The acclaimed author of *Ignore Everybody* is back with more irreverent wisdom, wit, and original cartoons. "It has never been easier to make a great living doing what you love. But to make it happen, first you need an EVIL PLAN. Everybody needs to get away from lousy bosses, from boring, dead-end jobs that they hate, and ACTUALLY start doing something they love, something that matters. Life is short." -Hugh MacLeod
Freud once said that in order to be truly happy people need two things: the capacity to work and the capacity to love. *Evil Plans* is about being able to do both at the same time. The sometimes unfortunate side effect is that others will hate you for it. MacLeod's insights are brash, wise, and often funny.

The Marvell family is on the move, driving from their Wisconsin farm to visit the children's grandmother in Virginia. The night before their departure, Mr. Marvell talks to Roger, Heather, and the twins about the wonders of the night sky and explains the zodiac — a beautiful trail traveled by the sun in the daytime and by the moon and planets at night. The pathway's 12 sections, called the "signs" of the zodiac, contain clusters of stars. Long ago shepherds and sailors identified the clusters with characters from mythology, and so the heavens became filled with gods and heroes, hunters, ploughmen, and archers as well as birds, bears, farm animals, and monsters. Upon the family's arrival in Virginia, Mr. Marvell sets up his telescope but he can't find the Crab —it has disappeared from the sky! Meanwhile, back in Wisconsin, a strange light emanates from the Marvells' house, illuminating every board, windowpane, shingle, brick, and stone. What could be causing it? A Newbery Honor book of 1947, this extraordinary tale by a noted American author is gloriously illustrated with woodcut-style scratchboard graphics.
