This publication provides an unparalleled comparative analysis of two "hot topics" in the field of antitrust and unfair competition law with regard to a number of key countries. The first part of the book examines the prohibition of abuse of a dominant position and globalization in relation to two broad questions: first, whether there is consistency between the approaches of different jurisdictions to the notion of abuse, and,

second, whether there are too many restrictions on legal rights and business opportunities resulting from the prohibition of abuse of dominance. The international report drafted by Professor Pinar Akman reveals that there are as many similarities as differences between the approaches of the twenty-one jurisdictions studied and presented in this book. This is an invitation to read the excellent international report as well as the reports on specific jurisdictions in order to grasp the variety of arguments and approaches of this antitrust area, which may, on the surface, appear alike. The second part gathers contributions on the question of protection and disclosure of trade secrets and know-how from various jurisdictions. The need for adequate protection of trade secrets has increased due to digitalization and the ease with which large volumes of misappropriated information can be reproduced. The comprehensive international report, prepared by Henrik Bengtsson, brings together these reflections by comparing various national positions. The book also discusses the resolutions passed by the General Assembly of the International League of Competition Law (LIDC) following a debate on each of these topics, and includes proposed solutions and recommendations.

With the aim of creating an autonomous regime for the interpretation and application of the contract, boilerplate clauses are often inserted into international commercial contracts without

negotiations or regard for their legal effects. The assumption that a sufficiently detailed and clear language will ensure that the legal effects of the contract will only be based on the contract, as opposed to the applicable law, was originally encouraged by English courts, and today most international contracts have these clauses, irrespective of the governing law. This collection of essays demonstrates that this assumption is not fully applicable under systems of civil law, because these systems are based on principles, such as good faith and loyalty, which contradict this approach.

Now presented in two convenient volumes, the sixth edition of Berlingieri on Arrest of Ships is an invaluable source of information, detailing the claims in respect of which a ship may be arrested, the conditions for obtaining an order of arrest, the need for a security, the manner by which the ship that has been arrested may be released, the possibility of a multiple arrest and the jurisdiction on the merits. Written by a renowned expert in the field, and analysing the various conventions relating to the arrest of ships in an article-by-article and paragraph manner, these books are a useful reference tool for practitioners, as well as academics and post-graduate students of maritime law.

The object of the expedition was to complete the survey of Patagonia and Tierra del Fuego, commenced under Captain King in 1826 to 1830--to survey the shores of Chile, Peru, and of some islands in the Pacific--and to carry a chain of chronometrical measurements round the World. cholera: the next morning we saw the sun rise behind the rugged outline of the Grand Canary Island, and suddenly illumine the Peak of Teneriffe, whilst the lower parts were veiled in fleecy clouds. This was the first of many delightful days never to be forgotten. On the 16th of January 1832 we anchored at Porto Praya, in St. Jago, the chief island of the Cape de Verd archipelago.

An interdisciplinary approach enables health care providers to work together. A logical, easy-to-follow organization covers information by intervention type, from least invasive to most invasive. Integration of interventions provides information in a clinically useful way, so it's easier to consider more than one type of treatment or intervention for low back pain, and easier to see which methods should be tried first. 155 illustrations include x-rays, photos, and drawings. Tables and boxes summarize key information. Evidence-based content allows you to make clinical decisions based on the ranking the best available scientific studies from strongest to weakest. Patient history and examination chapters help in assessing the patient's condition and in ruling out serious pathology before making decisions about specific
