The Athenaeum

The globalized use of language calls into question conventional ways of thinking in linguistics, applied linguistics and language pedagogy. This book critically examines this thinking from an historical, at times satirical, perspective and proposes an alternative conceptualization. The first section defines a number of key concepts about communication which are taken up in subsequent sections and shown to be relevant to the different but related areas of language study. Issues about the relationship between linguistics and applied linguistics set the scene for a discussion of the nature of discourse, and then how this bears on the understanding of the globalised use of English as a lingua franca. The final section considers the implications of this perspective on communication for how the subject of English language teaching might be redefined. The book is relevant for anyone who sees the need for a critical consideration of established concepts in linguistics and language pedagogy.

God's Traitors

For many Catholics, the Elizabethan "Golden Age" was an alien concept. Following the criminalization of their religion by Elizabeth I, nearly two hundred Catholics were executed, and many more wasted away in prison during her reign. Torture was used more than at any other time in England's history. While some bowed to the pressure of the government and new church, publicly conforming to acts of Protestant worship, others did not - and quickly found themselves living in a state

of siege. Under constant surveillance, haunted by the threat of imprisonment - or worse - the ordinary lives of these so-called recusants became marked by evasion, subterfuge, and constant fear. In *God's Traitors*, Jessie Childs tells the fascinating story of one Catholic family, the Vauxes of Harrowden Hall, from the foundation of the Church of England in the 1530s to the Gunpowder Plot of 1605, and their struggle to keep the faith in Protestant England. Few Elizabethans would have disputed that obedience was a Christian duty, but following the excommunication of Queen Elizabeth by Pope Pius V in 1570 and the growing anti-Catholic sentiment in the decades that followed, it became increasingly difficult for English Catholics to maintain a dual allegiance to their God and their Queen. Childs follows the Vauxes into the heart of the underground Catholic movement, exploring the conflicts of loyalty they faced and the means by which they exerted defiance. Tracing the family's path from staunch loyalty to the Crown, to passive resistance and on to increasing activism, Childs illustrates the pressures and painful choices that confronted the persecuted Catholic community. Though recusants like the Vauxes comprised only a tiny fraction of the Catholic minority in England, they aroused fears in the heart of the commonwealth. Childs shows how "anti-papery" became an ideology and a cultural force, shaping not only the life and policy of Elizabeth I, but also those of her successors. From clandestine chapels and side-street inns to exile communities and the corridors of power, *God's Traitors* exposes the tensions and insecurities that plagued Catholics living under the rule of Elizabeth I. Above all, it is a timely story of courage and concession, repression and reaction, and the often terrible consequences when religion and politics collide.

The Game of Our Lives

Cambridge English Key for Schools 2 contains four complete and authentic examination papers for Cambridge English: Key for Schools (KET for Schools). This collection is aimed at a young audience, and provides the most authentic exam preparation available. They allow candidates to familiarise themselves with the content and format of the examination and to practise useful examination techniques. This book contains a clear explanation of marking and grading, authentic sample answers, a comprehensive section of keys and recording scripts, and frameworks to help with thorough preparation for the Speaking test. An Audio CD containing the exam Listening material, a Student's Book without answers, and a Self-study Pack containing the Student's Book with answers and Audio CD are available separately.

Metaphor and Intercultural Communication

More than fifty specialists have contributed to this new edition of volume 2 of *The Cambridge Bibliography of English Literature*. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.

Using the concept of otherness as an entry point into a discussion of poetry, Jonathan Hart's study explores the role of history and theory in relation to literature and culture. Chapters range from trauma in Shakespeare to Bartolomé de Las Casas' representation of the Americas to the trench poets to voices from the Holocaust.

Charles I and the People of England

Many agree that the foreign aid system - which today involves virtually every nation on earth - needs drastic change. But there is much conflict as to what should be done. In *Aid on the Edge of Chaos*, Ben Ramalingam argues that what is most needed is the creative and innovative transformation of how aid works. Foreign aid today is dominated by linear, mechanistic ideas that emerged from early twentieth century industry, and are ill-suited to the world we face today. The problems and systems aid agencies deal with on a daily basis have more in common with ecosystems than machines: they are interconnected, diverse, and dynamic; they cannot be just simply re-engineered or fixed. Outside of aid, social scientists, economists, business leaders, and policy makers have started applying innovative and scientific approaches to such problems, informed by ideas from the 'new science' of complex adaptive systems. Inspired by these efforts, aid practitioners and researchers have started experimenting with such approaches in their own work. This book showcases the experiences, insights, and often remarkable results of innovative thinkers and practitioners who are working to bring these approaches into the mainstream of aid. From transforming child malnutrition to rethinking economic growth, from building peace to reversing desertification, from rural Vietnam to urban Kenya, the ideas of complex systems thinking are starting to be used to make foreign aid more relevant, more appropriate, and more catalytic. *Aid on the Edge of Chaos* argues that such ideas and approaches should play a vital part of the transformation of aid. Aid should move from being an imperfect post-World War II global resource transfer system, to a new form of global cooperation that is truly fit for the twenty-first century.

The New Cambridge Bibliography of English Literature: Volume 2, 1660-1800

This Handbook brings together leading historians of the events surrounding the English revolution, exploring how the events of the revolution grew out of, and resonated, in the politics and interactions of the each of the Three Kingdoms - England, Scotland, and Ireland. It captures a shared British and Irish history, comparing the significance of events and outcomes across the Three Kingdoms. In doing so, the Handbook offers a broader context for the history of the Scottish Covenanters, the Irish Rising of 1641, and the government of Confederate Ireland, as well as the British and Irish perspective on the English civil wars, the English revolution, the Regicide, and Cromwellian period. The Oxford Handbook of the English Revolution explores the significance of these events on a much broader front than conventional studies. The events are approached not simply as political, economic, and social crises, but as challenges to the predominant forms of religious and political thought, social relations, and standard forms of cultural expression. The contributors provide up-to-date analysis of the political happenings, considering the structures of social and political life that shaped and were re-shaped by the crisis. The Handbook goes on to explore the long-term legacies of the crisis in the Three Kingdoms and their impact in a wider European context.

English and Development

This volume reports research that informs the development of reading and listening assessment in IELTS. This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development.

Making Poetry Matter

The story of the reign of Charles I — told through the lives of his people. Prize-winning historian David Cressy mines the widest range of archival and printed sources, including ballads, sermons, speeches, letters, diaries, petitions, proclamations, and the proceedings of secular and ecclesiastical courts, to explore the aspirations and expectations not only of the king and his followers, but also the unruly energies of many of his subjects, showing how royal authority was constituted, in peace and in war — and how it began to fall apart. A blend of micro-historical analysis and constitutional theory, parish politics and ecclesiology, military, cultural, and social history, *Charles I and the People of England* is the first major attempt to connect the political, constitutional, and religious history of this crucial period in English history with the experience and aspirations of the rest of the population. From the king and his ministers to the everyday dealings and opinions of parishioners, petitioners, and taxpayers, David Cressy re-creates the broadest possible panorama of early Stuart England, as it slipped from complacency to revolution.

World Englishes: A Critical Analysis

Thoroughly updated and revised, *An Introduction to Sociolinguistics*, 7th Edition presents a comprehensive and fully updated introduction to the study of the relationship between language and society. Building on Ronald Wardhaugh's classic text, co-author Janet Fuller has updated this seventh edition throughout with new discussions exploring language and communities, language and interaction, and sociolinguistic variation, as well as incorporating numerous new exercises and research ideas for today's students. Taking account of new research from the field, the book explores exciting new perspectives drawn from linguistic anthropology, and includes new chapters on pragmatics, discourse analysis, and sociolinguistics and education. With an emphasis on using examples from languages and cultures around the world, chapters address topics including social and regional dialects, multilingualism, discourse and pragmatics, variation, language in education, and language policy and planning. A new companion website including a wealth of additional online material, as well as a glossary and a variety of new exercises and examples, helps further illuminate the ideas presented in the text. *An Introduction to Sociolinguistics*, 7th Edition continues to be the most indispensable and accessible introduction to the field of

sociolinguistics for students in applied and theoretical linguistics, education, and anthropology.

Cambridge English Preliminary 7 Student's Book with Answers

Metaphor and Intercultural Communication examines in detail the dynamics of metaphor in interlingual contact, translation and globalization processes. Its case-studies, which combine methods of cognitive metaphor theory with those of corpus-based and discourse-oriented research, cover contact linguistic and cultural contacts between Chinese, English including Translational English and Aboriginal English, Greek, Kabyle, Romanian, Russian, Serbian, and Spanish. Part I introduces readers to practical and methodological problems of the intercultural transfer of metaphor through empirical (corpus-based and experimental) studies of translators' experiences and strategies in dealing with figurative language in a variety of contexts. Part II explores the universality-relativity dimension of cross- and intercultural metaphor on the basis of empirical data from various European and non-European cultures. Part III investigates the socio-economic and political consequences of figurative language use through case studies of communication between aboriginal and mainstream cultures, in the media, in political discourse and gender-related discourses. Special attention is paid to cases of miscommunication and of deliberate re- and counter-conceptualisation of clichés from one culture into another. The results open new perspectives on some of the basic assumptions of the 'classic' cognitive paradigm, e.g. regarding metaphor understanding, linguistic relativity and concept-construction.

A Dictionary of Varieties of English

Winner of the BAAL Book Prize 2016 The field of "World Englishes" takes on ever more importance in the modern era. Mario Saraceni's World Englishes: A Critical Analysis looks at the developments in the field from a critical perspective. It examines the historical, linguistic, ideological and pedagogical aspects in the study of the ever-evolving forms, roles and statuses of English around the world. The principal aim is to offer a critical overview of the field in order both to inform readers about the main issues at stake and to challenge established positions and descriptive/analytical paradigms. The book has four sections, each of which reviews established accounts and offers alternative perspectives on those. "History" considers representations of the evolution of 'old English' and 'new Englishes' and begins to unveil the strong link between conventional accounts and ideological motivations. "Language" critically examines the traditional notion of

'difference' in the description of varieties of English, and discusses more recent orientations which aim to describe English as a lingua franca and the phenomenon of language hybridity. "Ideology†? examines ideological debates around the presence and status of English in the world, such as linguistic imperialism, language ownership and language ecology. The final section, "Pedagogy†? discusses pedagogical implications, such as the choice of appropriate 'models' of English and considers the possibility of teaching English as a fully de-anglicised language.

Language Policy in Higher Education

The Game of Our Lives is a masterly portrait of contemporary Britain through the lens of soccer. In the last two decades soccer in the United Kingdom has made the transition from a peripheral dying sport to the very center of British popular culture, from an economic basket-case to a booming entertainment industry that has conquered the world. What does it mean when soccer becomes so central to the private and public lives of the British people? Has it enriched this island nation or impoverished it? From the goals, to the players, to the managers, to the money, David Goldblatt describes how the English Premier League was forged by Margaret Thatcher's Britain and an alliance of the big clubs — Arsenal, Liverpool, Manchester United, Chelsea, Tottenham Hotspur — the Football Association and Rupert Murdoch's Sky TV. He identifies the real winners and losers in this extraordinary period, and explains how soccer has closely mirrored the wider political and social scene. Goldblatt argues that no social phenomenon tracks the momentous economic, social and political changes of post-Thatcherite Britain in a more illuminating manner than soccer, and The Game of Our Lives provides the definitive social history of the EPL — most popular soccer league in the world.

The Oxford Handbook of the English Revolution

This new book offers a timely and lively appraisal of the concept of communicative repertoires, resources we use to express who we are when in dialogue with others. Each chapter describes and illustrates the communicative resources humans deploy daily, but rarely think about – not only the multiple languages we use, but how we dress or gesture, how we greet each other or tell stories, the nicknames we coin, and the mass media references we make – and how these resources combine in infinitely varied performances of identity. Rymes also discusses how our repertoires shift and grow over the course of a lifetime, as well how a repertoire perspective can lead to a rethinking of cultural diversity and human interaction, from categorizing people's differences to understanding how our repertoires can expand and overlap with other, thereby helping us to find common ground and communicate in increasingly multicultural schools, workplaces, markets, and social spheres. Rymes affirms the importance of the communicative repertoires concept with highly engaging discussions and contemporary examples from mass media, popular culture, and everyday life. The result is a fresh and exciting work that will resonate with students and scholars in sociolinguistics, intercultural communication, applied linguistics, and education.

An Introduction to Sociolinguistics

This volume gathers contributions in the closely linked fields of English language assessment and language education. The contributors from China and Hong Kong represent a mixture of established and new scholars. Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula, as well as the huge field of China's vocational education curriculum. Regarding assessment, the contributions reflect major changes in the marking of examinations in Hong Kong, whereby all examinations from 2012 onwards are marked onscreen, to quality control issues in the administration of China's College English Test, which is taken by over 10 million candidates every year.

Security Protocols XX

In today's increasingly interconnected, knowledge-based world, language policy in higher education is rapidly becoming a crucial area for all societies aiming to play a part in the global economy. The challenge is double faceted: how can universities retain their crucial role of creating the intellectual elites who are indispensable for the running of national affairs and, at the same time, prepare their best-educated citizens for competition in a global market? To what extent is English really pushing other languages out of the academic environment? Drawing on the experience of several medium-sized language communities, this volume provides the reader with some important insights into how language policies can be successfully implemented. The different sociolinguistic contexts under scrutiny offer an invaluable comparative standpoint to understand what position can - or could - be occupied by each language at the level of higher education.

International Place Branding Yearbook 2012

Located at the junction of North America and the Caribbean, the vast territory of colonial Louisiana provides a paradigmatic case study for an Atlantic studies approach. One of the largest North American colonies and one of the last to be founded, Louisiana was governed by a succession of sovereignties, with parts ruled at various times by France, Spain, Britain, and finally the United States. But just as these shifting imperial connections shaped the territory's culture, Louisiana's peculiar geography and history also yielded a distinctive colonization pattern that reflected a synthesis of continent and island societies. Louisiana: Crossroads of the Atlantic World offers an exceptional collaboration among American, Canadian, and European historians who explore colonial and antebellum Louisiana's relations with the rest of the Atlantic world. Studying the legacy of each period of Louisiana history over the *longue durée*, the essays create a larger picture of the ways early settlements influenced Louisiana society and how the changes in sovereignty and other circulations gave rise to a multiethnic society. Contributors examine the workings of empire through the examples of slave laws, administrative careers or on-the-ground political negotiations, cultural exchanges among landowners, slave

holders, and slaves, and the construction of race through sexuality, marriage, and household formation. As a whole, the volume makes the compelling argument that one cannot write Louisiana history without adopting an Atlantic perspective, or Atlantic history without referring to Louisiana. Contributors: Guillaume Aubert, Emily Clark, Alexandre Dubé, Sylvia R. Frey, Sylvia L. Hilton, Jean-Pierre Le Glaunec, Cécile Vidal, Sophie White, Mary Williams.

Southeast Asia and the English School of International Relations

English Studies: The State of the Discipline, Past, Present, and Future

This book investigates the relationship between English and personal and national development, as this is both discursively promoted (particularly through language policy) and practically realized in developing societies. It addresses the effects that the increased use of English and the promotion of English-language education are having in developmental contexts, and their impact on broader educational issues, on local language ecologies and on questions of cultural identity. It investigates these issues by drawing together a series of original examinations and case studies by a range of leading scholars working in this burgeoning field. The chapters focus on a variety of contexts from around the world, and the volume as a whole surveys and critiques the positioning and influence of English as a catalyst for development in the 21st century.

Current debates on emerging powers as foreign aid donors often fail to examine the myriad geopolitical, geoeconomic and geocultural tensions that influence policies of Official Development Assistance (ODA). This book advocates a regional geopolitical approach to explaining donor-donor relationships and provides a multidisciplinary critical assessment of the contemporary debates on emerging powers and foreign aid, bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals (MDGs). Moving away from established debates assessing the advantages and disadvantages of foreign aid, this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as 'south-south' solidarity, shared development experience and 'multipolarity'. It analyses how donor governments 'sell' aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness, aid for trade, public-private partnerships, and green growth aid. The book examines the role of, and relationships between, the leading traditional and emerging power Asian donors specifically, and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients. This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development, uniquely approaching the debate from the perspective of emerging powers and donors.
