The Times Style and Usage Guide

It is estimated that 25% of all males have experienced symptoms of prostatitis at some time in their life and yet urologists rate this condition as one of the most difficult to manage in everyday practice. This disease therefore represents an immense socioeconomic burden while impacting severely on the quality of life of the sufferer. • First text to offer succinct, practical guidance on the management of this condition for urologists and family practitioners • Written by a world authority specifically to offer 'on the spot' guidance and management steps for the care team • Easy to read; easy to use - colour coding, key points, illustrations, tables and algorithms reinforce important messages and highlight areas of controversy

I jumped at the chance to shepherd this collection. This was personal for me. In the past, when I had prepared to teach courses on political leadership, I had come up with a dearth of recent scholarly attention to the topic. Perhaps my perspective on politics and leadership exacerbated the difficulty of my search. I had in mind a politics that touched all aspects of power and authority in our lives (not just government), encouraged the moral imagination, and affirmed human agency that could make the future better than the present. I searched with limited success for material that would explain how all of us shape and are shaped by politics. My perspective on leadership may have also hindered my search. I had in mind the simple notion of taking initiative on behalf of shared values. I found too little material about leadership that extended beyond the spectacle of authority and its assumption of hierarchy. I wanted to explain that each of us, regardless of our place in a hierarchy, has a calling to lead - to act on behalf of our moral imagination. Editing this volume permitted me the chance to develop the material I sought. I (as well as other teachers) no longer have a shortage of material relating politics and leadership with each other. From the Introduction

The Marriage Repair and Maintenance Manual is a self-help book for those who want to improve their marriages, avoid problems and fix those that have arisen. It is divided into two sections, basic principles and concepts, and a section of case studies with the author's comments. The author uses humor and case illustrations as well as his own cartoons to get his points across.

Gardening for Containers & Window Boxes

On the eve of the five hundredth anniversary of the discovery of the Americas, it bears remembering that in 1492, as Columbus was making his historic voyage, Europe was flourishing, at the very height of the Renaissance that transformed a continent. In art, politics, commerce, and society, the medieval world had given way to the modern era. But what was Europe really like then? What did London, Paris, Rome, and the other great centers of culture actually look like, and what was it like to travel from one to the other when the horse and the sailing ship were the most expeditious means available? How long would a typical journey take? Where would one stay and what could one eat along the way? And whom might one expect to meet? Both kings and pilgrims, to be sure. In Travel Guide to Europe

1492, the noted Italian historian Lorenzo Camusso offers modern-day readers and would-be adventurers ten itineraries for trips commonly taken in both the near and far reaches of fifteenth-century Europe. Whether Camusso's wayfarer is an ambitious young banker on the road From Florence to Bruges; the great painter Albrecht Rurer on his way from Nurember to Venice, a shipbuilder whose highly prized craft takes him from Seville to Antwerp via Barcelona, Beaune, and Paris; or a lonely pilgrim wandering from Vezelay to far-off Santiago de Compostela, he offers a vivid account of what such a journey would be like--the sights, sounds, perils, and pleasures--and in so doing he renders the very fabric of day-to-day life during this momentous ear in Europe's history.

Douglas Reeman writing as Alexander Kent with his fourteenth Bolitho novel with epic scenes of action, powerful characterisation and the authentic period detail that have made Alexander Kent a bestseller wherever sea stories are read. After eight years of war between Britain and France there is at last a rumour of peace. But the old enemies are well aware that any settlement will be only a breathing space in which to recover from their terrible losses. To obtain the best terms the French muster a show of strength from Biscay to the Channel ports. At the British Admiralty there are some who see a daring opportunity to even the score at any negotiation table - and who better to undertake it than the young Rear Admiral Bolitho! In June 1801 Bolitho's small squadron is still repairing the scars of battle earned at Copenhagen - and as he receives his orders from London Bolitho is, for the first time in his life, torn between the demands of duty and his real desire to marry. When the squadron sails it is joined by an additional ship, a frigate with many memories from the past. But where Bolitho's flag leads so his captains must follow, if necessary to the brink of disaster - for theirs is a tradition of victory.

"A lot of hard-won knowledge is laid out here in a brief but informative way. Every topic is well referenced, with citations from both the primary literature and relevant resources from the internet." Review from Nature Chemical Biology
Written by the founders of the SPARK program at Stanford University, this book is a practical guide designed for professors, students and clinicians at academic research institutions who are interested in learning more about the drug development process and how to help their discoveries become the novel drugs of the future. Often many potentially transformative basic science discoveries are not pursued because they are deemed 'too early' to attract industry interest. There are simple, relatively cost-effective things that academic researchers can do to advance their findings to the point that they can be tested in the clinic or attract more industry interest. Each chapter broadly discusses an important topic in drug development, from preclinical work in assay design through clinical trial design, regulatory issues and marketing assessments. After the practical overview provided here, the reader is encouraged to consult more detailed texts on specific topics of interest. "I would actually welcome it if this book's intended audience were broadened even more. Younger scientists starting out in the drug industry would benefit from reading it and getting some early exposure to parts of the process that they'll eventually have to understand. Journalists covering the industry (especially the small startup companies) will find this book a good reality check for many an over-hopeful press release. Even advanced investors who might want to know what really happens in the labs will find information here that might otherwise be difficult to track down in such a concentrated form."

Pathophysiology Made Incredibly Easy!

When we use language to interact with one another, we become involved in a continuous and dynamic process of exchange. This fact makes interpersonal communication a fascinating area for behavioral research. During the give-and-take of discourse, the communicators exchange facts, ideas, views, opinions, emotions, and intentions in such a way as to enhance or impede social relationships; create, maintain, and adapt identities; and create or resolve conflicts. In the APA Handbook of Interpersonal Communication, distinguished scholars apply the problem-solving perspectives of applied linguistics to answer fundamental questions. --
