The 3rd Underground Shopper

The first edition of this book was written six years ago. Since then, there have been some significant developments in the area of car audio (and video). In addition, many of the products featured in the first edition are now obsolete. While the first edition of the book continues to sell, we have seen a bit of a slow-down at major accounts. This edition promises to be even more successful than the last. Car Stereo Cookbook, 2e is a completely revamped edition of a hugely successful title that continues to sell. This revised book will include new information on mobile video, satellite radio, mp3, wma, digital broadcast radio, and will eliminate the out-of-date products that are no longer pertinent.

Car and Driver

This guide can be used with almost any choice of radio station. The style of music is unimportant; rock, pop, rap, classical, jazz or anything else can be used. All you need is an imagination and a sense of humour, and of course, a radio tuned into your favourite station. The games are based around a simple 'radio truth' that your favourite station will regularly play your favourite records. Think about it. If you didn't like the music that was played you would quickly re-tune. How many times have you said to yourself 'wasn't that played this morning?' or 'that's the fifth time that's been on this week.' Using this fact this guide has created a range of predictive games to enhance your listening pleasure. Have fun!
