Petrogav International provides courses for participants that intend to work on offshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the offshore drilling platforms and on the offshore production platforms. It is intended also for non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on offshore oil and gas platforms. It is intended also for non-production personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of production operations, with a particular focus on the unique aspects of offshore operations.

Control Engineering

Management Control Systems, 11/e builds on strengths from prior editions, by offering a rich diversity of cases balanced with current material. The primary market for Management Control Systems is an MBA level elective in control systems. The text may also be appropriate for advanced managerial accounting courses and/or MBA-level cost accounting courses, with an emphasis on management control. Management Control Systems, 11/e is organized to develop insights and analytical skills related to how managers go about designing, implementing, and using planning and control systems to implement strategies.
