Sports law has been growing with increasing rapidity over the years since the first edition of this book was published in 1999, regularly making headlines as well as leading to a developing body of law practised by specialist lawyers. This revised work, by leading practitioners in the field, with a foreword by Lord Coe, provides a coherent framework for understanding the principles of sports law in this area, as well as a deep analysis of its key features. The subject is split into various areas of practice: first, regulatory rules, which embrace the constitutional aspect of

organised sport, including the disciplinary procedures of the various governing organisations; second, broadcasting and marketing resulting from the commercial exploitation, including sponsorship, of sports clubs, sporting events and players; and third, player's rights and obligations, which embraces a wide range of legal issues including club transfers and player contracts, and issues arising from employment (including discrimination law), personal injury and criminal law. Special attention is paid to the impact of EU and Human Rights law as well as to the influential jurisprudence of the Court of Arbitration for Sport. London 2012 provides an appropriate point at which to assess the current state of the law, as well as a look to the future. The target readership extends from solicitors, barristers and legal advisers, to sports organisations and clubs, corporations involved in marketing and sponsorship, media companies, academics teaching sports law, and sports administrators. "I commend it to everyone who has to administer sport as well as to those who have to advise the administrators or argue cases in the field on whatever side. It is a gold medal book." From the Foreword by Lord Coe KBE

Global Perspectives on Subsidiarity is the first book of its kind exclusively devoted to the principle of subsidiarity. It sheds new light on the principle and explores and develops the many applications of the principle of subsidiarity. The book provides a comprehensive overview of the principle in all its facets, from its philosophical origins in the writings of Aristotle and Aquinas, to its development in Catholic social doctrine, and its emergence as a key principle in European Union Law. This book explores the relationship between subsidiarity and concepts such as sphere sovereignty and social pluralism. It analyses subsidiarity in light of globalisation, federalism, democracy, individual rights and welfare, and discusses subsidiarity

and the Australian, Brazilian and German Constitutions.

This twentieth revised edition brings the text up-to-date prior to the new edition scheduled for 1996. The substantial changes to industrial law effected by the coming into operation of the Commonwealth Industrial Relations Reform Act 1993 are part of the need for this revision. As a result the chapter on Law of Employment and Industrial Relations has been completely rewritten to cover the major changes which have taken place in the last 12 months. The five parts to the text are: an introduction to the Australian legal system, the law of contract, commercial

transactions, business organisations, and allied areas of the law. Includes a table of cases, a glossary and an index.

This book provides a comprehensive Australian perspective on the resolution of resources disputes. In particular, it focuses on the use of arbitration, mediation and adjudication in the resources sector. It concentrates on arbitration as the preferred method of dispute resolution, including international commercial and investor-state arbitration. The book offers fascinating insights into the use of arbitration to investment disputes involving resources companies in the African OHADA countries, Australia and other countries. It offers an Australian perspective which will be useful to discerning arbitration scholars and dispute resolvers. In addition, the book provides useful information on how to draft arbitration clauses for

resources sector contracts. This publication will be of interest to members of the academic research community and will also appeal to dispute resolution professionals and practitioners.

The Risk of Investment Products

Current Law Index

In the aftermath of the financial crisis of 2008, many financial institutions have been exploring new methods to measure investment product risk. Lawmakers have been developing new rules that protect investors better than before. The purpose is to mitigate the risk of financial institutions that distribute investment products to their clients. This book presents professional views on investment product risk and analyzes complex investment product risk from various perspectives. Contributed by lawyers, risk managers, IT engineers and scholars, this book is an essential-read for financial regulators, bankers, investment advisors, financial engineers, risk managers, students and researchers.

Concise Australian Commercial Law, now in its fifth edition, has two basic objectives: to provide students with a general understanding of the legal environment of business and to expose them to the language and perspectives of legal professionals, regulators and other commercial actors; and to provide a reference point for non-law students studying key commercial law topics - the law of contract, torts, consumer protection, agency, business organisations and business ethics - in a way that is clear, accessible and challenging for a non-law student. The authors have selected cases that should be of interest to non-law students and every effort has been made to ensure that the case extracts contain sufficient information to enable students to discuss and debate the decisions that a court has reached and appreciate how the principles could be applied in a commercial environment. Similarly the relevant legislation is discussed in a way that is designed to promote understanding of the law and the policy considerations behind the legislation. The fifth edition been updated to incorporate the many legislative changes and case law developments since the last edition. These updates include: a revised introduction (including a guide on how to approach the study of commercial law); a number of new contract law cases and an expanded section on online contracting; amendments to the Australian Consumer Law as well as a number of interesting new cases concerning consumer protection; case law developments in relation to the standard of care and causation in negligence; the

recent 'safe harbour' amendments to the Corporations Act and a number of new cases dealing with directors' duties: and revisions to the chapter on Business Ethics to include references to the Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry (the Banking Royal Commission). To ensure the text is a more complete teaching and learning package, there is a revised set of activities at the end of each chapter that have been written with the non-law student in mind and can readily be used in a student-centred group work environment.
