The primary skill needed by anyone who works in fashion is the ability to convey—to clients and the general public alike—images of the designs. The impression given to the viewer depends on whether the fashion design drawings are good. Contemporary Fashion Illustration Techniques thoroughly describes the basics of fashion illustration, and covers the latest trends such as vivid images, sprightly movement, and garment material texture. After all, fashion drawing is not simply about sketching a body and face; only when you accurately reproduce the garments and their colors can the designs truly come to life.

Ford's 351 Cleveland was designed to be a 'mid-sized' V-8 engine, and was developed for higher performance use upon its launch in late 1969 for the 1970 models. This unique design proved itself under the hood of Ford's Mustang, among other high performance cars. The Cleveland engine addressed the major shortcoming of the Windsor engines that preceded it, namely cylinder head air flow. The Windsor engines just couldn't be built at the time to compete effectively with the strongest GM and Mopar small blocks offerings, and the Cleveland engine was the answer to that problem. Unfortunately, the Cleveland engine was introduced at the end of Detroit's muscle car era, and the engine, in pure Cleveland form, was very short lived. It did continue on as a low compression passenger car and truck engine in the form of the 351M and 400M, which in their day, offered little in the way of excitement. Renewed enthusiasm in this engine has spawned an influx of top-quality new components that make building or modifying these engines affordable. This new book reviews the history and variations of the 351 Cleveland and Ford's related engines, the 351M and 400M. Basic dimensions and specifications of each engine, along with tips for identifying both design differences and casting number(s) are shown. In addition to this, each engine's strong points and areas of concern are described in detail. Written with high performance in mind, both traditional power tricks and methods to increase efficiency of these specific engines are shared. With the influx of aftermarket parts, especially excellent cylinder heads, the 351 Cleveland as well as the 351M and 400M cousins are now seen as great engines to build. This book will walk you through everything you need to know to build a great street or competition engine based in the 351 Cleveland platform.

Orphaned at the age of four, Drucilla finally has a place she can call home with her new family, the Putnams, of Salem Village. But when a new reverend and his family move into town with their servant Tituba, life takes a strange and dangerous turn as accusations of witchcraft swirl. Dru is overwhelmed by the fervor of lies and the power of groupthink among the other girls in town; reluctant to turn her back on the Putnams, she utters her own accusations. Only her best friend Gabe sees through the deceit, but it may be too late for Dru to protect the truth, and innocent people will pay the ultimate price. Guiding readers through the confusion of this frightening historical event, Anna Myers weaves a compelling story that will captivate teen readers.

Time of the Witches

A fresh and vigorous appreciation of the intellectual liberation and artistic triumphs of the Italian Renaissance. The development of the first universities from the 12th century onwards, growing wealth and patronage in certain cities, and above all the invention of printing and cheap paper, provided essential conditions for the Renaissance. And it was in literature and scholarship that it began, in the rebirth of classical culture that loosened the Church's iron grip on visual art. Paul Johnson tells the story, in turn, of Renaissance literature, sculpture, building and painting. Despite the critical importance of inventions outside Italy - printing in Germany and oil painting in Holland - he locates the Renaissance firmly in Italy and in Florence above all, between 1400 and 1560. There are memorable sketches of the key figures - the frugal and shockingly original Donatello, the awesome Michelangelo, the delicacy of Giovanni Bellini. The final part of the book charts the spread and decline of the Renaissance, as the Catholic Church repositioned itself to counter the Reformation which the Renaissance had itself helped to produce.

Kora Adams did not believe in curses, but she had known nothing but bad luck all her life. Then, one night, there was a knock on her door. It was a handsome but solemn stranger with a story to tell. Winter McQuillen had inherited a sprawling Texas ranch not far from the one room cabin Kora called home. But the only way he could claim it was if he found a wife that night. Winter had but one question for Kora: Would she marry him? The thought of wedding a man she did not know scared Kora to death. But the security of marriage, and even the faintest hope of love, was like a dream come true. Kora knew she needed every bit of comfort marriage would provide. What she didn't know was that Winter needed her even more.
