This book clarifies and verifies the role sport has as an alternative marker in understanding and mapping memory in Japan, by applying the concept of lieux de mémoire (realms of memory) to sport in Japan. Japanese history and national construction have not

been short of sports landmarks since the end of the nineteenth century. Western-style sports were introduced into Japan in order to modernize the country and develop a culture of consciousness about bodies resembling that of the Western world. Japan's modernization has been a process of embracing Western thought and culture while at the same time attempting to establish what distinguishes Japan from the West. In this context, sports functioned as sites of contested identities and memories. The Olympics, baseball and soccer have produced memories in Japan, but so too have martial arts, which by their very name signify an attempt to create traditions beyond Western sports. Because modern sports form bodies of modern citizens and, at the same time, offer countless opportunities for competition with other nations, they provide an excellent ground for testing and contesting national identifications. By revealing some of the key realms of memory in the Japanese field of sports, this book shows how memories and counter-memories of (sport) moments, places, and heroes constitute an inventory for identity. This book was originally published as a special issue of *Sport in Society*.

Craving Him

On one evening in Washington, DC, several high-ranking members of government disappear in a mass kidnapping. Among the kidnapped is Nick Rendel, a computer software coding expert in charge of drone programming and strategy. He is the victim with the most dangerous knowledge, including confidential passwords and codes that are used to program the drones. If revealed, his kidnappers could reprogram the drones to strike targets within the United States. Jon Smith and the Covert One team begin a worldwide search to recover the officials, but as the first kidnapping victims are rescued, they show disturbing signs of brainwashing or mind-altering drugs. Smith's investigation leads him to Fort Detrick, where a researcher, Dr. Laura Taylor, had been attempting to create a drug to wipe memory from soldiers suffering

from post-traumatic stress syndrome. But Dr. Taylor's research was suspended almost a year ago, when she was placed in a mental institution. Now, if Smith doesn't figure out the brainwashing drug, and track down the kidnapped Nick Rendel, the kidnappers will soon have the power to carry out drone strikes anywhere in the world.

The JF/J2F "Duck" was one of those military workhorses moving around in the background before and during WWII which did a tremendous job but never got the publicity of its' more glamorous teammates. Some said the Duck could be more aptly named the "Ugly Duckling." Be that as it may; when no other bomber could be found, it carried bombs; when no other transport could be found, it

transported; when no other photo plane could be found, it photographed and when no other rescuer could be found, it rescued. When it came to "Utility Craft," the JF/J2F was the definitive.

At one time in his life, author David K. Hudson was a college student who made the Deans List twice. But one January night, he made an errant decision that sent him to prison for life. In this inspirational memoir, Hudson takes youths on a journey to the other side of crime and the criminal justice system a story which often goes untold in the grandeur of rap music. His story travels through the daily life of incarceration, visitation, and the true rewards of street hustling. He shows what prison life is really about and the heartaches and the sufferings that result when one chooses to sell drugs, to commit crimes, to sell their body, or to take any of the other shortcuts street life offers in the pursuit of fast riches. In *Gangsta Rap for the Youth*, Hudson discusses the power of choice and the ability to reject crime. He makes a strong argument for regaining personal power and accepting the responsibility to be a productive member of society. This guide to self-empowerment communicates that youth have the ability to take control of their future and make the right choices in life.

As one part of your brain processes these words, another part of your brain is urging you to put the book down and focus on something more pressing. Get back to work on the budget due tomorrow. Answer e-mails growing stale in your inbox. Get off your rear and update that résumé. We're all guilty of it, especially in the business world. From Fortune 500 CEOs to assistants, we work to solve the most urgent problems first. That's because evolution has hardwired our brains to focus only on the immediate future, a survival technique that worked extremely well when predators

were lurking at every turn. But that was then, this is now. In the modern world, where life expectancies are long and physical perils rare (at least for people who buy books), it's not only possible to build a strong tomorrow without sacrificing today, but to actually increase the number of here-and-now victories by pursuing distant wins. That's where Long Fuse, Big Bang comes in--to help you work with that instinct to create and foster ideas that will lead to explosive professional results. Through proven case studies and personal experience, Dr. Eric Haseltine shows you how to neutralize the quick-fix way of thinking and actually use that desire to improve your chances of an enduring success. Rather than fight our most basic thought processes, this book will teach you how to work with your brain to light the long fuse, keep it smoldering, and ignite that "Big Bang" that will make history.

Robert Ludlum's (TM) The Geneva Strategy

All four of the bombers involved in 7/7, the deadly

attack on London's transport system in July 2005, were aged 30 or under. The spectre of extremist Islam looms large and Muslim youth in the UK are increasingly linked to radical Islamic movements. A clear, balanced examination of this complex issue is long overdue. Philip Lewis sets out to address this by looking at the lives and beliefs of young Muslims aged 18 to 30, against a backdrop of the problems any migrant community face. Beginning with an overview of British Muslim communities, he goes on to explore the nature of the intergenerational gap in the Muslim community, showing how normal tensions are exaggerated as children are educated in a language and culture different to that of their parents. Patriarchal 'clan politics' and a breakdown in communication between young Muslims and traditional Muslim leaders are dispossessing Islamic youth, leading a small but significant minority to turn to radical groups for somewhere to belong and something to believe in. Lewis concludes by identifying a generational shift from 'clan politics' to what he calls a 'new professionalism' and demonstrates how new organizations and networks of Muslim thinkers are springing up all the time - allowing young Muslims to find positive identities and outlets for their concerns and energies.

This book provides a contrast between a worldly life of learning and pleasure. This is not merely a book of poetry, but a serene place to align our minds with a union of words and images. Here, all the poems have their own melody which deal with simplicity of language, written on themes as mortality, love, life, death, the relationship of human spirit to the senses and so on. Imagery here is almost tangible; every image having a stamp of reality. It is meant to be a reminder to the readers of life's mystical elements, its beauty and darkness where truths are directed towards an undefined freedom, that each can partake.
