This book explores what is beautiful in English words by looking closely at the 100 loveliest of them selected by Dr. Robert Beard, formerly Dr. Language at yourDictionary.com and currently Dr. Goodword at alphaDictionary.com. The book begins with an essay on what makes words beautiful and a background essay on the relationships between European and Indian languages. This is followed by essays that examine the pronunciation, meaning, usage, and history of words like cynosure, desultory, ephemeral, gambol, petrichor, serendipity, and Susquehanna. Each word is accompanied by creative examples featuring Beard's regular cast of characters, including Natalie Cladd, Maude Lynn Dresser, Gilda Lilly and the twins, Rita and Rhoda Book.

Since not all graphic formats are of equal complexity, author John Miano does not simply choose a number of file formats and devote a chapter to each one. Instead, he offers additional coverage for the more complex image file formats like PNG (a new standard) and JPEG, while providing all information necessary to use the simpler file formats. While including the well-documented BMP, XBM, and GIF formats for completeness, along with some of their less-covered features, this book gives the most space to the more intricate PNG and JPEG, from basic concepts to creating and reading actual files. Among its highlights, this book covers: -- JPEG Huffman coding, including decoding sequential mode JPEG images and creating sequential JPEG files-- Optimizing the DCT-- Portable Network Graphics format (PNG), including decompressing PNG image data and creating PNG files-- Windows BMP, XBM, and GIF

Youth in Contemporary India

This New York Times bestseller "elegantly weaves evidence and insights . . . into a single, accessible historical narrative" (Bill Gates) and presents a captivating history of the universe -- from the Big Bang to dinosaurs to mass globalization and beyond. Most historians study the smallest slivers of time, emphasizing specific dates, individuals, and documents. But what would it look like to study the whole of history, from the big bang through the present day -- and even into the remote future? How would looking at the full span of time change the way we perceive the universe, the earth, and our very existence? These were the questions David Christian set out to answer when he created the field of "Big History," the most exciting new approach to understanding where we have been, where we are, and where we are going. In Origin Story, Christian takes readers on a wild ride through the entire 13.8 billion years we've come to know as "history." By focusing on defining events (thresholds), major trends, and profound questions about our origins, Christian exposes the hidden threads that tie everything together -- from the creation of the planet to the advent of agriculture, nuclear war, and beyond. With stunning insights into the origin of the universe, the beginning of life, the emergence of humans, and what the future might bring, Origin Story boldly reframes our place in the cosmos.

The Secrets We Keep

Three months after finding her fiancé in bed with another woman, Chloe Carver decides she needs a change and relocates from New York to London. Her hope is that she will become more daring and impulsive. What she doesn't expect is Jack, her hot rocker neighbor, who manages to turn her from a confident young woman into a bumbling fool at the sight of his crooked smile and gorgeous blue eyes. She makes the decision to avoid him at all costs, which seems like it could possibly work until she realizes that she is the new publicist for his band. Sparks quickly fly between Chloe and Jack and they jump head first into a relationship. Add in the never ending antics of Jack's band mates, a high maintenance actress and a playboy surfer and Chloe's life becomes more exciting than she ever thought it could be. Just when things seem to be going so well, a surprise visit from Chloe's ex will bring everything to a screeching halt. Will Jack and Chloe's relationship be strong enough to survive or will other factors be enough to tear them apart?

This book endeavors to be a study of identity in Indian urban youth. It is concerned with understanding the psychological themes of conformity, rebellion, individuation, relatedness, initiative and ideological values which pervade youths' search for identity within the Indian cultural milieu, specifically the Indian family. In its essence, the book attempts to explore how in contemporary India the emerging sense of individuality in youth is seeking its own balance of relationality with parental figures and cohesion with social order. The research questions are addressed to two groups of young men and women in the age group of 20-29 years-Youth in Corporate sector and Youth in Non Profit sector. Methodologically, the study is a psychoanalytically informed, process oriented, context sensitive work that proceeds via narrations, conversations and in-depth life stories of young men and women. Overall, the text reflects on the nature of inter-generational continuity and shifts in India.

A university is an institution for higher education and research. It can also be a place where academic brilliance leads to overinflated egos, bitter politics and finally, murder. Cirisha Narayanan, a professor who has risen meteorically, stumbles upon a cryptic message. Aditya Raisinghania, her banker husband, sets up a highly innovative financial hoax. Her profiteering father harvests Australia's largest bird—the emu—in India. The US elections are on and the debate on gun control has reached a fever pitch. Set in Mumbai, Coimbatore and Boston, Ravi Subramanian creates an impeccably researched world where everyone has a motive to kill. Nothing is as it seems in this cunningly vicious thriller where the plot turns on a dime.

Substantially revising and updating the classic reference in the field, this handbook offers a valuable overview and myriad details on current chemical processes, products, and practices. No other source offers as much data on the chemistry, engineering, economics, and infrastructure of the industry. The Handbook serves a spectrum of individuals, from those who are directly involved in the chemical industry to others in related industries and activities. It provides not only the underlying science and technology for important industry sectors, but also broad coverage of critical supporting topics. Industrial processes and products can be much enhanced through observing the tenets and applying the methodologies found in chapters on Green Engineering and Chemistry (specifically, biomass conversion), Practical Catalysis, and Environmental Measurements; as well as expanded treatment of Safety, chemistry plant security, and Emergency Preparedness. Understanding these factors allows them to be part of the total process and helps achieve optimum results in, for example, process development, review, and modification. Important topics in the energy field, namely nuclear, coal, natural gas, and petroleum, are covered in individual chapters. Other new chapters include energy conversion, energy storage, emerging nanoscience and technology. Updated sections include more material on biomass conversion, as well as three chapters covering biotechnology topics, namely, Industrial Biotechnology, Industrial Enzymes, and Industrial Production of Therapeutic Proteins.

Dehydroacetic acid (DHA) and its derivatives are a rich source of active compounds and have found broad applications in various fields due to their high chemical reactivity and physiological properties. Dehydroacetic Acid and Its Derivatives outlines the use of DHA and its derivatives for the synthesis of pharmacologically active heterocyclic compounds. Beginning with an introduction to the chemistry and reactivity of Dehydroacetic Acid, the book goes on to outline the key ring transformation reactions of DHA. The synthesis of various derivatives is then discussed, before a wide range of metal complexes of DHA are explored in detail. The book then concludes with a review of DHA's biological importance and its impressive range of pharmacological activities, including anti-cancer, anti-bacterial, anti-fungal and analgesic properties. For those researching the synthesis of bioactive heterocyclic compounds, Dehydroacetic Acid and Its Derivatives is a valuable guide conveying the fundamental knowledge needed to facilitate and enhance the successful synthesis of lead molecules. Gives detailed information of the underlying chemistry of Dehydroacetic acid and its derivatives Highlights

As a result, this series is indispensable for any student who intends to crack high-stakes examinations such as Joint Entrance Examination (JEE), National Talent Search Examination (NTSE), Olympiads-Junior/Senior /International, Kishore Vaigyanik Protsahan Yojana (KVPY), etc. The series consists of 12 books spread across Physics, Chemistry, and Mathematics for classes VII to X.

The 100 Most Beautiful Words in English

The Oxford Studies in Postcolonial Literatures series offers stimulating and accessible introductions to definitive topics and key genres and regions within the rapidly diversifying field of postcolonial literary studies in English. It is often claimed that unlike the British novel or the novel in indigenous Indian languages, Anglophone fiction in India has no genealogy of its own. Interrogating this received idea, Priyamvada Gopal shows how the English-language or Anglophone Indian novel is a heterogeneous body of fiction in which certain dominant trends and recurrent themes are, nevertheless, discernible. It is a genre that has been distinguished from its inception by a preoccupation with both history and nation as these come together to shape what scholars have termed 'the idea of India'. Structured around themes such as 'Gandhi and Fiction', 'The Bombay Novel', and 'The Novel of Partition', this study traces lines of influence across significant literary works and situates individual writers and texts in their historical context. Its emergence out of the colonial encounter and nation-formation has impelled the Anglophone novel to return repeatedly to the question: 'What is India?' In the most significant works of Anglophone fiction, 'India' emerges not just as a theme but as a point of debate, reflection, and contestation. Writers whose works are considered in their context include Rabindranath Tagore, Mulk Raj Anand, RK Narayan, Salman Rushdie, Nayantara Sahgal, Amitav Ghosh, Arundhati Roy, and Vikram Seth.
