Depression and anxiety are now at epidemic levels. Why? Across the world, scientists have uncovered evidence for nine different causes. Some are in our biology, but most are in the way we are living today. Lost Connections offers a radical new way of thinking about this crisis. It shows that once we understand the real causes, we can begin to turn to pioneering new solutions - ones that offer real hope.

### America

When community and family support systems are weak or unavailable, and when internal resources fail, populations that

struggle with chronic, persistent, acute, and/or unexpected problems become vulnerable to physical, cognitive, emotional, and social deterioration. Yet despite numerous risk factors, a large number of vulnerable people do live happy and productive lives. This best-selling handbook examines not only risk and vulnerability factors in disadvantaged populations but also resilience and protective strategies for managing and overcoming adversity. This third edition reflects new demographic data, research findings, and theoretical developments and accounts for changing economic and political realities, including immigration and health care policy reforms. Contributors have expanded their essays to include practice with individuals, families, and groups, and new chapters consider working with military members and their families, victims and survivors of terrorism and torture, bullied children, and young men of color.

- This book received very high student evaluations when field-tested with students just beginning their study of research methods.
- Contains more than 60 new examples from recently published research. In addition, minor changes have been made throughout for consistency with the latest edition of the Publication Manual of the American Psychological Association.

### **Dust Bowl Diary**

Offers those who care for others and the planet a way to stay engaged, hopeful, balanced, and healthy when dealing with hardship, suffering, and trauma

- Deepens readers' understanding of the many ways they and their organizations may be impacted by dealing with trauma and suffering
- Uses moving first-person interviews and even cartoons to illuminate the idea of trauma stewardship

Working to make the world a more hopeful and sustainable place often means having to confront pain, suffering, crisis, and trauma head-on, day in and day out. Over months and years this takes an enormous

emotional, psychological, and physical toll, one that we're often not even fully aware of until the day we feel like we just can't go on anymore. And our well-being and the work we're doing are too important to risk that happening. This book is for all those who notice that they are not the people they once were or who are being told that by their families, friends, colleagues, or pets. Laura van Dernoot Lipsky takes a deep and sympathetic look at the many ways the stress of dealing with trauma manifests itself: feelings of helplessness and hopelessness, diminished creativity, chronic exhaustion, cynicism, and a dozen more. To keep from being overwhelmed, we need to respond to suffering in a thoughtful, intentional way—not by hardening our hearts or by internalizing others' struggles as our own but by developing a quality of compassionate presence. This is trauma stewardship. To help achieve this, Lipsky offers a variety of simple and profound practices, drawn from modern psychology and a range of spiritual traditions, that enable us to look carefully at our reactions and motivations and discover new sources of energy and renewal. She includes interviews with successful trauma stewards from different walks of life and even uses New Yorker cartoons to illustrate her points. "We can do meaningful work in a way that works for us and for those we serve," Lipsky writes. "Taking care of ourselves while taking care of others allows us to contribute to our societies with such impact that we will leave a legacy informed by our deepest wisdom and greatest gifts instead of burdened by our struggles and despair."

THE NEW YORK TIMES BESTSELLER FROM THE AUTHOR OF 10% HAPPIER Too busy to meditate? Can't turn off your brain? Curious about mindfulness but more comfortable in the gym? This book is for you. You'll also get access to guided audio meditations on the 10% Happier app, to jumpstart your practice from day one. ABC News anchor Dan Harris used to think that meditation was for people who collect crystals, play Ultimate Frisbee, and use the word "namaste" without irony. After he had a panic attack on live television, he went on a strange and circuitous journey that ultimately led him to become one of meditation's most vocal public proponents. Harris found that meditation made him more focused and less yanked around by his emotions. According to his wife, it also made him less annoying. Science suggests that the practice can lower your blood pressure, mitigate depression and anxiety, and literally rewire key parts of the brain. So what's holding you back? In *Meditation for Fidgety Skeptics*, Harris and Jeff Warren, a masterful teacher and "Meditation MacGyver," embark on a gonzo cross-country quest to tackle the myths, misconceptions, and self-deceptions that keep people from meditating. It is filled with game-changing and deeply practical meditation instructions—all of which are also available (for free) on the 10% Happier app. This book is a trip worth taking. Praise for *Meditation for Fidgety Skeptics* "If you're intrigued by meditation but don't know how to begin—or you've benefited from meditation in the past but need help to get started again—Dan Harris has written the book for you. ## **Debates and Proceedings of the Constitutional Convention of the State of California, Convened at the City of Sacramento, Saturday, September 28, 1878**

History is an account, either verbal or written, which describes past events, good or bad. In truth, most recorded history is a mostly false narrative of mostly unimportant occurrences which are the doings of czars, despots, and tyrants and their lackey soldiers. For the most part, right or wrong, history has always been written by the winners—of whatever contest. And therefore, since the ‘losers’ are irrelevant and meaningless, it may then take society many decades, or more, to finally learn that most things were done, not really as the supporters and academics had recorded them for posterity. History is more than just learning names, dates, and places. Real history is knowing why certain events happened at a certain given time in a particular certain place. And real history is admitting that the supposedly ‘greatest’ saviors of humanity were really mankind’s ‘greatest’ purveyors of human misery.

## **Grassroots Fascism**

A Pulitzer Prize-winning critic reflects on the meaning and emotional impact of a Bach masterwork. As his mother was dying, Philip Kennicott began to listen to the music of Bach obsessively. It was the only music that didn't seem trivial or irrelevant, and it enabled him to both experience her death and remove himself from it. For him, Bach's music held the elements of both joy and despair, life and its inevitable end. He spent the next five years trying to learn one of the composer's greatest keyboard masterpieces, the Goldberg Variations. In *Counterpoint*, he recounts his efforts to rise to the challenge, and to fight through his grief by coming to terms with his memories of a difficult, complicated childhood. He describes the joys of mastering some of the piano pieces, the frustrations that plague his understanding of others, the technical challenges they pose, and the surpassing beauty of the melodies, harmonies, and counterpoint that distinguish them. While exploring Bach's compositions he sketches a cultural history of playing the piano in the twentieth century. And he raises two questions that become increasingly interrelated, not unlike a contrapuntal passage in one of the variations itself: What does it mean to know a piece of music? What does it mean to know another human being?

## **The War that Saved My Life**

Grassroots Fascism profiles the Asia Pacific War (1937–1945)—the most important though least understood experience of Japan's modern history—through the lens of ordinary Japanese life. Moving deftly from the struggles of the home front to the occupied territories to the ravages of the front line, the book offers rare insights into popular experiences from the war's troubled beginnings through Japan's disastrous defeat in 1945 and the new beginning it heralded. Yoshimi Yoshiaki mobilizes diaries, letters, memoirs, and government documents to portray the ambivalent position of ordinary Japanese as both wartime victims and active participants. He also provides penetrating accounts of the war experiences of Japan's minorities and imperial subjects, including Koreans and Taiwanese. His book challenges the idea that the Japanese people operated as a mere conduit for the military during the war, passively accepting an imperial ideology imposed upon them by the political elite. Viewed from the bottom up, wartime Japan unfolds as a complex modern mass society, with a corresponding variety of popular roles and agendas. In chronicling the diversity of wartime Japanese social experience, Yoshimi's account elevates our understanding of "Japanese Fascism." In its relation of World War II to the evolution—and destruction—of empire, it makes a fresh contribution to the global history of the war. Ethan Mark's translation supplements the Japanese original with explanatory notes and an in-depth introduction that situates the work within Japanese studies and global history.

### **Becoming an Effective Policy Advocate**

WINNER OF THE 2017 PULITZER PRIZE GENERAL NON-FICTION From Harvard sociologist and MacArthur "Genius" Matthew Desmond, a landmark work of scholarship and reportage that will forever change the way we look at poverty in America In this brilliant, heartbreaking book, Matthew Desmond takes us into the poorest neighborhoods of Milwaukee to tell the story of eight families on the edge. Arleen is a single mother trying to raise her two sons on the \$20 a month she has left after paying for their rundown apartment. Scott is a gentle nurse consumed by a heroin addiction. Lamar, a man with no legs and a neighborhood full of boys to look after, tries to work his way out of debt. Vanetta participates in a botched stickup after her hours are cut. All are spending almost everything they have on rent, and all have fallen behind. The fates of these families are in the hands of two landlords: Sherrena Tarver, a former schoolteacher turned inner-city entrepreneur, and Tobin Charney, who runs one of the worst trailer parks in Milwaukee. They loathe some of their tenants and are fond of others, but as Sherrena puts it, "Love don't pay the bills." She moves to evict Arleen and her boys a few days before Christmas. Even in the most desolate areas of American cities, evictions used to be rare. But today, most poor renting families are spending more than half of their income on housing, and eviction has become ordinary, especially for single mothers. In vivid, intimate prose, Desmond provides a ground-level view of one of the most urgent issues facing America

today. As we see families forced into shelters, squalid apartments, or more dangerous neighborhoods, we bear witness to the human cost of America's vast inequality—and to people's determination and intelligence in the face of hardship. Based on years of embedded fieldwork and painstakingly gathered data, this masterful book transforms our understanding of extreme poverty and economic exploitation while providing fresh ideas for solving a devastating, uniquely American problem. Its unforgettable scenes of hope and loss remind us of the centrality of home, without which nothing else is possible.
