The Big Ideas Math program balances conceptual understanding with procedural fluency. Embedded Mathematical Practices in grade-level content promote a greater understanding of how mathematical concepts are connected to each other and to real-life, helping turn mathematical learning into an engaging and meaningful way to see and explore the real world.

Acing the New SAT Math

Welcome to the wonderful world of algebraic computation! This activity book offers puzzles, games, and activities suitable for students who want to have fun while becoming more adept in mathematical skill and ability. Algebra provides many of the core foundations for a large number of career paths. "Algebra 1 Activities" provides students with a practical, useful, and fun way to learn while preparing for studies in medicine, architecture, computer science, meteorology, media, statistics, accounting, engineering, industry, and parenting. Designed with both the instructor and students in mind, "Algebra 1 Activities" facilitates meaningful teaching and learning opportunities. It covers various mathematics topics that may be used as follow-up or supplementary activities to guided instruction at the teacher's discretion. Several activities are included for extended practice if required. They are logically arranged for a smooth progression through mastery of mathematics skills and can be adapted to fit the students' needs, abilities, and learning styles. "Algebra 1 Activities" allows for creativity, flexibility, and the enhancement of learning experiences in mathematics. Equip your students or yourself for the careers and challenges of the future.
