The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

The Haddock text features the successful author team Price et al. The author team based A Contemporary Approach on the solid foundation of the Price 14e textbook; however, in Haddock, the approach has been modified to fit the needs of a growing number of College Accounting instructors who teach the course without covering special journals. These instructors feel that special journals are an unnecessarily complicated subject for such a basic course. By eliminating special journal coverage, professors are free to focus on recording to the general journal and posting to the general ledger - the basic bookkeeping functions that are so important to accountants in the real world. Competing books have placed special

journals in an appendix (Slater) or tried to separate special journal coverage from general journal coverage but retain both (McQuaig). Haddock is the only text on the market that eliminates special journal coverage completely (why make students pay for material they will not learn in the course?). With Haddock on the roster, instructor's have a choice between a traditional approach that fully integrates special journals into the text in a succinct and logical way (Price 14e) or a contemporary approach that focuses on the basics and is more in keeping with where the course is headed in the future (Haddock 3e).

Financial Reporting and Analysis

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 12e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are

recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet.

College Accounting

College Accounting continues to offer its trademark short learning segments followed by self-review questions and answers. This book has been thoroughly revised and given a new visual design. The book also includes more real-world examples than ever, high-interest problems and activities, in-text help, classroom-tested features, and support for a variety of software packages. The new edition continues to be the most current and thorough text available, and provides solid coverage of accounting concepts and principles.

Accessible to students and flexible for instructors, COLLEGE ALGEBRA AND TRIGONOMETRY, Seventh Edition, uses the dynamic link between concepts and applications to bring mathematics to life. By incorporating interactive learning techniques, the Aufmann team helps students to better understand concepts, work independently, and obtain greater mathematical fluency. The text also includes technology features to accommodate courses that allow the option of using graphing calculators. The authors' proven Aufmann Interactive Method allows students to try a skill as it is presented in example form. This interaction between the examples and Try Exercises serves as a checkpoint to students as they read the textbook, do their homework, or study a section. In the Seventh Edition, Review Notes are featured more prominently throughout the text to help students recognize the key prerequisite skills needed to understand new concepts. The Demo Docs System of instruction replicates the classroom experience by providing more “I get it” moments outside of class. We’ve talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students understand (or “get it”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. & On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. & The Demo Docs system helps to recreate the “I get it” moments outside of class-keeping both you and the students on track.
