The Bean Trees is bestselling author Barbara Kingsolver's first novel, now widely regarded as a modern classic. It is the charming, engrossing tale of rural Kentucky native Taylor Greer, who only wants to get away from her roots and avoid getting pregnant. She succeeds, but inherits a 3-year-old native-American little girl named Turtle along the way, and together, from Oklahoma to Tucson, Arizona, half-Cherokee Taylor and her charge search for a new life in the West. Written with humor and pathos, this highly praised novel focuses on love and friendship, abandonment and belonging as Taylor, out of money and seemingly out of options, settles in dusty Tucson

The Revised 6th Edition of this popular casebook contains an omitted APA section but is otherwise identical to the 6th Edition. Like previous editions, it focuses on real problems and real administrative practice. Problems serve as the primary pedagogical tool, including problems that do not involve courts. The book raises ethical issues distinctive to government lawyers, requires students to parse statutory and regulatory text in solving problems, and orients the course around administrative law practice rather than theory. While theory is not ignored, the book focuses on reality-based problems that put

theory in context. It includes the most recent important Supreme Court and Courts of Appeals cases, including *King v. Burwell*, with its rejection of Chevron when a case involves interpretive questions of deep "economic and political significance"; *Perez v. Mortgage Bankers Ass'n*, which overruled the D.C. Circuit's Alaska Hunters line of cases; Lexmark International's attempt to clarify the meaning of prudential standing; *Spokeo, Inc. v. Robins*, with its rejection of standing absent concrete injury to a person, even when a person's statutory right has been violated; and *Corps of Engineers v. Hawkes'* elaboration of the test for finality. Notably, the new edition joins the ranks of Interactive Casebooks, a new breed of casebook that features a novel visual display and layout that uses text boxes, and color/border segregated feature sections for hypotheticals, reference to scholarly debates, useful information for students, and provocative questions. A major distinguishing feature of the book is its inclusion of an accompanying electronic version with the extensive hyperlinking to Westlaw versions of legal materials, Black's Law Dictionary definitions, supplementary online resources and more. The 6th Edition utilizes the CasebookPlus(tm) platform, providing students with digital access to faculty-authored self-assessments that are keyed to the text.

Oil is one of the world's most important commodities, but few people know how its extraction affects the residents of petroleum-producing regions. In the 1960s, the Texaco corporation discovered crude in the territory of Ecuador's indigenous Cofán nation. Within a decade, Ecuador had become a member of

OPEC, and the Cofán watched as their forests fell, their rivers ran black, and their bodies succumbed to new illnesses. In 1993, they became plaintiffs in a multibillion-dollar lawsuit that aims to compensate them for the losses they have suffered. Yet even in the midst of a tragic toxic disaster, the Cofán have refused to be destroyed. While seeking reparations for oil's assault on their lives, they remain committed to the survival of their language, culture, and rainforest homeland. *Life in Oil* presents the compelling, nuanced story of how the Cofán manage to endure at the center of Ecuadorian petroleum extraction. Michael L. Cepek has lived and worked with Cofán people for more than twenty years. In this highly accessible book, he goes well beyond popular and academic accounts of their suffering to share the largely unknown stories that Cofán people themselves create—the ones they tell in their own language, in their own communities, and to one another and the few outsiders they know and trust. Their words reveal that life in oil is a form of slow, confusing violence for some of the earth's most marginalized, yet resilient, inhabitants.

In an ideal world, the laws of Congress--known as federal statutes--would always be clearly worded and easily understood by the judges tasked with interpreting them. But many laws feature ambiguous or even contradictory wording. How, then, should judges divine their meaning? Should they stick only to the text? To what degree, if any, should they consult aids beyond the statutes themselves? Are the purposes of lawmakers in writing law relevant? Some judges, such as Supreme Court Justice Antonin Scalia, believe courts should look to the language of the statute and virtually nothing else. Chief Judge Robert A. Katzmann of the U.S. Court of Appeals for the

Where To Download Chevron Study Guide Practice Test

Second Circuit respectfully disagrees. In *Judging Statutes*, Katzmman, who is a trained political scientist as well as a judge, argues that our constitutional system charges Congress with enacting laws; therefore, how Congress makes its purposes known through both the laws themselves and reliable accompanying materials should be respected. He looks at how the American government works, including how laws come to be and how various agencies construe legislation. He then explains the judicial process of interpreting and applying these laws through the demonstration of two interpretative approaches, purposivism (focusing on the purpose of a law) and textualism (focusing solely on the text of the written law). Katzmman draws from his experience to show how this process plays out in the real world, and concludes with some suggestions to promote understanding between the courts and Congress. When courts interpret the laws of Congress, they should be mindful of how Congress actually functions, how lawmakers signal the meaning of statutes, and what those legislators expect of courts construing their laws. The legislative record behind a law is in truth part of its foundation, and therefore merits consideration.
