## **Mastery**

The winning formula for success in algebra is practice, practice, practice! This book will help you increase your grasp of advanced algebra concepts. Numerous lessons will teach you such essential skills as transforming functions, completing the square, working with matrices, and determining probability. These lessons are accompanied by a variety of exercises to practice what you've learned, along with a complete answer key to check your work.

Throughout this book you will learn terms to further your understanding of algebra, and you will expand your knowledge of the subject through dozens of sample problems and their solutions. With the lessons in this book, you will find it easier than ever to grasp concepts in advanced algebra. And with hundreds of exercises for practice, you will gain confidence using your new algebra skills in your classwork and on exams. You'll be on your way to mastering these topics and more:

- Functions
- Exponential and logarithmic equations
- Arithmetic of complex numbers
- The factor theorem
- Polynomial and rational equations
- Regression equations
- Inferential statistics

The user-friendly pages are filled with easy-to-follow explanations of key algebra II concepts, followed by detailed examples that clearly demonstrate how to solve common problems. Hundreds of practice questions will help you master each concept, sharpen your problem-solving skills, and build confidence.

Features include:

- Topics aligned with national and state standards for algebra II courses
- Content focused on helping you excel in the classroom and on standardized tests
- Concise, clear explanations to easily grasp key concepts
- Thorough examples that illustrate how to solve typical algebra II questions
- More than 500 math problems that provide extensive opportunities to practice your new skills
- Helpful appendixes covering matrices and probabilities

Topics covered:

- Linear Equations and Inequalities
- Functions
- Quadratic Relationships
- Complex Numbers
- Polynomial Functions
- Rational and Irrational Functions
- Exponential and Logarithmic Functions
- Sequences and Series
- Trigonometry
- Descriptive Statistics
- Inferential Statistics

This new title in Barron's E-Z Series covers the following topics: Linear Functions, Absolute Value Functions, Polynomial Operations, Quadratic Functions, Complex Numbers, Functions and Relations, Polynomial Functions, Radicals, Rational Functions, Exponential Functions, Logarithmic Functions, Series and Sequences, and Statistics and Modeling. Review exercises are at the end of each chapter. The fast-growing E-Z Series presents new, updated, and improved versions of Barron's longtime popular Easy Way books. New cover designs, new interior layouts, and more graphic material than ever make these books ideal as self-teaching manuals. Teachers have discovered that E-Z titles also make excellent supplements to classroom textbooks. Skill levels range between senior high school and college-101 standards. All titles present detailed reviews of the target subject plus short quizzes and longer tests to help students assess their learning progress. All exercises and tests come with answers.

Boost your chances of scoring higher at Algebra II  
Algebra II introduces students to complex algebra concepts in preparation for trigonometry and calculus. In this new edition of Algebra II Workbook For Dummies, high school and college students will work through the types of Algebra II problems they'll see in class, including systems of equations, matrices, graphs, and conic sections. Plus, the book now comes with free 1-year access to chapter quizzes online! A recent report by ACT shows that over a quarter of ACT-tested 2012 high school graduates did not meet any of the four college readiness benchmarks in mathematics, English, reading, and science. Algebra II Workbook For Dummies presents tricky topics in plain English and short lessons, with examples and practice at every step to help students master the essentials, setting them up for success with each new lesson. Tracks to a typical Algebra II class Can be used as a supplement to classroom learning or for test prep Includes plenty of practice and examples throughout Comes with free access to chapter quizzes online Get ready to take the intimidation out of Algebra II!

## **Algebra 2**

From the bestselling author of *The 48 Laws of Power* and *The Laws of Human Nature*, a vital work revealing that the secret to mastery is already within you. Each one of us has within us the potential to be a Master. Learn the secrets of the field you have chosen, submit to a rigorous apprenticeship, absorb the hidden knowledge possessed by those with years of experience, surge past competitors to surpass them in brilliance, and explode established patterns from within. Study the behaviors of Albert Einstein, Charles Darwin, Leonardo da Vinci and the nine contemporary Masters interviewed for this book. The bestseller author of *The 48 Laws of Power*, *The Art of Seduction*, and *The 33 Strategies of War*, Robert Greene has spent a lifetime studying the laws of power. Now, he shares the secret path to greatness. With this seminal text as a guide, readers will learn how to unlock the passion within and become masters.
