How to Live on Your Income

Handbook of Methods in Cultural Anthropology

When originally published in Norway, *Ethnic Groups and Boundaries* marked the transition to a new era of ethnic studies. Today this much-cited classic is regarded as the seminal volume from which stems much current anthropological thinking about ethnicity. *Ethnic Groups and Boundaries* opens with Barths invaluable thirty-page essay that introduces students to important theoretical issues in the analysis of ethnic groups. Following is a collection of seven essays the results of a symposium involving a small group of Scandinavian social anthropologists intended to illustrate the application of Barths analytical viewpoints to different sides of the problems of polyethnic organization in various ethnographic areas, including Norway, Sudan, Ethiopia, Mexico, Afghanistan, and Laos.

Anthropology: Appreciating Human Diversity

[In this book, the authors] are interested not only in what humans are and were like; [but they are] also interested in why they got to be that way, in all their variety. When there are alternative explanations, [the authors] try to communicate the necessity to evaluate them logically as well as on the basis of the available evidence. Throughout the book, [they] try to

communicate that no idea, including ideas put forward in textbooks, should be accepted even tentatively without supporting tests that could have gone the other way. -Pref.

Cultural Anthropology 18e

Human-Environment Interactions

Via 100 entries or 'mini-chapters,' the SAGE 21st Century Reference Series volumes on Anthropology will highlight the most important topics, issues, questions, and debates any student obtaining a degree in the field of anthropology ought to have mastered for effectiveness in the 21st century. The purpose is to provide undergraduate students with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail or density as a journal article or a research handbook chapter.

Essentials of Cultural Anthropology: A Toolkit for a Global Age

One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, *Dancing Skeletons* presents informal, engaging, and oftentimes dramatic stories that relate the author's experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions, Dettwyler explores such diverse topics as ethnocentrism, culture shock, population control, breastfeeding, child care, the meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page "Q&A with the Author" in which Dettwyler responds to typical questions she has received individually from students who have been assigned *Dancing Skeletons* as well as audience questions at lectures on various campuses. The new 23-page "Update on Mali, 2013" chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest.

The Essence of Anthropology

Voyages

The "Law & Anthropology Yearbook" brings together a collection of studies that discuss legal problems raised by cultural differences between people and the law to which they are subject. "Volume 8" contains a selection of edited papers presented at the VIth International Symposium of the Commission on Folk Law and Legal Pluralism, dealing with the topic of Indigenous Self-Determination and Legal Pluralism'.

On Being Different

On Being Different provides an up-to-date, comprehensive, and interdisciplinary account of diversity and multiculturalism in the United States and Canada. Kottak and Kozaitis clarify essential issues, themes, and topics in the study of diversity, including ethnicity, religion, gender, and sexual orientation. The book also presents an original theory of multiculturalism, showing how human agency and culture work to organize and change society. The authors use rich and varied ethnographic examples, from North America and abroad, to help students apply the material to their own lives, and thus gain a better understanding of diversity and multiculturalism.

The Trobrianders of Papua New Guinea

Ideal for any cultural anthropology course, this brief collection of ethnographic case studies exposes students to 15 different cultures. The groups selected are peoples whose traditional cultures are uniquely their own. Each has distinctive patterns and practices; each has faced the challenge of an encroaching world, with differing results. Moreover, they often provide the prime illustrations of important concepts in introductory anthropology course including Azande witchcraft, Ju/'hoansi egalitarianism, Trobriand kula exchange, and Minangkabau matriliney. As such, this volume can stand alone.

Conformity and Conflict

Demonstrate the nature of culture and its influence on people's lives. For over 40 years, the best-selling Conformity and Conflict has brought together original readings and cutting edge research alongside classic works as a powerful way to study human behavior and events. Its readings cover a broad range of theoretical perspectives and demonstrate basic anthropological concepts. The Fourteenth Edition incorporates successful articles from past editions and fresh ideas from the field to show fascinating perspectives on the human experience. Teaching and Learning Experience Personalize Learning - MyAnthroLab delivers proven results in helping students succeed, provides engaging experiences that

personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking - Articles, article introductions and review questions encourage students to examine their assumptions, discern hidden values, evaluate evidence, assess their conclusions, and more! Engage Students - Section parts, key terms, maps, a glossary and subject index all spark student interest and illustrate the reader's main points with examples and visuals from daily life. Support Instructors - Teaching your course just got easier! You can create a Customized Text or use our Instructor's Manual, Electronic "MyTest" Test Bank or PowerPoint Presentation Slides. Additionally, Conformity and Conflict's part introductions parallel the basic concepts taught in introductory courses – which allow the book to be used alone as a reader or in conjunction with a main text. Note: MyAnthroLab does not come automatically packaged with this text. To purchase MyAnthroLab, please visit www.MyAnthroLab.com or you can purchase a valuepack of the text + MyAnthroLab (at no additional cost): VP ISBN-10: 0205176011/ISBN-13: 9780205176014

Anthropology

This concise, student-friendly, current introduction to general anthropology carefully balances coverage of core topics and contemporary changes in the field. Window on Humanity is a perfect match for general anthropology courses that use readings or ethnographies along with a main text.

An Introduction to Sociology

Drawing on research from eleven countries across four continents, the 16 chapters in the volume bring perspectives from various specialties in anthropology and human ecology, institutional analysis, historical and political ecology, geography, archaeology, and land change sciences. The four sections of the volume reflect complementary approaches to HEI: health and adaptation approaches, land change and landscape management approaches, institutional and political-ecology approaches, and historical and archaeological approaches.

Environmental Anthropology

This text is designed to provide a concise introduction to cultural anthropology, carefully balancing coverage of core topics with contemporary changes in the field.

Looseleaf Window on Humanity

A leading name in anthropology, Conrad Philip Kottak continues to define student learning in the cultural anthropology course. Cultural Anthropology offers an up-to-date holistic introduction to anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. The program presents anthropology's core concepts and also demonstrates anthropology's relevance to the 21st-century world we inhabit. Revisions to the 18th edition of Cultural Anthropology were extensively informed by student data, collected anonymously by McGraw-Hill's adaptive learning system. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Law and Anthropology

Written by a prominent scholar in the field, Conrad Phillip Kottak, this concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. New to this edition, Connect Anthropology offers a variety of learning tools and activities to make learning more engaging for students and teaching more efficient for instructors. Mirror for Humanity is a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text.

Cultural Evolution

"Most Americans are unaware that the United States is a major terminus for the people of Tonga, an island nation in the South Pacific. Small examines Tongan migration to the United States in a transnational perspective, stressing that many of the new migrant populations seem to successfully manage dual lives, in both the old country and the new. To that end, she describes life in contemporary Tongan communities and in U.S. settings."—Library Journal "The central idea of Voyages—that Tonga and all Tongans exist at this moment in time in a transnational space—comes through vividly and powerfully, and the durability of this image is testimony to the success of Small's experiment in ethnographic writing."—The Contemporary Pacific "Voyages is a valuable contribution to the literature on immigration and on Asian Americans. Its clear, informal prose style also makes it an ideal book for undergraduate or graduate classes in anthropology, sociology, cultural geography, or Asian American studies."—International Migration Review "To write a book that is both educational and entertaining is to be at once scholarly, thoughtful, and witty—a major achievement. Cathy Small understands what migration has meant, and still means in everyday lives, as she empathizes with the plight of islanders uncertain over their landfall and destiny, and she captures their own stories beautifully. Voyages is one of the most passionate and compassionate books on the South Pacific in recent years."—Pacific "Small weaves her stories and analysis with a clarity and compelling attentiveness to logic that do not sacrifice intricacy and nuance."—Journal of Asian American Studies In

Voyages, Cathy A. Small offers a view of the changes in migration, globalization, and ethnographic fieldwork over three decades. The second edition adds fresh descriptions and narratives in three new chapters based on two more visits to Tonga and California in 2010. The author (whose role after thirty years of fieldwork is both ethnographer and family member) reintroduces the reader to four sisters in the same family—two who migrated to the United States and two who remained in Tonga—and reveals what has unfolded in their lives in the fifteen years since the first edition was written. The second edition concludes with new reflections on how immigration and globalization have affected family, economy, tradition, political life, identity, and the practice of anthropology.

CULTURE

Can today's college students confront race relations issues directly and make positive changes? Yes, they can. This book provides students with a fresh, practical approach to address these serious issues—as individuals and as members of groups—and set off a new positive revolution in race and ethnic relations.

- Presents brand-new race and ethnic relations solution strategies for college students and universities in the United States
- Carefully investigates several theoretical frameworks to provide readers with a better understanding of the numerous issues associated with race relations
- Discusses a number of culturally sensitive topics associated with race and ethnic relations, such as race and intelligence, affirmative action programs, discrimination, Black Lives Matter, and immigration policies

Distant Mirrors

Focused on the appreciation of anthropology, the new edition of Anthropology: Appreciating Human Diversity offers an up-to-date holistic introduction to general anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. In this edition, Understanding Ourselves chapter openers and Through the Eyes of Others boxes show how anthropology helps us understand ourselves. New Appreciating Diversity boxes focus on the various forms of human biological and cultural diversity. Appreciating Anthropology boxes are also new to the text and focus on the value and usefulness of anthropological research and approaches.

Savage Money

Book about the social life and customs of the Trobriand Islanders of Papua New Guinea

Assault on Paradise

THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Within each chapter, pedagogical elements hone in on particularly interesting examples that give students deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative, and insightful questions foster critical thinking about main themes. In further support of learning, the book's design facilitates students' ability to understand anthropology's key concepts and their great relevance to today's complex world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mirror for Humanity

Most young students of American culture believe many of the cultural assumptions they grow up with are universal. As insiders, speaking a common language, following the accepted patterns of behavior embedded in a particular way of life, most of us take our own social actions for granted, and it is a challenge to realize the strangeness and wonder of our own behaviors. The distinct aim of each edition of this popular classroom supplement has been to enable students to better understand themselves by casting American culture into sharper relief—offering other mirrors, other reflections. The latest edition's twenty-one personalized narratives, of which seven are new, unveil fresh portrayals of American culture. Each contribution offers unique ethnographic perspectives of various aspects of American culture that enable us to better understand ourselves.

21st Century Anthropology: A Reference Handbook

Covers the latest competing theories in the field Get a handle on the fundamentals of biological and cultural anthropology When did the first civilizations arise? How many human languages exist? The answers are found in anthropology - and this friendly guide explains its concepts in clear detail. You'll see how anthropology developed as a science, what it tells us about our ancestors, and how it can help with some of the hot-button issues our world is facing today. Discover: How anthropologists learn about the past Humanity's earliest activities, from migration to civilization Why our language differs from other animal communication How to find a career in anthropology

Dancing Skeletons

This first monograph in the EARTH series, *The dynamics of non-industrial agriculture: 8,000 years of resilience and innovation*, approaches the great variety of agricultural practices in human terms. It focuses on the relationship between plants and people, the complexity of agricultural processes and their organisation within particular communities and societies. Collaborative European research among archaeologists, archaeobotanists, ethnographers, historians and agronomists using a broad analytical scale of investigation seeks to establish new common ground for integrating different approaches. By means of interdisciplinary examples, this book showcases the relationship between people and plants across wide ranging and diverse spatial and temporal milieus, including crop diversity, the use of wild foodstuffs, social context, status and choices of food plants.

Cultural Anthropology

The most successful new textbook in a generation, Ken Guest's text shows students that now, more than ever, global forces affect local culture. Students learn that the tools of cultural anthropology are relevant to their life in our globalized world. The NEW InQuizitive course helps students focus their reading, master the basics, and come to class prepared.

Positioning Research

In its ninth edition, *The Human Species* continues to provide a comprehensive approach to biological anthropology, especially the relationship between biology and culture, behavior in an evolutionary context, and humans as a species within the primate order. With its lively narrative and emphasis on the most current topics and findings in the field, *The Human Species* explores the major questions that concern biological anthropologists about our species.

Ethnic Groups and Boundaries

A recent National Academy of Sciences inductee, Conrad Phillip Kottak offers an up-to-date holistic introduction to cultural anthropology. Kottak emphasizes why anthropology should matter to students and how students can use anthropology to better understand themselves. *Bringing It All Together* essays found on the online learning center demonstrate the integrated and comparative nature of anthropology. *New Through the Eyes of Others* essays offer the perspectives of foreign students and recent graduates who present their own cultures of origin in contrast with contemporary American culture. Thought-provoking questions now begin each chapter to highlight key themes and spark discussions and critical thinking.

Looseleaf for Mirror for Humanity

This book presents a comprehensive discussion of classical ideas, core topics, currents and detailed theoretical underpinnings in medical sociology. It is a globally renowned source and reference for those interested in social dimensions of health and illness. The presentation is enriched with explanatory and illustrative styles. The design and illustration of details will shift the minds of the readers from mere classroom discourse to societal context (the space of health issues), to consider the implications of those ideas in a way that could guide health interventions. The elemental strengths are the sociological illustrations from African context, rooted in deep cultural interpretations necessitated because Africa bears a greater brunt of health problems. More so, the classical and current epistemological and theoretical discourse presented in this book are indicative of core themes in medical sociology in particular, but cut across a multidisciplinary realm including health social sciences (e.g., medical anthropology, health psychology, medical demography, medical geography and health economics) and health studies (medicine, public health, epidemiology, bioethics and medical humanities) in general. Therefore, apart from the book's relevance as a teaching text of medical sociology for academics, it is also meant for students at various levels and all health professionals who require a deeper understanding of social dimensions of health and illness (with illustrations from the African context) and sociological contributions to health studies in general.

Plants and People

Written by one of the prominent scholars in the field and recent inductee of The National Academy of Sciences, this concise, up-to-date introduction to general anthropology carefully balances coverage of core topics and contemporary changes in the field. Since no single or monolithic theoretical perspective orients this book, instructors with a wide range of views and approaches can use it effectively. The combination of brevity and readability make *Window on Humanity* a perfect match for general anthropology courses that use readings or ethnographies along with a main text.

Cultural Anthropology

Window on Humanity: A Concise Introduction to Anthropology

This volume is not simply another general theory of world system. It is a theoretically and ethnographically informed collection of essays which opens up new questions through an examination of concrete cases, covering global and local questions of political economy.

Culture Sketches

This volume presents new theoretical approaches, methodologies, subject pools, and topics in the field of environmental anthropology. Environmental anthropologists are increasingly focusing on self-reflection - not just on themselves and their impacts on environmental research, but also on the reflexive qualities of their subjects, and the extent to which these individuals are questioning their own environmental behavior. Here, contributors confront the very notion of "natural resources" in granting non-human species their subjectivity and arguing for deeper understanding of "nature," and "wilderness" beyond the label of "ecosystem services." By engaging in interdisciplinary efforts, these anthropologists present new ways for their colleagues, subjects, peers and communities to understand the causes of, and alternatives to environmental destruction. This book demonstrates that environmental anthropology has moved beyond the construction of rural, small group theory, entering into a mode of solution-based methodologies and interdisciplinary theories for understanding human-environmental interactions. It is focused on post-rural existence, health and environmental risk assessment, on the realm of alternative actions, and emphasizes the necessary steps towards preventing environmental crisis.

Medical Sociology in Africa

McGraw-Hill conducted extensive research to gain insight into students' study behavior and instructor needs. We learned that students want visual appeal and content designed according to the way they learn, while instructors need a way to engage their students without compromising on high quality content. From this, we created the M Series (a series of magazine style textbooks). CULTURE is the latest addition to the series. This new magazine style text for the Introduction to Cultural Anthropology course offers solid scholarly content and an engaging design that will captivate your students. Through memorable eye-catching pedagogical features, students develop a better understanding of the material and will retain a greater amount of course concepts. This book presents cultural anthropology in a way that is both captivating and relevant to today's student at a price that they prefer. More current, more portable, more captivating, plus a rigorous and innovative research foundation adds up to: more learning. When you meet students where they are, you can take them where you want them to be.

The American System of Criminal Justice

Mirror for Humanity

The Handbook of Methods in Cultural Anthropology, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. Avoiding divisive debates over science and humanism, the contributors draw upon both traditions to explore fieldwork in practice. The second edition also reflects major developments of the past decade, including: the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research, from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. Considered discussion of ethics, epistemology, and the presentation of research results to diverse audiences round out the volume. The result is an essential guide for all scholars, professionals, and advanced students who employ fieldwork.

Anthropology For Dummies

The availability of research methodologies and frameworks to facilitate different ways of gathering knowledge and performing research is often a matter of concern for early career researchers as well as advanced research scholars. Positioning Research, while identifying this gap, provides avenues that encompass differing cultural backgrounds and disciplines to enable exploration of research frameworks and shifting paradigms, considering the impact of social media and new forms of knowledge that assist real-time, global distribution of research. The book highlights the possibilities of transition into 'the third space', where negotiation and dialogue are central to positioning research. It upholds the principle that different research methodologies are equally valid and valued in contributing to new knowledge. The book focuses on the contexts in which research questions are conceptualised and designed, and highlights the implications of research for the various partners and communities that participate in the research. It thus provides a cutting-edge framework for conducting multidisciplinary research.

Race and Ethnic Relations on Campus: Understanding, Empowerment, and Solutions for College Students

How modern philosophers use and perpetuate myths about prehistory
The state of nature, the origin of property, the origin of government, the primordial nature of inequality and war why do political philosophers talk so much about the Stone Age?

And are they talking about a Stone Age that really happened, or is it just a convenient thought experiment to illustrate their points? Karl Widerquist and Grant S. McCall take a philosophical look at the origin of civilisation, examining political theories to show how claims about prehistory are used. Drawing on the best available evidence from archaeology and anthropology, they show that much of what we think we know about human origins comes from philosophers' imagination, not scientific investigation.

Key Features

- Shows how modern political theories employ ambiguous factual claims about prehistory
- Brings archaeological and anthropological evidence to bear on those claims
- Tells the story of human origins in a way that reveals many commonly held misconceptions

Prehistoric Myths in Modern Political Philosophy

Drawing on Kent Flannery's forty years of cross-cultural research in the area, the contributors to this collection reflect the current diversity of contemporary approaches to the study of cultural evolutionary processes. Collectively the volume expresses the richness of the issues being investigated by comparative theorists interested in long-term change, as well as the wide variety of data, approaches, and ideas that researchers are employing to examine these questions.
