This is the first complete study of China's most popular eighteenth-century poet in any Western language. The work consists of a detailed biography, a study of Yuan's revolutionary reinterpretation of Chinese literary theory, and an analysis of his many contributions to the more original genres of Qing-dynasty (1644-1911) poetry such as narrative, historical, didactic, eccentric, and nature verse. The study is concluded by a generous and representative sampling of Yuan's poetry in translation, the first to do justice to the wide variety and richness of his oeuvre. Although many shorter poems are selected, this is the first translation to include his outstanding longer poetry. Harmony Garden will completely revise current attitudes in the west concerning classical

Chines literature during the eighteenth century, a period that was long viewed as one of decline, but now appears to equal the golden ages of antiquity.

Only in UAE, if you DARE Living in Harmony describes the life of the multi-national population in the United Arab Emirates of over 180 nationalities. The lifestyles of the rich and poor, the living standards, and measures used to evaluate an acceptable lifestyle are explored in concise language. The author looks back at her time in Abu Dhabi, and wishes that she had read a book like this. I wished I had the information prior to my move to the UAE area. I wanted others to be more informed of what to expect. Living in a materialist world seems to be taking away more and more of the humanities and spiritualities; thus the quality of life is declining. The series Living in Harmony is more of a fact-finding quest in countries of the Globe and is an attempt to scratch the surface and bring back the good old days of having

neighborhoods; neighbors who cared for each other, valuing humans for who they are; and shutting away the concepts and thoughts of discrimination. The author believes that living is valuing life, with all its spirituality and purity. Dr. Earth Globie counts her time in the UAE as a learning experience, as she saw firsthand the importance of rejecting all kinds of discrimination, including the lack of respect for Mother Earth. About the Author: Dr. Earth Globie is a university professor who resides in California but considers herself as a citizen of the Globe. She is writing her next book, Global Passport. The Harmony Search Algorithm (HSA) is one of the most well-known techniques in the field of soft computing, an important paradigm in the science and engineering community. This volume, the proceedings of the 2nd International Conference on Harmony Search Algorithm 2015 (ICHSA 2015), brings together contributions describing the latest developments in the field of soft computing with a special focus on HSA techniques. It includes coverage of new methods that have potentially immense application in various fields. Contributed articles cover aspects of the following topics related to the Harmony Search Algorithm: analytical studies; improved, hybrid and multi-

objective variants; parameter tuning; and large-scale applications. The book also contains papers discussing recent advances on the following topics: genetic algorithms; evolutionary strategies; the firefly algorithm and cuckoo search; particle swarm optimization and ant colony optimization; simulated annealing; and local search techniques. This book offers a valuable snapshot of the current status of the Harmony Search Algorithm and related techniques, and will be a useful reference for practising researchers and advanced students in computer science and engineering.
