### **Alphabetical Finding List**

### **American Book Publishing Record Cumulative, 1950-1977: Title index**

Convenient subject access to all the microform publications listed in the Guide to Microforms in Print is provided in this companion reference. Titles are categorized under ten main classes and 400 subheadings based on the Dewey Decimal System, with modified sections that offer improved indexing of topics such as religion, language/linguistics, geography/ history, and more. A recently added Person-As-Subject Index helps users find titles and collections dealing with specific individuals. Individuals included in microform collections are also listed.

## **Manual of Neonatal Care**

This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

### **The Stereophile**

### **High Fidelity**

Geologists warned it was inevitable that an earthquake would collapse the Three Gorges Dam. When it finally did, a wall of water six hundred feet high rushed down the Yangtze River, destroying other dams as it went. Fifteen million Chinese died in the worst natural disaster in human history. This is what people are told. It is a lie. Kimberly Trayne has no time for the past. She's a free woman now. There are family reunions to avoid, realm championships to win, and an AI-human hybrid in her life. Or not. It's complicated. What she needs most of all is a vacation. Kim's heard about those; they sound nice. When Mike mentions he has family--of a sort--in China, she even has a destination. What she doesn't know is that behind the Great Firewall of China there are secrets. Secrets about who lives there. Secrets about who dies. Secrets of power and control. Secrets people will kill to keep. Stuff happens, they say. Even after flying halfway around the world, it still keeps happening to her.
