Prometheus Revisited

After becoming a Hasselblad Master in 2014, Bryn was invited to complete a project to be included in the Masters Book, his initial idea was simply to showcase the usual type of work he produces - well lit, glossy product shots. However, as the deadline approached for the Book, he had the opportunity to go to Chernobyl, the site of the catastrophic nuclear accident over 30 years ago. Wanting to challenge all of his normal conventions, he set off to capture a contradiction to his normal way of working; only using available light and focusing on old, used, weathered and destroyed products.

Nikon D500: Pocket Guide

A lavish photographic celebration that captures the fascinating behaviors of land and sea animals in the Galápagos Islands. The Galápagos Islands are home to an amazing variety of iconic creatures, from Giant Tortoises, Galápagos Sea Lions, Galápagos Penguins, and Ghost Crabs to Darwin's finches, the Blue-footed Booby, and Hummingbird Moths. But how precisely do these animals manage to survive on—and in the waters around—their desert-like volcanic islands, where fresh water is always scarce, food is often hard to come by, and finding a good mate is a challenge because animal populations are so small? In this stunning large-format book, Galápagos experts Walter Perez and Michael Weisberg present an unprecedented photographic account of the remarkable survival behaviors of these beautiful and unique animals. With more than 200 detailed, close-up photographs, the book captures Galápagos animals in action as they feed, play, fight,

court, mate, build nests, give birth, raise their young, and cooperate and clash with other species. Watch male Marine Iguanas fight over territory and females; see frigatebirds steal food and nesting materials from other birds; witness the courtship dance of a pair of Blue-footed Boobies; go underwater to glimpse a Galápagos Sea Lion pup playing with its mother; and observe a baby Pacific Green Turtle enter the water for the first time. These and dozens of other unforgettable scenes are all vividly captured here—including many moments that even experienced Galápagos observers may never be lucky enough to see in person. Complete with a brief text that provides essential context, this book will be cherished by Galápagos visitors and anyone else who wants to see incredible animals on the move.

Ward's Automotive Yearbook 2005

The myth of Prometheus has long served as a symbol of the industrialization and individualism of the modern world, yet Arthur Mitzman aims to demonstrate an alternative conception emphasizing creativity over productivity, and a harmonious union with nature rather than its technocratic conquest.

Lust, Then Love

Pursue your photography passion. See the world. Professional photographer Nick Onken leads you on a global adventure in this behind-the-scenes guide to the new generation of travel photography. Get an insider's guide on every step of the journey: > Break into the travel photography industry > Prepare for a successful trip > Shoot great pictures on location > Build your business and brand Photo Trekking shows you how to hit the ground running, shoot from the heart, and get

inspired by your surroundings, wherever your travels take you.

Chernobyl My Sweet

Expanded and revised to cover recent developments, this text should tell you what you need to know to become a better listener and buyer of quality high-fidelity components. New sections include: super audio CD; high-resolution audio on DVD; and single-ended amplifiers.

Foundryside

Oliver doesn't only snap birds; his camera shutter also clicks closed for the play of light across rippling water, the mist rising off a wood in early spring and the rolling Somerset hills where he was raised. But birds are a favourite subject of his, and his camera never fails to do them justice. Oliver's sensitivity to lighting, colour contrast and mood imbues each picture with a unique atmosphere, resulting in precise shots of professional quality. The birds' glossy eyes, their beaks, the intricate patterns on their feathers and the texture of their down have all been captured with a patience and skill that is admired by dedicated fans from all across the world. AUTHOR: Meet Oliver - a twenty-two-year-old photographer with a brilliant eye for bird photography, who also happens to have Down Syndrome. First picking up his camera at eleven, he has since sold photographs at exhibitions, collaborated with personalities such as television presenter Iolo Williams, and BBC Wildlife cameraman and photographer Richard Taylor Jones, gained a following of 60,000+ on Facebook and won the National Diversity Award for a UK Role Model for Disability. SELLING POINTS: * Breath-taking shots of birds from Oliver Hellowell, a young photographer with Down Syndrome * Chapters dedicated to birds of prey, seabirds and residents of the British garden, annotated with Oliver's own notes * Demonstrates Oliver's singular ability to capture the essence of his feathered muses 152 colour images

Hi-Fi

A diagnosis of breast cancer is among the most frightening moments in a person's life—so frightening that even to formulate questions for the doctor may seem impossible. This helpful book is written as a guide for women and men facing breast cancer and for their caring families and friends. It is also written for women who have not been diagnosed with breast cancer but are concerned that they may be. Drawing on her many years of experience with breast cancer patients, Dr. Ruth H. Grobstein provides exactly the information they want and need in order to make the best health decisions. Her jargon-free book deals with general issues of interest to all women—mammography, hormone replacement therapy, risk factors for breast cancer, and more—as well as the numerous issues that patients diagnosed with breast cancer confront.

Her book will be an indispensable companion, providing reliable information for patients on the journey through a sometimes confusing and impersonal medical system.

Differential Geometry and Topology, Discrete and Computational Geometry

In this must-have new anthology, top media scholars explore the leading edge of digital media studies to provide a broad, authoritative survey of the study of the field and a compelling preview of future developments. This book is divided into five key areas - video games, digital images, the electronic word, computers and music, and new digital media - and offers an invaluable guide for students and scholars alike.

Knowledge Economy in the Megalopolis

Twenty years ago the very first For Dummies book, DOS For Dummies, was published. From that first printing of that first book came a series unlike anything in the publishing world, one that is global in both geography - we have been published worldwide in some 30 languages - and in coverage. No single volume can hope to summarize what thousands of titles have meant to millions of readers over the years, and we don't claim to do that in this e-book. Rather, this e-book celebrates the breadth and depth of the For Dummies series, offering 20 chapters - in honor of our 20 years - from a list of books compiled by our global colleagues. We are confident the chapters we've included give you a representative glimpse at why - no matter what the topic - our products have meant so much to so many by Making Everything Easier. We've grouped our chapters into five main parts: Part I: Dummies Classics, offers four chapters from some of our best-loved books. There's a chapter from DOS For Dummies, the book that started it all, and chapters from two of our best-sellers: Windows 7 For Dummies and Sex For Dummies. And just for a bit of spice, we've included a chapter from French For Dummies. Part II: Daily Dose of Dummies, offers the kind of lifestyle, self-help, and business skills that our readers have come to treasure. There's one of our famous Part of Tens chapters from Cognitive Behavioural Therapy for Dummies and a chapter from Meditation For Dummies to help you get your center. Chapters from Leadership For Dummies and Marketing For Dummies help you develop new skills for the marketplace. Part III, Fun with Dummies, celebrates life and all it has to offer. We've got chapters here from The Royal Wedding For Dummies, Guitar For Dummies, Digital Photography SLR All-in-One For Dummies, Puppies for Dummies, Knitting For Dummies, and Wine For Dummies. Part IV, Get Social, highlights how we help you grow and develop new skills. Chapters here come from Facebook For Dummies, Social Media Marketing For Dummies, and Dating For Dummies. Part V, Going Global, shares the worldwide appeal of the For Dummies series. These chapters from British History For Dummies, Canadian History For Dummies, and Rugby Union For Dummies were created by our global colleagues and authors and show how the For Dummies approach applies not only to whatever the subject is at hand, but also wherever the discussion is taking place. Download and enjoy!

Adobe Illustrator CC Classroom in a Book (2019 Release)

This book constitutes the proceedings of the 1st International Conference on Advances in Emerging Trends and Technologies (ICAETT 2019), held in Quito, Ecuador, on 29–31 May 2019, jointly organized by Universidad Tecnológica Israel, Universidad Técnica del Norte, and Instituto Tecnológico Superior Rumiñahui, and supported by SNOTRA. ICAETT 2019 brought together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: Technology Trends Electronics Intelligent Systems Machine Vision Communication Security e-Learning e-Business e-Government and e-Participation

Measures for Research and Evaluation in the English Language Arts

What does Doing the Impossible really mean? This book is for those who have a desire to achieve greatness and are ready to take the steps to turn that desire into a reality. At one point or another in this book, you will experience several different reactions - excitement, curiosity, joy, laughter, or even tears - but the ultimate goal is to encourage and challenge you to make a decision to do the impossible. That may have a totally different meaning to you than it did to Steve Jobs, Thomas Edison, or any of the other role models we will look at; but whatever Doing the Impossible means to you, the goal of this book is to help you realize that you have the capacity to do what the critics think is impossible. - Patrick Bet-David, Introduction to Doing the Impossible. Doing the Impossible is a roadmap for those who want to do something big with their lives. The book goes over 25 steps that the reader should take to re-create themselves, identify their cause, and make history. Patrick Bet-David shares his own impossible crusade and gives key principles for anyone looking to do the same.

Designed for photographers who haven't memorized every button, dial, setting, and feature on their Nikon D500, Rocky Nook's handy and ultra-portable quick reference Pocket Guide helps you get the shot when you're out and about. * Confirm that your camera is set up properly with the pre-shoot checklist * Identify every button and dial on your camera * Learn the

essential modes and settings you need to know * Dive deeper with additional features of your camera * Execute step-by-step instructions for shooting multiple exposures, in-camera HDR, time-lapse movies, and more * Follow tips and techniques for getting great shots in typical scenarios (portrait, landscape, freezing action, low light, etc.)

Colourmorphia

Mastering the Nikon D7100 by Darrell Young provides a wealth of experience-based information and insights for owners of the new D7100 camera. Darrell is determined to help the user navigate past the confusion that often comes with complex and powerful professional camera equipment. This book explores the features and capabilities of the camera in a way that far surpasses the user's manual. It guides readers through the camera features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option. Every button, dial, switch, and menu configuration setting is explored in a user-friendly manner, with suggestions for setup according to various shooting styles. Darrell's friendly and informative writing style allows readers to easily follow directions, while feeling as if a friend dropped in to share his knowledge. The learning experience for new D7100 users goes beyond just the camera itself and covers basic photography technique.

Lou Reed

A selection of the most striking images taken from the bestselling "Morphia" series have been gathered together along with a selection of coloured pieces to celebrate the talent of Kerby Rosanes and his fans. Containing a full-colour section displaying the most accomplished, completed artworks produced by Kerby's fans, along with stylistic comments and opinions from Kerby. The beautiful artworks displayed in the colour section are also included in the black and white section of the book, so you can take inspiration from the colouristas and bring your own images to life.

Doing the Impossible

The essential biography of one of music's most influential icons: Lou Reed As lead singer and songwriter for the Velvet Underground and a renowned solo artist, Lou Reed invented alternative rock. His music, at once a source of transcendent beauty and coruscating noise, violated all definitions of genre while speaking to millions of fans and inspiring generations of musicians. But while his iconic status may be fixed, the man himself was anything but. Lou Reed's life was a transformer's odyssey. Eternally restless and endlessly hungry for new experiences, Reed reinvented his persona, his sound, even his sexuality time and again. A man of contradictions and extremes, he was fiercely independent yet afraid of being alone, artistically fearless yet deeply paranoid, eager for commercial success yet disdainful of his own triumphs. Channeling his

jagged energy and literary sensibility into classic songs - like "Walk on the Wild Side" and "Sweet Jane" - and radically experimental albums alike, Reed remained desperately true to his artistic vision, wherever it led him. Now, just a few years after Reed's death, Rolling Stone writer Anthony DeCurtis, who knew Reed and interviewed him extensively, tells the provocative story of his complex and chameleonic life. With unparalleled access to dozens of Reed's friends, family, and collaborators, DeCurtis tracks Reed's five-decade career through the accounts of those who knew him and through Reed's most revealing testimony, his music. We travel deep into his defiantly subterranean world, enter the studio as the Velvet Underground record their groundbreaking work, and revel in Reed's relationships with such legendary figures as Andy Warhol, David Bowie, and Laurie Anderson. Gritty, intimate, and unflinching, Lou Reed is an illuminating tribute to one of the most incendiary artists of our time.

Postharvest Management of Fruit and Vegetables in the Asia-Pacific Region

In recent decades urban regions around the world have engaged in a new process of development based on the creation of new knowledge. Amidst the globalization of economic activities and the arrival of transformative technologies, knowledge has become the key driver of competitiveness and is profoundly reshaping the patterns of economic growth and activity. This book offers a comprehensive new model of the rise of a Knowledge Economy and its evolutionary development in the Megalopolis. These regions are developing new institutions and governance mechanisms to adapt, disseminate, and utilize available knowledge to promote continuing development of their Knowledge Economies. However, such developments are accompanied by increasing inequalities in incomes and in urban services. This book examines the resilience of some urban regions and their recent emergence as vibrant Knowledge Economies. It also reviews the recent renewal and growth in the Megalopolis-- stretching along the Atlantic Seaboard along the metropolitan areas of Boston, New York, Philadelphia, Baltimore and Washington DC. This book will appeal to researchers and professionals interested in urban and regional development, and to business groups interested in economic development.

Professional Android Open Accessory Programming with Arduino

"A handsome, beautifully produced compilation of meditations and exercises to inspire us to find joy and expand the ways we engage with the people and places, the objects and tasks we encounter in our everyday lives"--

Jimmy Connors Saved My Life

(Book). Of all American audio companies, JBL holds the record for overall longevity and product renown. To celebrate sixty years of success, this book offers details on the people and products that have made this company famous. From car

stereos to concert hall installations, JBL is the most recognized audio brand in the world. Written by audio expert John Eargle, this book features full-color photos, historical advertisements, and hundreds of diagrams and images, many taken right from JBL's archives. Topics include stories behind the development of innovative applications for consumer products, as well as systems installations for stadiums, tour sound, movie theaters, recording studios, and places of worship. In addition to the technical info that will help explain the innovation, this book will cover the brilliant engineers, and colorful record producers, musicians and technicians who had the vision to pursue a "better way". This book is for anyone interested in the behind-the-scenes of a business success story, and who is fascinated on how amplified sound is applied in almost every aspect of our lives from the home to the concert hall.

Audio Engineering for Sound Reinforcement

Jimmy Connors is seldom considered when one discusses the best tennis players ever. Nevertheless, he was the most successful, with an all-time best 109 tournament victories through the 1970s and 1980s including eight major championships, and during the 1970s he was the world's No. 1 ranked player for a then unprecedented five consecutive years. In this carefully researched, admiring account of Connors' blue-collar rise through the tennis ranks shepherded by Gloria, the ultimate tennis mum, sports journalist Joel Drucker describes how mother and son pushed their way into the aristocratic tennis oligarchy with determination and hard work. Though popular as a charismatic and energetic joker on court, Connors wasn't always nice, had a temper and projected a mild paranoia. The chip on his shoulder that carried him out of Belleville, Illinois, to a number-one world ranking also antagonized the press, his opponents and the tennis establishment. But it was Connors' determination that inspired Drucker to pursue his career, hence the book's title. first-hand experience to craft a book that is both a comprehensive biography of Connors and a memoir of the author's life. Connors ignited a tennis revolution, personifying the notion that an athlete could be both a sports superstar and cultural icon, and by a fusion of rage, desire, ambition and talent Connors showcased the sport as no one before him. In chronicling the life of the enigmatic superstar, Drucker reveals in candid detail the profound emotional impact Connors had on him as his own life intersected and ultimately clashed with the tennis superstar.

The Breast Cancer Book

Creative professionals seeking the fastest, easiest, most comprehensive way to learn Adobe Illustrator CC (2019 release) choose Adobe Illustrator CC Classroom in a Book (2019 release) from the best-selling series of hands-on software training workbooks from Adobe Press. The 15 project-based lessons show users the key techniques for realizing your creative potential with Adobe Illustrator CC. Following hands-on step-by-step projects, users create logos, illustrations, posters, and more. Explore the new streamlined Tools panel and all of the features essential for being creative in Illustrator, including

working with the Shaper tool and Live Shapes along with dynamic symbols to streamline graphics creation. Create website assets and export them in multiple formats to support modern responsive web designs. From exacting illustration to free-form painting, you'll build a strong foundation in Illustrator as you progress through the lessons. The online companion files include all the necessary assets for readers to complete the projects featured in each. All buyers of the book get full access to the Web Edition: A Web-based version of the complete ebook enhanced with video and multiple-choice quizzes.

The JBL Story - 60 Years of Audio Innovation

Christmas Holiday

A beyond-cool look at the world of high-end audio design for passionate collectors, obsessive audiophiles, and design fans. At a time when sales of vinyl records have hit a 25-year high, and analog technologies are providing the kind of extraordinary audio experiences that our increasingly digital world has started to remove, Hi-Fi is essential reading. This unique book explores just how, when, and why the world fell in love with the look, feel, and sound of top-of-the-line audio equipment. Hi-Fi traces this fascinating evolution from the 1950s to today (and tomorrow), taking readers right up to the current renaissance of all things analog and the emergence of cutting-edge designs for die-hard audiophiles.

A Rendezvous With God

"The exciting beginning of a promising new epic fantasy series. Prepare for ancient mysteries, innovative magic, and heart-pounding heists."--Brandon Sanderson "Complex characters, magic that is tech and vice versa, a world bound by warring trade dynasties: Bennett will leave you in awe once you remember to breathe!"--Tamora Pierce In a city that runs on industrialized magic, a secret war will be fought to overwrite reality itself--the first in a dazzling new series from City of Stairs author Robert Jackson Bennett. Sancia Grado is a thief, and a damn good one. And her latest target, a heavily guarded warehouse on Tevanne's docks, is nothing her unique abilities can't handle. But unbeknownst to her, Sancia's been sent to steal an artifact of unimaginable power, an object that could revolutionize the magical technology known as scrying. The Merchant Houses who control this magic--the art of using coded commands to imbue everyday objects with sentience--have already used it to transform Tevanne into a vast, remorseless capitalist machine. But if they can unlock the artifact's secrets, they will rewrite the world itself to suit their aims. Now someone in those Houses wants Sancia dead, and the artifact for themselves. And in the city of Tevanne, there's nobody with the power to stop them. To have a chance at surviving--and at stopping the deadly transformation that's under way--Sancia will have to marshal unlikely allies, learn to harness the artifact's power for herself, and undergo her own transformation, one that will turn her into something she

could never have imagined.

Advances in Emerging Trends and Technologies

Outlines strategies and techniques for developing an effective marketing plan using a desktop computer.

Hi-fi in the Home

This book features selected research papers presented at the First International Conference on Computing, Communications, and Cyber-Security (IC4S 2019), organized by Northwest Group of Institutions, Punjab, India, Southern Federal University, Russia, and IAC Educational Trust, India along with KEC, Ghaziabad and ITS, College Ghaziabad as an academic partner and held on 12–13 October 2019. It includes innovative work from researchers, leading innovators and professionals in the area of communication and network technologies, advanced computing technologies, data analytics and intelligent learning, the latest electrical and electronics trends, and security and privacy issues.

The Peninsular Journal Of Medicine And The Collateral Sciences, Volume 5

Describes the childhood of the famous Genoese explorer with some fictionalized details and dialogue to flesh out historical facts.

Servicing Audio and Hi-fi Equipment

(Book). This up-to-date book comprehensively covers all aspects of speech and music sound reinforcement. It is roughly divided into four sections: Section 1 provides the tutorial fundamentals that all audio engineers will need, discussing subjects such as fundamentals of acoustics, psychoacoustics, basic electrical theory and digital processing. Section 2 deals with the fundamental classes of hardware that the modern engineer will use, such as loudspeaker systems and components, microphones, mixers, amplifiers and signal processors. Special attention is given to digital techniques for system control and to audio signal analysis. Section 3 deals with the basics of system design, from concept to final realization. It covers topics such as basic system type and speech intelligibility, site survey, user needs analysis and project management. Section 4 discusses individual design areas, such as sports facilities, large-scale tour sound systems, high-level music playback, systems for the theater, religious facilities, and other meeting spaces. The book is written in an accessible style, but does not lack for ample amounts of technical information. It is truly a book for the 21st century! The Senior Director of Product Development and Application for JBL Professional, John Eargle is the author of The Handbook of

Recording Engineering, The Microphone Book, Handbook of Sound System Design, Electroacoustical Reference Data, Music, Sound and Technology and The Loudspeaker Handbook . A 2000 Grammy Award-winner for Best Classical Engineering, Mr. Eargle is an honorary member and past national president of the Audio Engineering Society, a faculty-member of the Aspen Audio Recording Institute, and a member of the National Academy of Recording Arts and Sciences and the Academy of Motion Picture Arts and Sciences.

Mastering the Nikon

The aim of this volume is to give an introduction and overview to differential topology, differential geometry and computational geometry with an emphasis on some interconnections between these three domains of mathematics. The chapters give the background required to begin research in these fields or at their interfaces. They introduce new research domains and both old and new conjectures in these different subjects show some interaction between other sciences close to mathematics. Topics discussed are; the basis of differential topology and combinatorial topology, the link between differential geometry and topology, Riemannian geometry (Levi-Civita connection, curvature tensor, geodesic, completeness and curvature tensor), characteristic classes (to associate every fibre bundle with isomorphic fiber bundles), the link between differential geometry and the geometry of non smooth objects, computational geometry and concrete applications such as structural geology and graphism.

Photo Trekking

Service engineers and technicians have come to regard this book as essential to their work. As a bench-side companion and guide it has no equal. Its purpose is to ease and speed up the processes of fault diagnosis, repair and testing of all classes of home audio equipment: receivers, amplifiers, recorders and playback machines. The mechanics and electronics of domestic audio are examined by Nick Beer in a down-to-earth and practical way, concentrating on what goes wrong, how to track down problems, and how to solve them. A symptom index and comprehensive manufacturer and supplier guide allow quick access to specific advice and suggestions. The third edition is bang up to date with the latest technology-DVD, CD Recordable, PC audio systems. There is also new material on PA equipment. Nick Beer is a Service Manager for an independent dealer working with TV, VCR, Satellite, audio and hi-fi equipment from the major quality manufacturers. He also has extensive experience of field service and sales/installation work. His articles appear regularly in Electrotechnology, and Satellite Trader, and he lectures in Electronics and Media for numerous colleges and companies. Essential bench companion for all service engineers. New technology such as DVD and expanded material on MiniDisk will ensure another successful launch to this new edition
