Presenting real-life case studies of child sexual abuse in the Caribbean as a basis for discussing interventions and models of practice that are relevant for a wide range of cultural and social settings, this multi-disciplinary text will be of interest to scholars, professionals and practitioners alike. Contributors to this volume demonstrate how sexual abuse is never just a problem of the individual: structures of inequality and the intersection of the factors they give rise to help to explain why some children are more at risk of abuse than others. Furthermore, the sub-systems in which lives are lived can compound risk and vulnerability or alternatively, can be sources of support and change. This book draws on these ideas to discuss practice across a range of service users: children, adolescent girls, teenage mothers, children with learning disabilities, fathers, mothers, women who abuse, juvenile sex offenders and children in residential care. p>

In Frequently Asked Questions in Islamic Finance, industry expert Brian Kettell answers some of the most frequently asked questions from his many years experience in working and teaching in Islamic finance and banking. From knowledge of the Qu'ran and Sharia'a Law, to new and old Islamic financial concepts, Islamic terms, and Islamic financial instruments and services, this book covers all the key areas that practitioners need to Islamic finance. The book addresses individual questions such as "what is Takaful?", and provide answers

with a clear overview of the product or service, and an example, or illustration where appropriate, of how they work in practice. The book also features a question and answer section for readers to test and build their knowledge of the area. Light, entertaining and varied in its approach, Frequently Asked Questions in Islamic Finance will prove popular for experienced practitioners and novices alike.

Financial Accounting, an Integrated Approach

This book identifies and accounts for the characteristics of the contemporary city and of urban society. It analyzes the distribution and growth of settlements and explores the social and behavioral characteristics of urban living. The latest theoretical and empirical developments and insights are synthesized and presented in an accessible and engaging way. This second edition has been extensively updated and referenced. Each chapter includes sets of learning objectives, annotated readings and topics for discussion. Well-illustrated throughout, it will be essential reading for students of geography, sociology and development studies and all who seek an understanding of how the urban world has evolved and how it will change in the twenty-first century.

Accountability in Public Policy Partnerships

WHO has published a global TB report every year since 1997. The main aim of the report is to provide a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States and broader development goals set by the United Nations (UN). The 2018 edition of the global TB report was released on 18 September, in the lead up to the first-ever UN High Level Meeting on TB on 26 September 2018.

Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.

Financial Accounting: An Integrated Approach

Safe Management of Wastes from Health-care Activities

This sixth edition of Trotman's Financial Accounting: An Integrated Approach

incorporates comprehensive coverage of new issues in sustainability with a chapter dedicated to current and emerging issues, while building upon the approachable, user-friendly, Australian-focused style of previous editions. This new edition continues to provide students with a detailed understanding of the accounting framework in a balanced and engaging approach that provides non-accounting majors with enough details to understand and analyse company financial statements and provides accounting majors with a sound basis for future studies in accounting. Drawing on topical source documents and newspaper articles, Financial Accounting: An Integrated Approach, 6e makes accounting interesting and relevant. This edition features more management accounting topics as well as a new online Management Accounting supplement available separately.

Ethics and Auditing

Ethics and Auditing examines ethical challenges exposed by recent accounting and auditing 'lapses' through a study of interconnected moral, legal and accounting issues. The book aims to engage a broad readership in the discussion of audit failure and reform. With its range of intellectual and practical perspectives, Ethics and Auditing provides critical analyses of auditor independence, conflicts of interest, self-regulation, the setting and enforcing of auditing standards, and ethics education.

Nurturing Institutions for a Resilient Caribbean

Accounting Theory 5th edition is the new edition of the market leading theory textbook. The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment. Increasingly, students have failed to appreciate the relevance of studying accounting theory due to the esoteric nature of the discipline and its lack of any obvious correlation to a discrete accounting process. The new edition addresses this issue and makes the link to industry more clear through chapter vignettes and case studies. The new edition goes further to align the study of accounting theory to the professional environment domestically and internationally. To achieve this, the new edition includes a "International View" vignette in each chapter to profile the international response or thinking on relevant issues, 'Theory in Action' boxes illustrate the chapter material by way of presenting professional examples to build understanding and end of chapter case studies have developed and apply student understanding of the material. The new edition continues to provide the latest research and the most comprehensive discussion of material whilst maintaining its critical perspective.

Australian National Bibliography

Business scandals are always with us from the South Sea Bubble to Enron and Parmalat. As accounting forms a central element of any business success or failure, the role of accounting is crucial in understanding business scandals. This book aims to explore the role of accounting, particularly creative accounting and fraud, in business scandals. The book is divided into three parts. In Part A the background and context of creative accounting and fraud is explored. Part B looks

at a series of international accounting scandals and Part C draws some themes and implications from the country studies.

FINANCIAL ACCOUNTING

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Introduction to Information Retrieval

"The Guide on Resource Revenue Transparency" applies the principles of the revised IMF Code of Good Practices on Fiscal Transparency ('the Code') to the unique set of transparency problems faced by countries that derive a significant share of their revenues from natural resources and need to address complex and volatile transaction flows. The Guide identifies and explains generally recognised good or best practices for transparency of resource revenue management. It supplements the IMF Manual on Fiscal Transparency. The Guide has been revised to reflect the new Code and to provide more recent examples of good practice by individual countries. It is designed to give a framework for assessing resource-specific issues within broader fiscal transparency assessments (including so-called 'fiscal ROSCs'). The Guide has been used by the governments and legislatures of resource-rich countries, civil societies, providers of technical support, and interested academics and observers.

Islamic Finance in the Global Economy

Introduction to Islamic Banking and Finance is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent with the Sharia'a, a key element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Sharia'a contracts of Murabaha, Mudaraba, Musharaka, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Sharia'a law and Sharia'a boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and

growing market. Although estimates of the size of the Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

International Finance and Accounting Handbook

Reading the past, writing the future

This is the second edition of the WHO handbook on the safe, sustainable and affordable management of health-care waste--commonly known as "the Blue Book". The original Blue Book was a comprehensive publication used widely in health-care centers and government agencies to assist in the adoption of national guidance. It also provided support to committed medical directors and managers to make improvements and presented practical information on waste-management techniques for medical staff and waste workers. It has been more than ten years since the first edition of the Blue Book. During the intervening period, the requirements on generators of health-care wastes have evolved and new methods have become available. Consequently, WHO recognized that it was an appropriate time to update the original text. The purpose of the second edition is to expand and update the practical information in the original Blue Book. The new Blue Book is designed to continue to be a source of impartial health-care information and guidance on safe waste-management practices. The editors' intention has been to keep the best of the original publication and supplement it with the latest relevant information. The audience for the Blue Book has expanded. Initially, the publication was intended for those directly involved in the creation and handling of health-care wastes: medical staff, health-care facility directors, ancillary health workers, infection-control officers and waste workers. This is no longer the situation. A wider range of people and organizations now have an active interest in the safe

management of health-care wastes: regulators, policy-makers, development organizations, voluntary groups, environmental bodies, environmental health practitioners, advisers, researchers and students. They should also find the new Blue Book of benefit to their activities. Chapters 2 and 3 explain the various types of waste produced from health-care facilities, their typical characteristics and the hazards these wastes pose to patients, staff and the general environment. Chapters 4 and 5 introduce the guiding regulatory principles for developing local or national approaches to tackling health-care waste management and transposing these into practical plans for regions and individual health-care facilities. Specific methods and technologies are described for waste minimization, segregation and treatment of health-care wastes in Chapters 6, 7 and 8. These chapters introduce the basic features of each technology and the operational and environmental characteristics required to be achieved, followed by information on the potential advantages and disadvantages of each system. To reflect concerns about the difficulties of handling health-care wastewaters, Chapter 9 is an expanded chapter with new guidance on the various sources of wastewater and wastewater treatment options for places not connected to central sewerage systems. Further chapters address issues on economics (Chapter 10), occupational safety (Chapter 11), hygiene and infection control (Chapter 12), and staff training and public awareness (Chapter 13). A wider range of information has been incorporated into this edition of the Blue Book, with the addition of two new chapters on health-care waste management in emergencies (Chapter 14) and an overview of the emerging issues of pandemics, drug-resistant pathogens, climate change and technology advances in medical techniques that will have to be accommodated by health-care waste systems in the future (Chapter 15).

Accounting Theory

Since the original publication of *Allogeneic Stem Cell Transplantation: Clinical Research and Practice*, Allogeneic hematopoietic stem cell transplantation (HSC) has undergone several fast-paced changes. In this second edition, the editors have focused on topics relevant to evolving knowledge in the field in order to better guide clinicians in decision-making and management of their patients, as well as help lead laboratory investigators in new directions emanating from clinical observations. Some of the most respected clinicians and scientists in this discipline have responded to the recent advances in the field by providing state-of-the-art discussions addressing these topics in the second edition. The text covers the scope of human genomic variation, the methods of HLA typing and interpretation of high-resolution HLA results. Comprehensive and up-to-date, *Allogeneic Stem Cell Transplantation: Clinical Research and Practice, Second Edition* offers concise advice on today's best clinical practice and will be of significant benefit to all clinicians and researchers in allogeneic HSC transplantation.

Allogeneic Stem Cell Transplantation

Accounting 9th edition continues the strong reputation established by this leading Australian text as the most comprehensive book for students studying introductory accounting in undergraduate or postgraduate programs. The full-colour design and improved pedagogy provides students with a reader-friendly text to enhance their understanding of concepts and make their study more enjoyable. The text builds

on the thorough and reliable explanation of the accounting process through the Business Knowledge chapter vignettes that apply the principles to practice. Previous editions were renowned for the number of exercises and problems, and the new edition builds on this superior teaching feature. The end-of-chapter activities are designed to encourage student confidence through the development of skills in decision making, critical thinking, ethical thinking, analysis and communication.
