ. Intramembranous Ossification Endochondral Oss

Four types of cells are found within bone tissue: osteoblasts, osteocytes, osteogenic cells, and osteoclasts (Figure 5). The osteoblast. is the bone cell responsible for forming new bone and is found in the growing portions of bone, including the periosteum and endosteum.

## Why is bone tissue called dynamic? | Study.com

Which bone tissue makes up the hard outer part of bones? 1 Answer. awilliams. Awilliams. Answered Nov 20, 2017. Compact Bone Share Reply. Write Your Answer. Post Your Answer.

## Answers To Bones Bone Tissue

The skeleton consists of bones connected at joints, or articulations, and is sub- into two divisions. The axial skeleton includes those bones that lie around the body's center of gravity. The appendicular skeleton includes the bones of the limbs.

## Quiz+ | Quiz 6: The Skeletal System: Bone Tissue

Leg bones act as pillars to support the body trunk, and then ribs support the thorax wall. 2. Protection- skull and vertebrae surround soft tissue of the nervous system, and the rib cage protects vital thoracic organs. 3. Movement- skeletal muscles use the bones as levers to move the body. 4. Storage- fat stored in the interior of the bones.

### Which bone tissue makes up the hard outer part of bones

The hardest, most dense part of the bone tissue is the. answer choices . periosteum. spongy bone. osteoblast. compact bone. Tags: Question 3 . SURVEY . 30 seconds . Q. Covering on the end of the bones as represented in structure D. Also on the end of B. Provides protection.

### MCQ Questions for Class 9 Science Chapter 6 Tissues with

What statements describe bone remodeling. 1.It occurs throughout your lifetime. 2.It involves bone resorption. 3.It involves bone deposition. 4.It occurs at different rates at different locations. 5.It occurs at a faster rate in compact bone than spongy bone. 6.Osteoclasts and osteoblasts will be working on the same tunnel simultaneously. 7.Osteoclasts place calcium and phosphorus directly into the bloodstream.

### Bone Structure | Anatomy and Physiology I

The tissue that connects bone to bone are called ligaments. They are responsible for providing stability to a joint. Cartilage, and ligaments make up the "connective tissue". And also Tendons

### Bing: Answers To Bones Bone Tissue

Compact bone is hard due to mineral deposits of calcium carbonate and calcium phosphate (calcium and phosphorus). This bone consists of tightly packed osteons or haversian systems and many layers with few gaps on this tissue therefore it is dense and hard. The hard minerals and flexible collagen makes bone strong.

### chapter 7: bone tissue Flashcards - Questions and Answers

Bone Tissue Bone is classified as a specialized connective tissue as it is rigid and calcified. Bone is a living tissue with nerves, cells, and blood vessels. Bone supports and protects the organs

### What is the function of bone tissue? - Answers

Choose all the answers that apply. Connective tissue \_\_\_\_\_. Covers the outside of an organism. Holds organs and other tissue in place. Lines the inside of hollow organs. Cushions the body and stores energy. Attaches muscle to bone. Joins bones together.
