Learn how to use denial to help you when you are facing tragedy and how to recognize and move past denial when it becomes counterproductive. Denial is often seen as an inability or unwillingness to face unpleasant or difficult realities--from financial losses, to illnesses like alcoholism, to larger social issues like climate change. In some instances, denial can be detrimental because it can keep you stuck in a cycle of destructive behaviors. However, denial can also be very useful for helping you get through hard times, allowing you to tap into your resiliency for emotional survival. With great insight and originality, author Holly Parker shows you how to use denial as a buffer in the face of tragedy and how to know when your use of denial has become counterproductive or detrimental. Through a fresh, comforting, and clinically-based perspective, Parker takes the shame out of denial with practical and relatable solutions to uncovering, reframing, and harnessing this very normal coping technique. Hands-on exercises and compelling personal stories help you apply this information to your situation and come to accept your need for denial when it helps, and break through it to face life's challenges with courage when it hurts.

Specifically written for researchers and students with a fundamental knowledge of focus group research, the book gives numerous examples of what researchers should and should not do in designing their own research projects. In addition, it critically examines the limits of focus groups and suggests how to use focus groups for nontraditional research tasks.

The SAGE Handbook of Applied Social Research Methods, Second Edition provides students and researchers with the most comprehensive resource covering core methods, research designs, and data collection, management, and analysis issues. This thoroughly revised edition continues to place critical emphasis on finding the tools that best fit the research question given the constraints of deadlines, budget, and available staff. Each chapter offers key guidance on how to make intelligent and conscious tradeoffs so that one can refine and hone the research question as new knowledge is gained, unanticipated obstacles are encountered, or contextual shifts take place - all key elements in the

iterative nature of applied research. Each chapter has been enhanced pedagogically to include more step-by-step procedures, specific, rich yet practical examples from various settings to illustrate the method, parameters to define when the method is most appropriate and when it is not appropriate, and greater use of visual aids (graphs, models, tip boxes) to provide teaching and learning tools. - twenty core chapters written by research experts that cover major methods and data analysis issues across the social and behavioral sciences, education, and management; - emphasis on applying research techniques, particularly in "real-world" settings in which there are various data, money, time, and political constraints; - new chapters on mixed methods, qualitative comparative analysis, concept mapping, and internet data collection; - a newly developed section that serves as a guide for students who are navigating through the book and attempting to translate the chapters into action; - a new Instructor's Resources CD, with relevant journal articles, test questions, and exercises to aid the instructor in developing appropriate course materials.

Unleash the power of curiosity and the joy of learning! Curiosity is hardwired in all of us, but the longer students stay in school, the less curious they become. Why is that? Grounded in research, this engaging book uncovers the ways in which formal education seems to hinder our natural curiosity and shows educators how to intentionally cultivate inquisitiveness and wonder in schools. It includes · Activities, ideas, and tips to encourage curiosity · Compelling examples of curiosity at work in schools, businesses, and communities · Tools for supporting curiosity in ways that spark meaningful conversations and promote empathy, equity, and social-emotional learning
