And more . . . The book features quick tips on key topics including networking, speaking engagements, and how to select a PR agency---should you choose to work with one. There is an old song that goes, "Look down, look down, that lonesome road, before you travel on." Facing that lonesome road, the adult might travel on. Often, the child can't. During her twenty-year career as a school social worker, Anne Stilwell worked with two thousand "problem" children. She and her husband, professional writer Hart Stilwell, present here twenty-one factual accounts of children who suffered rejection in the public schools. Some of the children in these accounts are unusually bright and some are mentally retarded. They are belligerent and destructive or withdrawn. They are from broken homes or happy homes, from the slums or Middle America. They are blacks, Chicanos, and Anglos. There is only one common denominator among these children—tragedy. Every classroom teacher will gain from this sympathetic evaluation of the problems faced by children in the public schools. No one who reads this book can remain unaware of major areas that call for deep concern on the part of educators and parents. The Stilwells have described school children and their problems and at the same time offered telling portraits of the families of which the youngsters are a part. In the struggle to see that the problem child has a chance to develop and advance within the limits of his or her ability, parents, teachers, administrators, and social workers must work together or all fail. When they fail, the child must walk alone. The authors' objective in presenting these cases is to show what has happened and does happen, and to encourage others to work for change. A prominent educator describes their account as "an exceptionally worthwhile teaching document—stimulating, touching, well written, and honest." While this book was originally written in 1972, the issue of rejection in the public schools is, sadly, still timely.

Demeter's search for Persephone, her daughter lost in the underworld, inspired the Eleusinian Mysteries, a nine day celebration so powerful and awe-inspiring much of it remains a secret to this day. Now, in a radical reimagining of this potent and ancient story, renowned novelist and mythologist Kim Antieau updates the tale for modern sensibilities through the life cycle of a most remarkable creature: the salmon. Salmon live in two worlds: salt water and fresh water. They are shapeshifters, transformers, and finally, pilgrims searching for home. Relying on ancient sources and modern speculation, Antieau writes about what happened during the nine day celebration of the Eleusinian Mysteries and offers a template for creating your own mysteries to celebrate and honor the cycles of Nature, your community, and your life. Godsmack's founder and front man Sully Erna has been immersed in the world of rock ever since he got his first drum set. Given his achievements, that early start might suggest that his career was a straight shot to the top. The truth is, Erna took

so many detours during the years between his first instrument and Godsmack's first contract that, more than once, he nearly forgot his destination. In *The Paths We Choose*, he relates the turbulent story of his life before the platinum albums and packed arenas. Sully's story shows us that whatever hardship we may face, ultimately, our choices determine our destiny. He's made the most of every advantage and obstacle he has faced, and reminds us that we can, too. For Sully, success is not an ultimate destination. Every day brings a new fork in the road, another path to choose

Reveling in every new experience--especially her attraction to a charismatic British physics professor--Gwen discovers that the ancient wonders around her are nothing compared to the renaissance unfolding within. . . Professor Lou Marinoff's first book drew on the wisdom of the great philosophers to solve our everyday problems, launching a movement that restored philosophy to what it once was: useful in all walks of life. Now, in *The Big Questions*, he takes the concept to the next level, applying centuries of philosophy and great literature to answer central questions of modern existence. Urging us not to accept victimhood as the by-product of modern life, Professor Marinoff uses specific case studies from his counseling practice to show how wisdom from the great thinkers can help us define our own philosophy, and thereby reclaim our sense of well-being. He asks and answers questions that go to the heart of the human condition: How do we know what is right? How can we cope with change? Why can't we all get along? And, most centrally, how can we use the centuries of wisdom that have come before us to help us answer these questions and feel at ease in the world? Accessible, entertaining, and profoundly useful, *The Big Questions* mixes wisdom from the great thinkers with specific case studies to illuminate how a shift in perspective can truly be life changing. Lou Marinoff is the author of the international hit *Plato, Not Prozac!*, which has been published in twenty languages. A professor of philosophy at the City College of New York, Marinoff is also the founding president of the American Philosophical Practitioners Association. Praise for *Plato, Not Prozac!*: 'What exactly is philosophical practice? Marinoff calls it 'therapy for the sane.' In a nutshell, it's using the 2,500-year-old tradition of philosophy to solve everyday problems, like work, relationship and family issues. It's a return to what philosophy was meant to be - a guideline for a way of life.' -Salon.Com 'Plato, Not Prozac! looks to become the bible of the "philosophical counseling" movement.' -Philadelphia Inquirer Magazine 'The ancient think

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of

mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.
