Two-way Talking with Parents of Special Children

Parents

Having children transforms us -- through the amazing power of our love for them and theirs for us, through the anger they can provoke, and because being good parents means we must accept that we are no longer children. In *As Good as I Could Be*, bestselling author Susan Cheever chronicles with passion and courage her own imperfect transformation, offering inspiration for other parents doing the best they can. By relating the trials and triumphs of raising a daughter and a son Cheever illuminates some basic truths learned along the way: a family should not be a democracy; teaching your children to celebrate their mistakes helps them forgive yours; and a damaged childhood is not a guarantor of bad parenting. With unflinching honesty, Cheever tackles tantrums, divorce, eating disorders, and

alcoholism, celebrating how she and her kids have weathered all this -- and more -- with love and respect intact.

Positive Parenting from A to Z

Challenges popular self-help trends from recent years to reveal how early

Actually, It Is Your Parents' Fault

All of Sewall Wright's published papers on evolution up to 1950, and a few published later, are gathered in this volume. William Provine's introductions to each paper include pertinent references to related portions of Provine's *Sewall Wright and Evolutionary Biology* and Wright's four-volume masterwork, *Evolution and the Genetics of Populations*. By comparing the papers in this volume with the corresponding topics in the larger work, it is possible to determine the respects in which Wright extended, changed, or remained constant in his ideas over a period of sixty years. Wright's shifting-balance theory of evolution, first conceived in 1925, has proved enormously useful in modern evolutionary biology. Wright's international prestige has never been higher than it is currently, and the time is ripe for a rereading of his seminal papers. These papers are not only historically important for understanding the period of the "evolutionary synthesis" of the 1930s and 1940s, but continue to be stimulating and useful to working evolutionary biologists today.

This volume brings together many of the important writings of Hans Loewald, one of the major theoreticians of psychoanalysis today. I have decided to tell the story of my life. I intend to include information about my parents and my brother, and as I recall various events, I will include stories about other relatives and friends as well. We were an especially close family and our lives always revolved around one another. I believe this closeness was fostered by the love my parents had for each other, and they passed this love to each of us. In addition, Tommy and I were highly respected and encouraged by Mom and Dad all through their lives. They loved to take credit for all we achieved, as well they should have. We always did the best we could. But they gave us the chance and the backing we needed. Especially because Tommy and I were deeply loved by our parents, we gained confidence and assurance. We knew where we stood from the beginning. And we could always count on Mom and Dad for anything we needed. In addition, my parents deeply loved their families. They passed on this love to us through their close relationships with their brothers, sisters, cousins, and relatives in Italy and Romania, as well as their many friends. Family came first all through our lives. There may have been disagreements, but they were only occasional and the closeness returned. We were always thrilled to receive letters from the relatives overseas and the letters were read word for word to each other. I always felt part of the larger family, even though I did not understand the language. My mother interpreted for us, so we knew what was said and what the news was. Since my brother Tommy died so suddenly on November 14, 2003, I have felt a loss so deep I sometimes feel I can barely continue. The hurt never goes away. I

want to share the reasons for my closeness to Tommy so our family and friends can better understand. For me, Tommy represented everything in life: my upbringing, my parents, and nearly all the things I experienced up to the present time. He was the one single family member to talk to who understood all of me. I never thought of life without Tommy. It has been a terrible blow, and of course I realize this is true for our family and friends, also. Further, since I have begun to think out what I want to write, I have expanded my goal to include additional stories and descriptions of our family, which will explain and bridge the generations of individuals who made up our lives. Perhaps other cousins and their children, and other friends, too, will be interested in my story. I hope to include pictures, letters, and other materials, which will be a history of our family to leave as my legacy to nieces and nephew and their children and to others. Even now, it is possible that only three great-grandchildren will remember my mother, their great-Grandma, GG. She loved them dearly, and I hope to leave them some wonderful memories and important information they can pass on to their children. I think they need to know where they came from down through our European roots and what our family was like. Otherwise, I am afraid all would be lost. Who will be left to tell our story? There are very few relatives left even now who remember. So, I have decided to try to tell this larger story in addition to describing my life. There are other persons who know some of my life's history, also, and as time permits, I will talk to them to add or correct information namely, Auntie Nina, Mom's sister, or her children; Jennie Ray, my first cousin and friend; and Octavia Lina Hirschmann,

Mom's first cousin. Or Octavia's children, Carol Borthwaite (Colorado) or Fred Hirschmann (Alaska). In addition, my sister-in-law, Joann, will be of help as needed to give information about Tommy. Joann will have her story to tell also. As time passes, there are fewer and fewer people to ask about our history, and I hope to be as accurate as possible. Most everyone I have talked to about this project has been supportive. Several have even said that they too would like to leave some history for their families.

It has often been said: Give a man a fish, and he has food for a day. Teach him to fish, and he can provide for himself over a lifetime. Raising a Responsible Child explains the phenomenon of the "overindulgent parent"--who helps and protects too much -- and the "underdeveloped child"--who never really learns to stand on his or her own feet. Today many parents are especially prone to shower their children with love and attention and attempt to minimize stress by doing for them. In the scurry of modern life, parents often can't resist giving in to children's demands or solving their problems just to keep the peace. While this is basically a loving approach, it does not teach children how to be responsible and independent. Parents learn the hard way that their overindulgence does more harm than good: their children will only come to them with more demands and act helpless in the face of new problems. If you find yourself entrenched in this pattern, you can change by using a system of consistent, straight forward, and logical rules every

day. You can teach your children to take responsibility for their actions and earn their privileges -- and you will find, perhaps to your surprise, that they are willing and ready to do so. Some of the issues this book will help you to deal with are: -- The whiny and overly demanding preschooler -- The small child who throws tantrums in public to get his way -- The older child who is inconsiderate of family members -- The teenager who is constantly late for school -- The young adult, who can't get her life together and mooches off her parents indefinitely. Many parents discover that the tried-and-true methods detailed here not only help their children handle emotions in a more mature and constructive manner but also result in higher self-esteem and a happier outlook on life.
