String Trimmer and Blower

"Overall this book provides an excellent summary of the state of knowledge of term structure modelling. It combines a solid academic background with the practical experience of someone who works in the financial sector." Alan White and John Hull, A-J Financial Systems, Canada
The modelling of exotic interest-rate options is such an important and fast-moving area, that the updating of the extremely successful first edition has been eagerly awaited. This edition re-focuses the assessment of various models presented in the first edition, in light of the new developments of modelling imperfect correlation between financial quantities. It also presents a substantial new chapter devoted to this revolutionary modelling method. In this second edition, readers will also find important new data dealing with the securities markets and the probabilistic/stochastic calculus tools. Other changes include: a new chapter on the issues arising in the pricing of several classes of exotic interest-rate instruments; and insights from the BDT and the Brennan and Schwartz approaches which can be combined into a new class of "generalised models". Further details can be found on the links between mean-reversion and calibration for important classes of models.

C05 Fundamentals of Ethics

Each chapter of this volume is a contribution from an expert in the field, chosen by the editors to contribute to the 1997 "Current Issues in Blood Substitute Research and Development" course given in San Diego, March 17-19. The contributors were selected because of their expertise in areas which the editors believe to be critical to the advancement of the field, and which reflect activity in "hot" areas of relevant research. While there is a continuity in style for the annual course, each year brings changes in emphasis and content. In previous years, we were often not able to provide time for participants to present their views and opinions. Consequently, this year we encouraged discussion after each presentation. These sessions were recorded, transcribed, and are printed with the chapters herein. We believe that the product is very close to the capturing this year's course in print, and trust readers will enjoy reading the always candid and often provocative remarks from the audience. The price paid for inclusion of the discussion transcriptions was a delay in publication. Each author was allowed to edit his/her discussion section as well as the final version of the chapters prior to publication. The changes are mainly for grammar, and we tried, when possible, not to alter the conversational style of these interchanges.

Fundamentals of Business Economics

A majestic narrative reckoning with the forces that have shaped the nature and destiny of the world's governing institutions. The story of global cooperation is a tale of dreamers goading us to find common cause in remedying humanity's worst problems. But international institutions are also tools for the powers that be to advance their own interests. Mark Mazower's *Governing the World* tells the epic, two-hundred-year story of that inevitable tension--the unstable and often surprising alchemy between ideas and power. From the rubble of the Napoleonic empire in the nineteenth century through the birth of the League of Nations and the United Nations in the twentieth century to the dominance of global finance at the turn of the millennium, Mazower masterfully explores the current era of international life as Western dominance wanes and a new global balance of powers emerges.

Jaina Sutras

El libro azul nos narra la historia de Pedro, quien, tras despertar de un ensueno en medio de la oscuridad del bosque, se percata de que el unico recuerdo que posee en su memoria es el de un hombre que lo persigue para asesinarlo. Huyendo de su perseguidor, Pedro, desesperado y posesionado por el miedo, logra alojarse en una casa habitada por una familia de calabazas parlantes, quienes lo albergan para proteger su vida. Mientras el señor calabaza abandona su morada en busca de comida para saciar el hambre de su huesped, los otros miembros de la familia calabaza le leen a Pedro algunos relatos del libro azul, un texto fundamental para quienes desean comprender lo que es inherente a la existencia. Poco a poco, ante la demora del señor calabaza, el hambre y el odio de Pedro ira agudizando su relacion con las calabazas, al mismo tiempo que su pasado comenzara a confluir con su presente y con lo narrado en el libro azul.

ACCA Advanced Performance Management

Author Ned Mohan has been a leader in EES education and research for decades. His three-book series on Power Electronics focuses on three essential topics in the power sequence based on applications relevant to this age of sustainable energy such as wind turbines and hybrid electric vehicles. The three topics include power electronics, power systems and electric machines. Key features in the first Edition build on Mohan's successful MNPERE texts; his systems approach which puts dry technical detail in the context of applications; and substantial pedagogical support including PPT's, video clips, animations, clicker questions and a lab manual. It follows a top-down systems-level approach to power electronics to highlight interrelationships between these sub-fields. It's intended to cover fundamental and practical design. This book also follows a building-block approach to power electronics that allows an in-depth discussion of several important topics that are usually left. Topics are carefully sequenced to maintain continuity and interest.
