This book provides a comprehensive, authoritative, and thought-provoking examination of the ethical issues encountered by accountants working in the industry, public practice, nonprofit service, and government. Gordon Klein's, Ethics in Accounting: A Decision-Making Approach, helps students understand all topics commonly prescribed by state Boards of Accountancy regarding ethics literacy. Ethics in Accounting can be utilized in either a one-term or two-term course in Accounting Ethics. A contemporary focus immerses readers in real world ethical questions with recent trending topics such as celebrity privacy, basketball point-shaving, auditor inside trading, and online dating. Woven into chapters are tax-related issues that address fraud, cheating, confidentiality, contingent fees and auditor independence. Duties arising in more commonplace roles as internal auditors, external auditors, and tax practitioners are, of course, examined as well.

- Try It examples are simple and focus on key ideas or concepts. They are located after a particular concept or calculation, and invite students to practice what they have just learned.
- Becker Multiple Choice Questions in the assignment material probe students' knowledge of the chapter material and their ability to think critically about key concepts.
- Opening Vignettes. Each chapter opens with a vignette on a real company situation. The vignettes get students engaged in a business situation, or dilemma, illustrating why and how the concepts in the chapter are relevant in business. New examples on Quiksilver, General Motors, Boeing, Delta, Honda, and Viacom have been incorporated.
- Concepts in Action Boxes. Found in every chapter, these boxes cover real-world cost accounting issues across a variety of industries including automobile racing, defense contracting, entertainment, manufacturing, and retailing.
