English for Environmental Science in Higher Education Studies The Garnet Education English for Specific Academic Purposes series won the Duke of Edinburgh English Speaking Union English Language Book Award in 2009. English for Environmental Science is a skills-based course designed specifically for students of environmental science who are about to enter English-medium tertiary level studies. It provides carefully graded practice and progressions in the key academic skills that all students need, such as listening to lectures and speaking in seminars. It also equips students with the specialist language they need to participate successfully within an environmental science department. Extensive listening exercises come from environmental science lectures, and all reading texts are taken from the same field of study. There is also a focus throughout on the key environmental science vocabulary that students will need. Listening: how to understand and take effective notes on extended lectures, including how to follow the argument and identify the speaker's point of view. Speaking: how to participate effectively in a variety of realistic situations, from seminars to presentations, including how to develop an argument and use stance markers. Reading: how to understand a wide range of texts, from academic textbooks to Internet articles, including how to analyze complex sentences and identify such things as the writer's stance. Writing: how to produce coherent and well-structured assignments, including such skills as paraphrasing and the use of the appropriate academic phrases. Vocabulary: a wide range of activities to develop students' knowledge and use of key vocabulary, both in the field of environmental science and of academic study in general. Vocabulary and Skills banks: a reference source to provide students with revision of the key words and phrases and skills presented in each unit. Full transcripts of all listening exercises. The Garnet English for Specific Academic Purposes series covers a range of academic subjects. All titles present the same skills and vocabulary points. Teachers can therefore deal with a range of ESAP courses

at the same time, knowing that each subject title will focus on the same key skills and follow the same structure. Key Features Systematic approach to developing academic skills through relevant content. Have You Seen Zandile?

Have You Seen Zandile? is a wonderful South African resource, still as fresh and absorbing as when it was first written. Perfectly scripted, and with Gcina Mhlophe's sure instinct for stagecraft, it recounts the very personal story of Zandile, who is snatched away from her grandmother's loving care and taken to live with her matriarchal family in rural Transkei. Moving, funny and convincing, full of Zandile's shrewd, youthful insights, the play offers an illuminating window into the 1960s world that it depicts, with its issues of white dominance, rural hardship and black female repression. Have You Seen Zandile? is already an established favorite in performance circles, and is fast becoming a South African classic.

The ESL Teacher's Book of Lists

After 'Hit Man' The New York Times bestseller Confessions of an Economic Hit Man documents John Perkins' extraordinary career as a globe-trotting economic hit man. Perkins' insider's view leads him to crisis of conscience--to the realization that he must devote himself to work which will foster a world-wide awareness of the sanctity of indigenous peoples, their cultures, and their environments. Perkins' books demonstrate how the age-old shamanic techniques of some of the world's most primitive peoples have sparked a revolution in modern concepts about healing, the subconscious, and the powers each of us has to alter individual and communal reality. Many indigenous cultures practice shapeshifting. Native American hunters take on the spirit of their prey to ensure a successful hunt; Asian medicine men "ingest" a sickness to heal the one afflicted; Amazon warriors become jaguars to soundlessly travel the jungle. Those who shapeshift understand that all of life is energy and that by focusing your intent you can change energetic patterns, rendering a new form. Shapeshifting can occur on three levels: cellular--transforming from human to plant or animal; personal--becoming a new self or leaving an addiction behind; and institutional--creating a new business or cultural identity. Since 1968, master shamans in Africa, Asia, the Middle East, and the Americas have been training John Perkins to teach the industrial world about the powerful techniques involved in shapeshifting. His groundbreaking book takes you to deserts and jungles, mountains and oceans, medical research centers and corporate board rooms to learn the step-by-step methods of this practice that integrates ancient and modern techniques to bring about profound healing.
