Grantseeker's Toolkit

Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as "21st century skills." Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century summarizes the findings of the research that investigates the importance of such skills to success in education, work, and

other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

Any Small Goodness

This book, by two editors of *Data Wise: A Step-by-Step Guide to Using Assessment Results to Improve Teaching and Learning*, attempts to bring about a fundamental shift in how educators think about the meetings we attend. They make the case that these gatherings are potentially the most important venue where adult and organizational learning can take place in schools, and that making more effective use of this time is the key to increasing student achievement. In *Meeting Wise*, the authors show why meeting planning is a high-leverage strategy for changing how people work together in the service of school improvement. To this end, they have created a meeting-planning “checklist” to develop a common language for discussing and improving the quality of meetings. In addition, they provide guidelines for readers on “wise facilitating” and “wise participating,” and also include “top tips” and common dilemmas. Simple, succinct, and practical, *Meeting Wise* is designed to be read and applied at every level of the educational enterprise: district leadership meetings with central office staff, charter-school management summits, principals’ meetings with teachers, professional development sessions, teacher-team meetings, and even teachers’ meetings with parents and students.

Personalized Learning: A Guide for Engaging Students with Technology is designed to help educators make sense of the shifting landscape in modern education. While changes may pose significant challenges, they also offer countless opportunities to

engage students in meaningful ways to improve their learning outcomes. Personalized learning is the key to engaging students, as teachers are leading the way toward making learning as relevant, rigorous, and meaningful inside school as outside and what kids do outside school: connecting and sharing online, and engaging in virtual communities of their own. Renowned author of the Heck: Where the Bad Kids Go series, Dale Basye, and award winning educator Peggy Grant, provide a go-to tool available to every teacher today—technology as a way to ‘personalize’ the education experience for every student, enabling students to learn at their various paces and in the way most appropriate to their learning styles.

Directly linked with overall student achievement, graduation rates, and success in higher education, literacy is essential for reaching academic goals in a school or county. Adolescent literacy has become the focus of many school improvement efforts to meet the needs of secondary and high school students. Without the requisite expertise in literacy, administrators and other school leaders charged with literacy improvement initiatives need a systemic and sustained approach for improving student literacy and learning. Taking the Lead on Adolescent Literacy presents a concrete, user-friendly, and practical guide to developing, implementing, and monitoring a schoolwide or county-wide literacy action plan. Readers will find rubrics, tools, and processes developed and field-tested by the authors over more than 10 years of close work with schools across the country.

David Macaulay, co-creator of the international bestseller *The Way Things Work*, brings his signature curiosity and detailing to the story of the steamship in this meticulously researched and stunningly illustrated book. Prior to the 1800s, ships crossing the Atlantic Ocean relied on the wind in their sails to make their journeys. But invention of steam power ushered in a new era of transportation that would change ocean travel forever: the steamship. Award-winning author-illustrator David Macaulay guides readers through the fascinating history that culminated in the building of the most advanced—and last—of these steamships: the SS United States. This book artfully explores the design and construction of the ship and the life of its designer and engineer, William Francis Gibbs. Framed around the author's own experience steaming across the Atlantic on the very same SS United States, *Crossing on Time* is a tour de force of the art of explanation and a touching and surprising childhood story. Vocabulary for the High School Student

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.
