How Not to be Wrong

Despite the global spread of Western medical practice, traditional doctors still thrive in the modern world. In *Recipes for Immortality*, Richard Weiss illuminates their continued success by examining the ways in which siddha medical practitioners in Tamil South India win the trust and patronage of patients. While biomedicine might alleviate a patient's physical

distress, siddha doctors offer their clientele much more: affiliation to a timeless and pure community, the fantasy of a Tamil utopia, and even the prospect of immortality. They speak of a golden age of Tamil civilization and of traditional medicine, drawing on broader revivalist formulations of a pure and ancient Tamil community. Weiss analyzes the success of siddha doctors, focusing on how they have successfully garnered authority and credibility. While shedding light on their lives, vocations, and aspirations, Weiss also documents the challenges that siddha doctors face in the modern world, both from a biomedical system that claims universal efficacy, and also from the rival traditional medicine, ayurveda, which is promoted as the national medicine of an autonomous Indian state. Drawing on ethnographic data; premodern Tamil texts on medicine, alchemy, and yoga; government archival resources; college textbooks; and popular literature on siddha medicine and on the siddhar yogis, he presents an in-depth study of this traditional system of knowledge, which serves the medical needs of millions of Indians. Weiss concludes with a look at traditional medicine at large, and demonstrates that siddha doctors, despite recent trends toward globalization and biomedicine, reflect the wider political and religious dimensions of medical discourse in our modern world. Recipes for Immortality proves that medical authority is based not only on physical effectiveness, but also on imaginative processes that relate to personal and social identities, conceptions of history, secrecy, loss, and utopian promise.

This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine

guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

Everybody knows the legend of Captain Kidd, America's most ruthless buccanneer. Few people realize that the facts of his life make for a much better tale. Kidd was actually a tough New York sea captain hired to chase pirates, a married war hero whose secret mission took a spectacularly bad turn. This harrowing tale traces Kidd's voyages in the 1690s from his home near Wall Street to Whitehall Palace in London, from the ports of the Caribbean to a secret pirate paradise off Madagascar. Author Richard Zacks, during his research, also unearthed the story of a long forgotten rogue named Robert Culliford, who dogged Kidd and led Kidd's crew to mutiny not once but twice. The lives of Kidd and Culliford play out like an unscripted duel: one man would hang in the harbor, the other would walk away with the treasure. Filled with superb writing and impeccable research, *The Pirate Hunter* is both a masterpiece of historical detective work and a ripping good yarn, and it delivers something rare: an authentic pirate story for grown-ups.

Every vine has a story, and nearly four hundred years ago, New Mexico's wine journey began when the first Mission grapes were planted in 1629. Taste this rich legacy, the oldest in the United States, in Donna Blake Birchell's account of the turmoil and triumph that shaped today's burgeoning industry. Despite greedy Spanish monarchs, prim teetotalers and the one-hundred-year flood's gift of root rot and alkaline deposits, New Mexico winemakers continue to harvest the fruits of sun-soaked volcanic soils and clear skies, blending their family stories with the vines and traditions of the Old World. Raise a toast and join Birchell on the trail of New Mexico's enchanted wines as she explores the heritage of more than fifty wineries in four distinct wine-growing regions.

This book examines campus climate data collected from undergraduates at several large, public research universities across the nation to enhance understanding of the long-term impact of campus climate on student success. Many universities have refocused their attention and energy on campus climate, defined in this volume as students' perceptions of how welcoming and respectful their campus environments are for students from different social identities. As structural diversity continues to grow more complex on college campuses around the nation, campus leaders have begun to take more steps to understand campus climate and address persistent inequalities, acts of discrimination, and violence against students from diverse backgrounds. The authors in this volume address initiatives to improve campus climate and provide empirical evidence on the effectiveness of those programs.

This cookbook was written for all the dogs who rely on their master for all their needs and ask nothing in return. Good nutrition is as important to your dog as it is to you. Cancer is the leading cause of death in dogs and cats today, so the food they ingest is paramount to their health, as well as exercise and annual visits to the veterinarian. This cookbook was written to have fun in the kitchen cooking delicious recipes that your dog will love. He will probably join you in the kitchen when he starts to know that the aroma of good food is for him. P.J.'s Bichon Frise lived to be 22 years old and spunky to the end of her life. P.J. attributes her Bichon Frise's excellent health to the meals she cooked for her, long before the pet food recall scare. You have control of all the ingredients your dog eats. If your dog had to cook for you, don't you think it would give you the best possible food to keep you healthy and living longer? You bet they would. Do you feed your dog the same thing, day after day, week after week? Yuk. This cookbook will get you out of this rut and you will see a happier and healthier dog if you start cooking these easy and fun recipes. The book is also filled with fun facts, dog jokes, dog sayings, astrology, dog breeds, and trivia to make this cookbook a must

for you to have. A portion of the proceeds of this book will be donated to the Cancer Society for Animals.

In the suspenseful new thriller from New York Times bestselling coauthors Sherrilyn Kenyon and Dianna Love, a Bureau of American Defense agent must join forces with an informant he can neither trust nor resist. Bureau of American Defense operative Carlos Delgado has spent the past sixteen years watching over his shoulder, waiting for death to catch up to him. His luck runs out when BAD intercepts an

unexpected tip on the number one threat to United States security: the Fratelli de il Sovrano. Their best hope for uncovering a deadly plan that risks countless lives and threatens economic chaos just days before the presidential election is to capture a mysterious informant known as Mirage. But when Carlos takes her into custody, Mirage is not at all what he expected -- and neither is the threat she poses to the secrets he would die to protect. Gabrielle Saxe has hidden from a killer for the past decade, sending anonymous tips on international criminals to intelligence agencies around the world. When a postcard arrives from a friend who is supposed to be dead, she takes a risk that catapults her into the midst of dangerous operatives on a treacherous mission -- and into the arms of a man who is duty-bound to surrender her to Interpol as an international felon. Carlos is the last person Gabrielle should trust and the only one standing between her and death. But little does she know, she holds the key to his survival as well.

This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-

published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and gasification. Research has been included from around the world, representing potential international solutions to what are global challenges, as well as crucial implications for ongoing research in this important field of study.
