### **Factfulness**

The Perfect Score Project is an indispensable guide to acing the SAT – as well as the affecting story of a single mom’s quest to light a fire under her teenage son. It all began as an attempt by Debbie Stier to help her high-school age son, Ethan, who would shortly be studying for the SAT. Aware that Ethan was a typical teenager (i.e., completely uninterested in any test) and that a mind-boggling menu of test-prep options existed, she decided – on his behalf -- to sample as many as she could to create the perfect SAT test-prep recipe. Debbie’s quest turned out to be an exercise in both hilarity and heartbreak as she took the SAT seven times in one year and in-between “went to school” on standardized testing. Here, she reveals why the SAT has become so important, the cottage industries it has spawned, what really works in preparing for the test and what is a waste of time. Both a toolbox of fresh tips and an amusing snapshot of parental love and wisdom colliding with teenage apathy, *The Perfect Score Project* rivets. In the book Debbie does it all: wrestles with Kaplan and Princeton Review, enrolls in Kumon, navigates [khanacademy.org](http://khanacademy.org), meets regularly with a premier grammar coach, takes a battery of intelligence tests, and even cadges free lessons from the world’s most prestigious (and expensive) test prep company. Along the way she answers the questions that plague every test-prep rookie, including: “When do I start?” “Do the brand-name test prep services really deliver?” “Which should I go with: a tutor, an SAT class, or self study?” “Does test location really matter?” ... “How do I find the right tutor?” ... “How do SAT scores affect merit aid?” and “What’s the one thing I need to know?” *The Perfect Score Project*’s combination of charm, authority, and unexpected poignancy makes it one of the most compulsively readable guides to SAT test prep ever – and a book that will make you think hard about what really matters. From the Hardcover edition.

Intelligent test secrets revealed for the first time. This book uncovers the various types of questions that children are being asked on different intelligence and gifted programs evaluation tests and provides the tools that will allow children to excel and maximize their potential. Many grade-school children are required to take intelligence evaluation tests or gifted-program qualification tests. These tests are usually aimed at predicting the child's ability to participate and cope with tasks that require a high intelligence level. The tests pretend to be objectives and provide a non-biased indication of the child's ability. However, studies have shown that this is not the case, and children who were prepared and practice similar tests get significantly higher results. True, someone who is not intelligent will not be able to get high results even after massive training. Still, training allows gifted, intelligent children to realize their full ability and make the most of the stressful test situation; 10%-25% improvement is guaranteed for every child. In this book you will find over seventy sample tests, covering twelve different types of questions, including: \* General knowledge and vocabulary\* Verbal comprehension\* Conceptual relations\* Shape sequences and matrices \* Arithmetic problem solving and series \* Pattern recognition. In addition to the sample tests, a thorough explanation for all types of questions is provided, covering all possible variations, demonstrating the best methods and strategies and providing useful tips and tricks. This is the only available book that provides this kind of thorough preparation for all types of IQ tests, through fun parent-child quality-time bonding experiences.

### See Me After Class

INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” - Bill Gates  
“Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates  
"Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama  
Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance. Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.
