ESSENTIALS OF PERSONAL FINANCIAL PLANNING Essentials of Personal Financial Planning was written to challenge the status quo by promoting personal financial planning (PFP) as a profession, not as a sales tool to gather assets under management or facilitate sales of insurance products. The book takes a comprehensive and integrated approach to PFP for accounting students, allowing them to view the profession through the lens of a CPA - with integrity and objectivity. This book systematically introduces the essentials of all the major PFP topics (estate, retirement, investments, insurance, and tax), as well as: The PFP process, concepts and regulatory environment. Professional responsibilities of a CPA personal financial planner and the requirements of the Statement on Standards in PFP Services. Time value of money concepts. The book then builds on these foundational concepts, showing their interconnectivity and professional opportunities, to provide a deeper understanding of PFP and its application. After reading this book, students will be able to apply the knowledge and skills gained from this course to have an immediate and long-term positive impact for themselves and for the clients they serve.

It gives step-by-step guidance on: · how to trade on the stock market, whether it's going up or down; · successful stock investment strategies; · investing at minimum risk in traded options and futures; · buying bonds, gilts and interest-bearing deposits.

## **Strategic Management**

Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to

write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. Essentials of Management concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

## **Fundamentals of Investments**

A practical guide to getting personal investing right Somewhere along the way, something has gone very wrong with the way individuals save and invest. Too often, households are drawn in by promotional suggestions masquerading as impartial investment advice. Consumers get saddled with more risk than they realize. Authors Zvi Bodie and Rachelle Taqqu understand the dilemma that today's investors face, and with *Risk Less* and *Prosper* they will help you find your financial footing. Written in an accessible style, this practical guide skillfully explains why personal investing is all about you—your goals, your values and your career path. It shows how to understand investment risk and choose the particular blend of risk and safety that is right for you. And it lays out several simple yet powerful ways for small investors to cast a reliable safety net to achieve their financial goals and truly prosper. Coauthors Bodie and Taqqu challenge the myth that all investments require risk, then highlight some important risks that families often disregard when deciding where to put their money. Later, they connect the dots between investment and investor, showing us all how to grasp our own investment risk profiles and how we may use these insights to make more fitting investment choices. Outlines a straightforward way to invest by aligning your investments with your goals and the risk levels you can bear Provides basic investment abc's for readers who are otherwise literate Lays out a simple, actionable plan for achieving your goals Explains the role of risk-free assets and investment insurance in assuring that you reach your most essential goals Contrary to popular belief, investing doesn't have to be complicated. You can build wealth without taking great risks. *Risk Less* and *Prosper* will show you how to make investment decisions that will make your financial life less stressful and more profitable.

In *Asset Management: A Systematic Approach to Factor Investing*, Professor Andrew Ang presents a comprehensive, new approach to the age-old problem of where to put your money. Years of experience as a finance professor and a consultant have led him to see that what matters aren't asset class labels, but instead the bundles of overlapping risks they represent. Factor risks must be the focus of our attention if we are to weather market turmoil and receive the rewards that come with doing so. Clearly written yet full of the latest research and data, *Asset Management* is indispensable reading for trustees, professional money managers, smart private investors, and business students who want to understand the economics behind factor risk premiums, to harvest them efficiently in their portfolios, and to embark on the search for true alpha.

Filled with engaging, current examples drawn from the authors' ongoing involvement in the field, *Marketing Research Essentials* is a comprehensive text that teaches students how to become effective consumers of market research. The only book on the market co-authored by a full-time marketing researcher, McDaniel and Gates together bring their real-life, insider experiences from the industry to teach students how to make critical business decisions through the study of market research. Recognizing that marketing research is much more than computing sample size, learning SPSS, or conducting a focus group, the text shares with students all they need in research design, data acquisition, and data analysis, with a fresh dose of reality that is unmatched.

## **Essentials of Investments**

Written by authors of established texts in this area, this book is a companion volume to the classic *The Capital Budgeting Decision*. Exploring this key topic in corporate finance the authors examine the complexities of capital budgeting as well as the opportunities to improve the decision process where risk and time are important elements. Containing 'Global Aspects' sections that cover cross-border decision-making, this book also emphasizes the application of capital budgeting techniques to a variety of issues, including the hugely significant 'buy versus lease' decision that cost corporations billions each year. It gives in-depth coverage to: real options - the value of a project must take into consideration the flexibility that it provides management, acknowledging the option of making decisions in the future when more information is available decomposing cash flows - a project consists of many series of cash flows and each series deserves its own specific risk-adjusted discount rate. Decomposing the cash flows of an investment highlights the fact that while managers are generally aware that divisions and projects have different risks, too often they neglect the fact that the cash flow components may also have different risks, with severe consequences on the quality of the decision-making. Designed to assist those making business decisions at all levels, this volume is essential reading for all those working in or studying capital budgeting.

Pensions in the U.S. Economy is the fourth in a series on pensions from the National Bureau of Economic Research. For both economists and policymakers, this volume makes a valuable contribution to current research on pensions and the economics of the elderly. The contributors report on retirement saving of individuals and the saving that results from corporate funding of pension plans, and they examine particular aspects of the plans themselves from the employee's point of view. Steven F. Venti and David A. Wise offer a careful analysis of who contributes to IRAs and why. Benjamin M. Friedman and Mark Warshawsky look at the reasons more retirement saving is not used to purchase annuities. Personal saving through pension contribution is discussed by B. Douglas Bernheim and John B. Shoven in the context of recent government and corporate pension funding changes. Michael J. Boskin and John B. Shoven analyze indicators of the economic well-being of the elderly, addressing the problem of why a large fraction of the elderly remain poor despite a general improvement in the economic status of the group as a whole. The relative merits of defined contribution versus defined benefit plans, with emphasis on the risk aspects of the two types of plans for the individual, are examined by Zvi Bodie, Alan J. Marcus, and Robert C. Merton. In the final paper, pension plans and worker turnover are the focus of the discussion by Edward P. Lazear and Robert L. Moore, who propose pension option value rather than the commonly used accrued pension wealth as a measure of pension value.

AUSTRALIAN PROPERTY INVESTMENT AND FINANCING is a unique and timely book providing thorough analysis of income-producing properties in Australia. It is an essential guide to the selection and pricing of properties and property securities, as well as describing how they are financed. The book investigates how property investment markets operate in Australia, whilst demonstrating techniques for analysis and outlining recent research into the returns from and risks of rented properties. Written for both students and practising professionals, the book combines descriptive materials, contemporary financial concepts and worked numerical examples presented in three parts: Part 1 - concentrates on the evaluation of single properties, their loans and their taxation; Part 2 - explains more about measures of return and methods of forecasting for cash flow analysis, as well as risk analysis for single properties and portfolios; Part 3 - demonstrates how Australian property and mortgage-backed funds are established and financed, leading to methods of selecting and pricing these securities. The specialised, Australian focus of this work, rooted in international real estate investment principles and research, analyses Australian conditions, practice and laws in the wake of the global credit crisis. Patrick Rowland draws on three decades of experience as an academic, researcher and consultant in Australian property investment markets. Rowland's previous work, PROPERTY INVESTMENT AND THEIR FINANCING (1993 and 1997), has been thoroughly reworked and fully updated to provide a much-needed and timely Australian authority on property investment. For both professionals who advise on property investments and students of property finance, AUSTRALIAN PROPERTY INVESTMENT AND FINANCING is an essential resource.

### **The Art of Execution**

Over seven years, 45 of the world's top investors were given between \$25 and \$150m to invest by fund manager Lee Freeman-Shor. His instructions were simple. There was only one rule. They could only invest in their ten best ideas to make money. It seemed like a foolproof plan to make a lot of money. What could possibly go wrong? These were some of the

greatest minds at work in the markets today - from top European hedge fund managers to Wall Street legends. But most of the investors' great ideas actually lost money. Shockingly, a toss of a coin would have been a better method of choosing whether or not to invest in a stock. Nevertheless, despite being wrong most of the time, many of these investors still ended up making a lot of money. How could they be wrong most of the time and still be profitable? The answer lay in their hidden habits of execution, which until now have only been guessed at from the outside world. This book lays bare those secret habits for the first time, explaining them with real-life data, case studies and stories taken from Freeman-Shor's unique position of managing these investors on a day-to-day basis. A riveting read for investors of every level, this book shows you exactly what to do and what not to do when your big idea is losing or winning - and demonstrates conclusively why the most important thing about investing is always the art of execution.

The integrated solutions for Bodie, Kane, and Marcus' Investments set the standard for graduate/MBA investments textbooks. The unifying theme is that security markets are nearly efficient, meaning that most securities are priced appropriately given their risk and return attributes. The content places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures, options, and other derivative security markets than most investment texts. McGraw-Hill's adaptive learning component, LearnSmart, provides assignable modules that help students master chapter core concepts and come to class more prepared. In addition, resources within Connect help students solve financial problems and apply what they've learned. Bodie Investments' blend of practical and theoretical coverage combines with a complete digital solution to help your students achieve higher outcomes in the course. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.
