The Corvette Hunter

FROM BOY TO MAN, ONE PUNCH AT A TIME Eighteen-year-old Peter Woods home life is a battleground. He hates his stepfather, whose vicious comments open new wounds every day. He hates his mother for marrying the guy. And his half-siblings heap even more misery on him at every turn. Tormented and lonely, Peter decides to start fighting back literally at a crumbling local gym. Soon boxing becomes a personal ritual. His raging self-hatred makes him train that much harder. His fear of failure gives way to an animalistic intensity. Confessions of a Fighter is Peter's riveting autobiography of his journey from underdog to hero. In this poignant psychological drama, the author finally ascends after five grueling, heart stopping qualifying bouts to the finals of the New York Golden Gloves Championships. It is there, under the blinding lights of Madison Square Garden and facing tens of thousands of frenzied spectators, that Peter realizes what truly constitutes the measure of a man.

A fascinating insight into the production and career of the MGC GTS lightweights, this well-researched text is generously illustrated with rare photographs, race programs, and original artwork. In early 1968 a works competition MGC GTS scored the MG Car Company's best ever result at the Sebring 12-hour race, finishing in tenth position. Buoyed by this success a second car was built, with both entered on the Marathon de la Route but without success. Closure of MG Competitions Department at Abingdon was not far off, however the team gallantly prepared both cars for their final race in 1969. Under the banner of the American importer the newer car finished in fifteenth position. The MGC GTS Lightweights covers the development of the production road car, its conception, compromised design and subsequent failure to attract loyal MG customers. This is followed by an in-depth technical analysis of the development, construction and build of the MGC GTS. Specific attention is given to the specialised components utilised, particular emphasis placed on the unique aluminium bodyshell that for the first time is laid bare. The competition history and race results are comprehensively covered, and lastly the subsequent fall from grace and rediscovery of these last and much loved MG competition cars to emerge from Abingdon.

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. Published to mark the 80th birthday of Sir Stirling Moss OBE, this important book tells the story of each of the 529 races in which he took part, from the start of his racing life in 1947 to his career-ending crash at Goodwood in 1962. Told in Sir Stirling's own words, this book is packed with detail and anecdote, supported by a wealth of photographs - many previously unpublished - that show all the greatest moments and the extraordinary variety of cars he drove. This will be a book to treasure.

How do we define taste? The only certainty is that it shifts and changes - sometimes abruptly. With the explosion of vulgar consumerism in the mid-nineteenth century, the Victorians seized upon the notion of good taste as a way of codifying middle-class mores. A century later, to talk about taste had become almost taboo, since judgments made about dress, manners, food and art can often be painfully revealing. And today? When this classic text was first published in 1991, Stephen Bayley illuminated the nuances and niceties of our mercurial understanding of taste. In this new edition, he ranges far and wide to bring us exquisitely up to date. Path of the Assassin

By the time the Third Reich collapsed in 1945, the Messerschmitt firm had produced some 34,000 examples of the legendary Bf 109, making it the most prolific aircraft of the era. Key to this tremendous output and to the plane's longevity was a simple design that allowed rapid production--even by unskilled Zwangsarbeiter (forced laborers)--and gave Messerschmitt an advantage over the Focke Wulf Fw 190. The Nazis came to power in January 1933 intent on scrapping the Versailles Treaty that banned Germany from having an air force. Issued on February 15, 1934, the request by the new Reichsluftfahrtministerium (RLM/Air Ministry) for a single-seat daytime air combat fighter with a top speed of 400 km/h brought a new lease of life to the financially strapped Bayerische Flugzeugwerke AG (BFW). BFW began work on the plane, its first military aircraft, that December,

and in May 1935 the Bf 109 V1 prototype took to the air--10 months before the first Spitfire--launching the career of an iconic plane whose numerous versions would serve the Reich until the end of World War II. The Bf 109 B-1 with a two-blade propeller was the first variant to be mass produced and the first to see combat. Jagdgruppe 88 of the Legion Condor, serving Francisco Franco's Nationalists in Spain, took delivery of its first Bf 109 B-1 aircraft in May 1937. The 39 Messerschmitts went on to play a significant role in the Spanish Civil War. Other variants followed in short order. The Bf 109 C introduced wing armament to the craft. The Bf 109 D filled out Switzerland's air force. With their new three-bladed propeller, the 4,000 "Emils" (Bf 109 E) that rolled out between November 1938 and March 1939 formed the backbone of the Luftwaffe's fighter fleet during the first third of the Second World War. The fighter got a power boost when the "Gustav" (Bf 109 G) came out with the addition of the new Daimler Benz DB 605 A engine. The Luftwaffe began receiving the Bf 109 G in the summer of 1942 and output of the Gustav continued until January 1945. In October 1944, delivery to combat units began of the Bf 109 K-4, a version intended to bridge the gap, pending mass production of the Messerschmitt Me 262 A jet fighter.

Grand Prix Bugatti

The Grand Prix Bugatti has a strong claim to a book all of its own, with its enviable record of racing successes, its superb craftsmanship and, for the more mechanically minded, the great variety of its ingenious design features unique to the creations of the great artist designer, Ettore Bugatti. This book is devoted to the racing Types 35, 37, 43 and 51, in their various forms, and describes their anatomy in detail and their racing achievements. A schedule of individual models, in chassis number order, gives type number, factory date, brief history and, where known, the present owner; the appendices include tabulated specifications of the types. Bugatti owners will also find much practical information to help them maintain their historic racing cars.

Derek Bell's name became inextricably linked with that of Porsche during his long and hugely successful career as a racing driver. In this new 276-page book, Bell collaborates with renowned motorsport author Richard Heseltine to give the reader a very personal insight into his experiences racing for the legendary German marque. The approach taken by this latest publication from Porter Press International is to look at every race Bell drove for Porsche, in detail and with revealing comments from the book's subject. Light is cast on Bell's most prestigious victories with Porsche - four of his five in the Le Mans 24 Hours, three in the Daytona 24 Hours, two in the World Sportscar Championship - and many more besides. Bell describes the Porsches he raced, from the fearsome 917 to the iconic 956, 962, and 911. And he shares his thoughts on the now-legendary drivers he raced with, including six-time Le Mans winner Jacky Ickx, the famously flamboyant Hans Stuck, and two immense talents who lost their lives to the sport, Jo Siffert and Stefan Bellof. The overall effect is a fascinating trip back in time to a golden era for Porsche and sports car racing as a whole.

Global production and purchasing operations create a platform for entry into new markets. However, it takes considerable effort to plan and implement a sustainable globalization strategy; this book will help in that task. The wealth of experience and analysis featured in this book is the result of an extensive survey among leading manufacturing companies as well as countless discussions with executives who have personally wrestled with the issues of "going global." The book treats the whole range of management challenges. In breadth and depth, the insights it offers surpass what a manager or most individual companies could acquire on their own.

In the 1720s and 1730s, Jean-Baptiste Oudry established himself as the preeminent painter in France of hunts, animals, still lifes, and landscapes. Oudry's Painted Menagerie focuses on a suite of eleven life-size portraits of exotic animals from the royal menagerie at Versailles, painted by Oudry between 1739 and 1752. These paintings eventually found their way into the ducal collection in Schwerin, Germany. Among them is the magnificent portrait of Clara, an Indian rhinoceros who became a celebrity in mid-eighteenth-century Europe. Her portrait has been

out of public view for more than a century, and it is presented here in its newly conserved state.

It's hard to imagine that a car with the racing pedigree of the Rebel Corvette could be neglected to the point of it being lost. Winning the GT class at the 1972 12 Hours of Sebring wasn't enough to keep this car from becoming just another old wreck out behind the shed. It was many years before Kevin Mackay came to rescue this prominent machine. Finding, documenting, restoring, and selling rare and valuable Corvettes is one of Mackay's specialties. His business, Corvette Repair Inc., is considered the premier Corvette restoration facility in the country. However, it just wasn't the Rebel L88 Corvette that he found and restored. Mackay tells story after story of finding and restoring valuable Corvettes such as the 1960 Briggs Cunningham Le Mans racer that took 1st in class. He also tells stories of Steve McQueen's 1966 Corvette, the 1967 Bounty Hunter racer, 1968 Sunray DX #2 and #3, and chassis #003 from 1953. If you like L88 Corvettes, no one has bought and restored more of them than Kevin Mackay! Few authorities in the hobby could be counted on to provide this much entertainment in a single volume.

The Decades of the Newe Worlde Or West India

The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed. Be it OEMs developing new models, suppliers integerating themselves deeper into the development processes of different OEMs, analysts estimating economical risks and opportunities of automotive investments, or even governments creating and evaluating scenarios for financial aid for suffering automotive companies: At the end of the day, it is absolutely indispensable to comprehensively understand the processes of automotive development – the core subject of this book. Let’s face it: More than a century after Carl Benz, Wilhelm Maybach and Gottlieb Daimler developed and produced their first motor vehicles, the overall concept of passenger cars has not changed much. Even though components have been considerably optimized since then, motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road s- face via gearboxes, transmission shafts and wheels, which together with sprin- damper units allow driving stability and ride

comfort. Vehicles are still navigated by means of a steering wheel that turns the front wheels, and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat.

This Congressional Budget Office (CBO) study examines the scope and intensity of

consumers responses to the upward trend in gasoline prices that began in 2003. Those responses have been large enough to interrupt a pattern of steady growth in total gasoline consumption dating back to 1990, the last time U.S. gasoline prices rose substantially. If current high prices and consumers responses to them persist, the effect on overall gasoline consumption will grow stronger as older, less-fuel efficient vehicles are retired and as consumers consider other, less easily implemented adjustments to their patterns of consumption.

Initially dominated by simple renditions of East Coast architecture, Milwaukee developed from three pioneer settlements, those of Solomon Juneau, Byron Kilbourn, and George Walker—three hubs from which three villages radiated outward into one city. Following the Civil War, Milwaukee’s growth at the onset of the Industrial Era afforded the city a fanciful array of Victorian streetscapes. The 1890s followed with an era of ethnic architecture in which bold interpretations of German Renaissance Revival and Baroque designs paid homage to Milwaukee’s overwhelming German population. At the turn of the century, Milwaukee’s proximity to Chicago influenced the streetscape with classicized civic structures and skyscrapers designed by Chicago architects. World War I and the ensuing anti-German sentiment, as well as Prohibition, inevitably had adverse effects on “Brew City.” By the 1920s, Milwaukee’s architecture had assimilated to the national

aesthetic, suburban development was on the rise, and architectural growth would soon be stunted by the Great Depression.
