Examining science as a rhetorical enterprise, this book seizes upon one scientific essay—"The Spandrels of San Marco and the Panglossian Paradigm: A Critique of the Adaptationist Programme"—and probes it from many angles. Written by prominent evolutionary theorists Stephen Jay Gould and Richard C. Lewontin and first published in the Proceedings of the Royal Society of London in 1979, the "Spandrels" article is both serious science and vivid prose. Applying methods inspired by Louis Althusser, Michel Foucault, Jacques Derrida, Ferdinand de Saussure, and others, the contributors employ a range of interpretive strategies. Stephen Jay Gould adds his own comments, and the full text of the essay "Spandrels" is reproduced as an appendix. It's the latest and hottest technique, made possible only through digital. High Dynamic Range photography is the process of taking several pictures of a scene at various exposures, then merging them into one file. So the entire photo can look crisp and detailed, from highlights to midtones to shadows--and

photographers needn't sacrifice any part of their image. And the best way to master this exciting technology is with this thorough, easy-to-follow, and visually spectacular guide. No other title does justice to these cutting-edge techniques, which actually take the viewer into worlds far beyond normal photography--sometimes even beyond normal human perception. Ferrell McCollough, a widely respected photographer, pushes the boundaries and inspires others to pursue their artistic vision, too. The amazing results simply can't be achieved any other way.

Understanding Scientific Prose

In this now classic book, noted scholar and author Harry Blamires perceptively diagnoses some of the weaknesses besetting the church with insights as fresh and relevant today as they were in the 1960s. Arguing that a distinctively Christian reasoning has been swept away by secular modes of thought and politically correct assumptions, the author calls for the recovery of the authentically Christian mind. "America needs a shot of intellectual insulin directly to its oft-sleepy mind. Harry Blamires is calling out to Christians to think once again. To Blamires, Jesus is not some spongy source of giddy joy. He is the Christ--the hope of 'hard boiled' secularity." -Calvin Miller, Southwestern Baptist Theological Seminary "Must reading for those in places of spiritual leadership, and

in whose hands in borne the responsibility for the nurturing of Christians." -Pulpit Helps Harry Blamires is a highly respected teacher and author of more than thirty books. He has won a wide following of both British and American readers for his provocative works in theology, education, English literature, and fiction. His other works include Where Do We Stand?, On Christian Truth, and The Post-Christian Mind.

The Christian Mind

In 1992, Lois Duncan, acclaimed author of fictional suspense novels, wrote a horror story she could never have imagined writing—a true account of the murder of her own daughter, Kaitlyn Arquette. Kait, 18, was shot to death as she drove home from a friend's house on a Sunday evening in Albuquerque, New Mexico. Police closed the unsolved case as a “random shooting,” refusing to accept information that indicated otherwise, although it had all the earmarks of a professional hit. That first book, *WHO KILLED MY DAUGHTER?*, was Duncan's desperate attempt to motivate informants and prevent the facts of Kait's story from becoming buried. It turned out to accomplish much more than that. Duncan's new book, *ONE TO THE WOLVES: ON THE TRAIL OF A KILLER*, is even more horrifying than its predecessor as new information poured in, the family ran for their lives, and their original suspicions turned out to be the tip of an iceberg so immense that Kait, herself, could not have known how dangerous the information was that she had been sitting on in order to protect a now-estranged boyfriend. Since Kait didn't live to reveal it, her mother now does so in a book so intense and yet so painfully human that the reader will never forget it. All of the elements of a suspenseful mystery are here--intrigue, turns and twists, cover-ups, and page-turning action. The sobering fact is that, this time, the story isn't fiction.

This work responds to the need to find, in a sole document, the affect of oxidative stress at different levels, as well as treatment with antioxidants to revert and diminish the damage. Oxidative Stress and Chronic Degenerative Diseases - a Role for Antioxidants is written for health professionals by researchers at diverse educative institutions (Mexico, Brazil, USA, Spain, Australia, and Slovenia). I would like to underscore that of the 19 chapters, 14 are by Mexican researchers, which demonstrates the commitment of Mexican institutions to academic life and to the prevention and treatment of chronic degenerative diseases.

Earth, Spirit of Place

Rescued in 1972 from a storeroom in which rats and seeping water had severely damaged the fifty-year-old manuscript, this text is the earliest major work (1919-1921) of the great Russian philosopher M. M. Bakhtin. *Toward a Philosophy of the Act* contains the first occurrences of themes that occupied Bakhtin throughout his long career. The topics of authoring, responsibility, self and other, the moral significance of "outsideness," participatory thinking, the implications for the individual subject of having "no-alibi in existence," the difference between the world as experienced in actions and the world as represented in discourse—all are broached here in the heat of discovery. This is the "heart of the heart" of Bakhtin, the center of the dialogue between being and

language, the world and mind, "the given" and "the created" that forms the core of Bakhtin's distinctive dialogism. A special feature of this work is Bakhtin's struggle with the philosophy of Immanuel Kant. Put very simply, this text is an attempt to go beyond Kant's formulation of the ethical imperative. mci will be important for scholars across the humanities as they grapple with the increasingly vexed relationship between aesthetics and ethics.
