What can the great crises of the past teach us about contemporary revolutions? Arguing from an exciting and original perspective, Goldstone suggests that great revolutions were the product of 'ecological crises' that occurred when inflexible political, economic, and social institutions were overwhelmed by the cumulative pressure of population growth on limited available resources. Moreover, he contends that the causes of the great revolutions of Europe—the English and French revolutions—were similar to those of the great rebellions of Asia, which shattered dynasties in Ottoman Turkey, China, and Japan. The author observes that revolutions and rebellions have more often produced a crushing state orthodoxy than liberal institutions, leading to the conclusion that perhaps it is vain to expect revolution to bring democracy and economic progress. Instead, contends Goldstone, the path to these goals must begin with respect for individual liberty rather than authoritarian movements of 'national liberation.' Arguing that the threat of revolution is still with us, Goldstone urges us to heed the lessons of the past. He sees in the United States a repetition of the behavior patterns that have led to internal decay and international decline in the past, a situation calling for new leadership and careful attention to the balance between our consumption and our resources. Meticulously researched, forcefully argued, and strikingly original, *Revolutions*

and Rebellions in the Early Modern World is a tour de force by a brilliant young scholar. It is a book that will surely engender much discussion and debate.

This volume focuses on the role of motivational processes – such as goals, attributions, self-efficacy, outcome expectations, self-concept, self-esteem, social comparisons, emotions, values, and self-evaluations– in self-regulated learning. It provides theoretical and empirical evidence demonstrating the role of motivation in self-regulated learning, and discusses detailed applications of the principles of motivation and self-regulation in educational contexts. Each chapter includes a description of the motivational variables, the theoretical rationale for their importance, research evidence to support their role in self-regulation, suggestions for ways to incorporate motivational variables into learning contexts to foster self-regulatory skill development, and achievement outcomes.

From one of America’s most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie *The Hunt*. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale “has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill” (The Telegraph). “[A] tense, relentless story of

man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted.” —Criterion

## **Elements of Literature**

Eddie is a wounded war veteran, an old man who has lived, in his mind, an uninspired life. His job is fixing rides at a seaside amusement park. On his 83rd birthday, a tragic accident kills him, as he tries to save a little girl from a falling cart. He awakes in the afterlife, where he learns that heaven is not a destination. It's a place where your life is explained to you by five people, some of whom you knew, others who may have been strangers. One by one, from childhood to soldier to old age, Eddie's five people revisit their connections to him on earth, illuminating the mysteries of his "meaningless" life, and revealing the haunting secret behind the eternal question: "Why was I here?"
