US-China Relations in the Twenty-First Century

Examining the role of mass media and information technology in contemporary society, *Society In Focus*, Eighth Edition, emphasizes the increasing diversity and globalization of societies everywhere. It is designed to help students think clearly and critically about sociological issues, concepts, and methods. Questioning is at the heart of this approach, and as students read this book they are encouraged to become part of the sociological enterprise—rather than remain passive observers. Every element of the text is designed to challenge students to evaluate social issues and, guided by the sociological imagination, to clearly formulate their own positions. By asking questions that demand sociological and creative thought, students are reminded that their conclusions and decisions, as well as their non-decisions and inaction, may have important social consequences. New to this edition:

- New coauthor Mica Thompson, an experienced teacher of introduction to sociology, brings a fresh new perspective as well as a wide array of different life experiences to this edition of *Society in Focus*.
- An expanded critical analysis in Chapter 1 introduces all forms of media and technology, and every chapter examines an aspect of their powerful social influence.
- Chapters 9, 16, and 17 have been updated to include the most recent worldwide financial and economic developments, to help explain globalization and cultural diversity.
- Expanded application of feminist theory in every chapter to help students recognize the importance of gender diversity and the contributions of that theoretical perspective in sociology.
- Updated and brand new boxes throughout encourage students to take a closer look at society and selected social issues.

Exploring Psychology

A revised and updated edition of the popular self-help book for men that addresses contemporary issues and how they impact the way men deal with anger. Men tend to express their anger differently than women do. Research shows men are often more violent and less willing to confront and deal with their emotions than women. Written by a psychologist who specializes in the treatment of male rage, *Beyond*

Anger shows the angry--and miserable--man how to change his life and relationships for the better. This book helps men understand their anger by explaining what the specific symptoms of chronic anger are and by showing angry men how their actions negatively affect family, friends, and coworkers. It helps men control violent feelings by using simple exercises--developed especially for men--to identify when and why anger occurs and by helping them form new habits to prevent anger before it starts. Women, too, will learn essential strategies for understanding and helping the angry men in their lives. Beyond Anger is honest, tough, and real. In this revised edition, Harbin will update references throughout and discuss new topics such as the role of the internet and social media in fueling anger and how to protect yourself against these pitfalls, as well as a discussion on anger and aging, the political landscape and anger, PTSD, a brand-new section on preventing relapse into anger, and many other relevant, timely topics.

Psychology in Everyday Life

Exploring Psychology (cloth)

Some 28 million people in America and 350 million people worldwide live with hearing loss. How do these people and their families cope? What are their experiences of pain, humor, and hope? What support do medicine and technology now offer them, and what is on the horizon? In this engaging and practical book, David Myers, who has himself suffered gradual hearing loss, explores the problems faced by the hard of hearing at home and at work and provides information on the new technology and groundbreaking surgical procedures that are available. Drawing on both his own experiences and his expertise as a social psychologist, Myers recounts how he has coped with hearing loss and how he has incorporated technological aids into his life. The family and friends of the hard of hearing also face adjustments. Myers addresses their situation and provides advice for them on how best to alert loved ones to a hearing problem, persuade them to seek assistance, and encourage them to adjust to and use hearing aids.

Psychology in Modules

Social psychologist David G. Myers has reviewed thousands of recent scientific studies conducted worldwide in search of the key to happiness. With wit and wisdom, he explodes some of the popular myths on the subject and presents specific techniques for finding true joy in living: Are most people happy? What are the inner traits of happy people? Are extroverts happier than introverts? Are men happier than women? Does religious faith promote inner peace and joy? Does well-being come with being well-off? Are happy children more likely to become happy adults? What part do friends play in personal happiness? Is age a factor in feeling happy? What can you do to improve your own sense of well-being? and much more

Nobody Left to Hate

How reliable is our intuition? How much should we depend on gut-level instinct rather than rational analysis when we play the stock market, choose a mate, hire an employee, or assess our own abilities? In this engaging and accessible book, David G. Myers shows us that while intuition can provide us with useful—and often amazing—insights, it can also dangerously mislead us. Drawing on recent psychological research, Myers discusses the powers and perils of intuition when:

- judges and jurors determine who is telling the truth;
- mental health workers predict whether someone is at risk for suicide or crime;
- coaches, players, and fans decide who has the hot hand or the hot bat;
- personnel directors hire new employees;
- psychics claim to be clairvoyant or to have premonitions;
- and much more.

Pursuit of Happiness

A Quiet World

Loose-leaf Version for Psychology

For centuries, China was confident in its role as the 'Middle Kingdom', the undisputed cultural, economic and political powerhouse of Asia. Today, with China once again a leading player on the world stage, countries across the continent are facing an uncertain future. Does China's rise threaten its neighbours? And what, ultimately, is its end goal? Nowhere are these questions more pressing than in the Pacific, where China's maritime neighbours find themselves directly in the path of the country's expanding territorial claims. In this rich historical exploration, Michael Tai finds answers to these and other questions through an in-depth exploration of China's past. Spanning thousands of years of Chinese and Asian history, *China and Her Neighbours* looks at China's evolving relations with Japan, Vietnam, the Philippines, and Malaysia. While the disputes in the Pacific have attracted widespread attention, very few investigations have considered the wider historical context of these tensions.

Psychology In Modules (Spiral)

On April 20, 1999, the halls of Columbine High School in Littleton, Colorado, reverberated with the sound of gunshots as two students, highly armed and consumed with rage, killed thirteen students and seriously injured twenty-three before turning the guns on themselves. It was the worst school massacre in our nation's history. Can we prevent a tragedy like this from happening again? In Elliot Aronson's *Nobody Left to Hate*, one of our nation's leading social psychologists argues that the negative atmosphere in our schools--the exclusion, taunting, humiliation, and bullying--played a major role in triggering the pathological behavior of the shooters. At the very least, such an atmosphere makes schools an unpleasant experience for most normal students. But it doesn't have to be. *Nobody Left to Hate* offers concise, practical, and easy-to-apply strategies for creating a more supportive, stimulating, and compassionate environment in our schools. Based on decades of scientific research and classroom testing, these strategies explain how students can be taught to control their own impulses, how to respect others, and how to resolve conflicts amicably. In addition, they show teachers how to structure classes to promote cooperation, rather than competition, without sacrificing academics. On the contrary, education is greatly enhanced. For parents, teachers, or anyone concerned with what is happening in our schools, *Nobody Left to Hate* provides a simple and effective plan of action that will make their children's school not only a safe place, but a more humane place of learning.

Beyond Anger: A Guide for Men

For Americans entering the twenty-first century, it is the best of times and the worst of times. Material wealth is at record levels, yet disturbing social problems reflect a deep spiritual poverty. In this compelling book, well-known social psychologist David G. Myers asks how this paradox has come to be and, more important, how we can spark social renewal and dream a new American dream. Myers explores the research on social ills from the 1960s through the 1990s and concludes that the materialism and radical individualism of this period have cost us dearly, imperiling our children, corroding general civility, and diminishing our happiness. However, in the voices of public figures and ordinary citizens he now hears a spirit of optimism. The national dialogue is shifting—away from the expansion of personal rights and toward enhancement of communal civility, away from efforts to raise self-esteem and toward attempts to arouse social responsibility, away from “whose values?” and toward “our values.” Myers analyzes in detail the research on educational and other programs that deal with social problems, explaining which seem to work and why. He then offers positive and well-reasoned advice, suggesting that a renewed social ecology for America will rest on policies that balance “me thinking” with “we thinking.”

Exploring Social Psychology

The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas – climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose.
