Pharmaceutical Journal;

Recent forms of realism in continental philosophy that are habitually subsumed under the category of "speculative realism," a denomination referring to rather heterogeneous strands of philosophy, bringing together object-oriented ontology (OOO), non-standard philosophy (or non-philosophy), the speculative realist ideas of Quentin Meillassoux and Marxism, have provided grounds for the much needed critique of culturalism in gender theory, and the authority with which post-structuralism has dominated feminist theory for decades. This publication aims to bring forth some of the feminist debates prompted by the so-called "speculative turn," while demonstrating that there has never been a niche of "speculative realist feminism." Whereas most of the contributions featured in this collection provide a theoretical approach invoking the necessity of foregrounding new forms of realism for a "feminism beyond gender as culture," some of the essays tackle OOO only to invite a feminist critical challenge to its paradigm, while others refer to some extent to non-philosophy or the new materialisms but are not reducible to either of the two. We have invited essays from intellectual milieus outside the Anglo-Saxon academic center, bringing together authors from Serbia, Slovenia, France, Ireland, the UK, and Canada, aiming to promote feminist internationalism (rather than a "generous act of cultural inclusion").

Landmarks of Tomorrow forecasts changes in three major areas of human life and experience. The first part of the book treats the philosophical shift from a Cartesian universe of mechanical cause to a new universe of pattern, purpose, and process. Drucker discusses the power to organize men of knowledge and high skill for joint effort and performance as a key component of this change. The second part of the book sketches four realities that challenge the people of the free world: an educated society, economic development, the decline of government, and the collapse of Eastern culture. The final section of the book is concerned with the spiritual reality of human existence. These are seen as basic elements in late twentieth-century society. In his new introduction, Peter Drucker revisits the main findings of Landmarks of Tomorrow and assesses their validity in relation to today's concerns. It is a book that will be of interest to sociologists, economists, and political theorists.
