The lowdown on long-term care?from a geriatric specialist with over twenty years in the field. Placing loved ones in nursing homes or other long-term care facilities is a stressful decision?and for good reason. In previous decades, some homes were plagued by scandal, and everyone wants to know that their family members will be safe and sound even when they can?t be nearby all the time. Here, prominent geriatrician Joshua Schor, M.D., guides the reader through this emotionally challenging process step by step, covering such topics as: ? The small?and revealing?details to watch for when touring a home ? Determining whether a family member needs long-term or sub-acute care ? Deciding whether assisted living may be a viable alternative ? Questions to ask about medications, meals, and activities ? Knowing your rights and getting the information you need ? Special concerns for younger patients ? And more

A new and innovative approach to both designing and analyzing proposed and existing facilities for ADAAG compliance. With its emphasis on physical accessibility, the Americans with Disabilities Act Accessibility Guidelines (ADAAG) have far-reaching implications for the design or renovation of virtually all public-use buildings and sites in the United States. Yet there has been little guidance on how to design and review the drawings and specifications of an existing or proposed facility to assess its ADAAG compliance. This invaluable reference provides such guidance at last for architects, interior designers, landscape architects, engineers, builders, planners, facilities managers, specification writers, construction code officials, teachers, and students, as well as individuals concerned with access issues. The authors present the ADAAG in an easily understandable format grouping ADAAG criteria into detailed checklists for specific interior and exterior spaces such as offices, classrooms, retail shops, restaurants, restrooms, and parking garages. This sensible approach makes the review process of any room, building, or site highly manageable. For additional convenience, the presentation parallels the design process from schematic design through construction documents, including detail, schedule, and specification review. Complete with review forms, checklists, graphics, and other information necessary to ensure ADAAG compliance, this thorough guide will prove invaluable to everyone involved with the design or retrofit of accessible buildings and sites.

"Cons" of dating a man in prison-The Grrl Genius Guide to Sex (With Other People) is hilarious and right on the money both as an instructional guide and an endearingly romantic story about a woman and her four best friends who form The Grrl Genius Club. Armed with the information from Cathryn's Wild Sexual Animal Kingdom research and her "Love is Important but Chocolate is Essential" Chocolate Fun Facts, her posse of Grrl Geniuses struggle with singlehood, married life, sexual preferences, widowhood, and friendship. Cathryn's journey veers from a "nails-on-chalkboard-scratchingly-awful" divorce and the botched kidnapping of her own dog, to pretending to be a lesbian, seeing her old lingerie sold on her old front lawn by her ex-husband's girlfriend, losing her job, and a tragic industrial accident-level bikini wax. And through everything, Cathryn searches for the answer to the most important relationship question of all: why are all the best men gay? If you've ever been tempted to have sex with another person, this is an essential read. If you've ever felt inadequate to a task or a failure at love or in any way anything less than a genius and you've sunk so low that even a new pair of cute shoes won't help, Cathryn Michon can show you the way to relationship happiness-all you have to do is learn from her very funny mistakes. However badly you think you've done anything, Cathryn has done it even worse, and reveals lessons learned in the wryly witty and devastatingly honest style that has made her the favorite of aspiring geniuses everywhere!

Home Business Big Business: The Definitive Guide to Starting and Operating On-Line and Traditional Home-Based Ventures

Tony Willard has been--amongst many other things in motor publishing motoring correspondent of the Birmingham Evening Mail and Editor of Automotive Management (now called AM)--the best read trade paper for the motor retail trade. There are now stacks of ways to buy cars in the UK. So many that it is really hard for consumers to know where to get best choice, best value, best service, best after-care, best credit or whatever it is that they prioritise. In addition to franchised dealers there are: manufacturers selling direct to the public; rental car companies doing the same; car-buying agents; car supermarkets; used car dealers; internet traders; importers; auctions; and personal shoppers. Most car buying guides concentrate on WHAT to buy whether it be new or used. This book covers that, but assumes the buyer knows roughly what he wants. What has been missing until now is a guide through the jungle of places and prices which tells you WHERE to buy and HOW to pay not a penny more than necessary.

Complete guide to home & auto burglar alarms

A concise and thoroughly practical guide to building and installing car alarms. The project-based approach makes this book ideal for students and hobbyists; design and installation engineers will also find it of interest. Every circuit in this book is clearly described and illustrated, and contains components that are easy to source. Advice and guidance are based on real experience, and the designs themselves have been rigorously put to use on some of the most car-crime-ridden streets in the world. The designs in this book include systems as simple as a warning beacon, a range of immobilisers, and a basic alarm system; and more advanced systems that include add-on features such as a personal attack button and a courtesy light delay. Intruder detectors are described, and full constructional details are given including a guide to fault diagnosis and step-by-step installation instructions.
