Pedestrian accidents are one of the most prominent causes of premature injury, handicap and death in the modern world. In children, the problem is so severe that pedestrian accidents are widely regarded as the most serious of all health risks facing children in developed countries. This report provides an analysis of contemporary road safety education and establishes a framework within which further debate and research can take place.

Research on the roles played by hostility and anger in the etiology and course of coronary heart disease (CHD) has mushroomed. Moreover, there has been considerable progress in the knowledge of neurohormonal correlates of anger and hostility that could conceivably play a role in the pathogenesis of CHD. The editors of this volume believe that this is the appropriate time in the history of coronary-prone behavior research to take stock -- to identify the basic questions that need further elucidation, and to provide future direction. Although there is a surprising consensus among the contributors about the nature of the critical issues, they each offer a somewhat different perspective. This book will provide a variety of perspectives on what is known and what still needs to be known -- a useful source for promising research hypotheses.

Critics of intelligence tests writers such as Robert Sternberg, Howard Gardner, and Daniel Goleman have argued in recent years that these tests neglect important qualities such as emotion, empathy, and interpersonal skills. However, such critiques imply that though intelligence tests may miss certain key noncognitive areas, they encompass most of what is important in the cognitive domain. In this book, Keith E. Stanovich challenges this widely held assumption. Stanovich shows that IQ tests (or their proxies, such as the SAT) are radically incomplete as measures of cognitive functioning. They fail to assess traits that most people associate with good thinking, skills such as judgment and decision making. Such cognitive skills are crucial to real-world behavior, affecting the way we plan, evaluate critical evidence, judge risks and probabilities, and make effective decisions. IQ tests fail to assess these skills of rational thought, even though they are measurable cognitive processes. Rational thought is just as important as intelligence, Stanovich argues, and it should be valued as highly as the abilities currently measured on intelligence tests.

An eye-opening account of life inside North Korea—a closed world of increasing global importance—hailed as a “tour de force of meticulous reporting” (The New York Review of Books) NATIONAL BOOK AWARD FINALIST • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST In this landmark addition to the literature of totalitarianism, award-winning journalist Barbara Demick follows the lives of six North Korean citizens over fifteen years—a chaotic period that saw the death of Kim Il-sung, the rise to power of his son Kim Jong-il (the father of Kim Jong-un), and a devastating famine that killed one-fifth of the population. Demick brings to life what it means to be living under the most repressive regime today—an Orwellian world that is by choice not connected to the Internet, where displays of affection are punished, informants are rewarded, and an offhand remark can send a person to the gulag for life. She takes us deep inside the country, beyond the reach of government censors, and through meticulous and sensitive reporting we see her subjects fall in love, raise families, nurture ambitions, and struggle for survival. One by one, we witness their profound, life-altering disillusionment with the government and their realization that, rather than providing them with lives of abundance, their country has betrayed them. Praise for *Nothing to Envy* “Provocative . . . offers extensive evidence of the author’s deep knowledge of this country while keeping its sights firmly on individual stories and human details.”—The New York Times “Deeply moving . . . The personal stories are related with novelistic detail.”—The Wall Street Journal “A tour de force of meticulous reporting.”—The New York Review of Books “Excellent . . . humanizes a downtrodden, long-suffering people whose individual lives, hopes and dreams are so little known abroad.”—San Francisco Chronicle “The narrow boundaries of our knowledge have expanded radically with the publication of *Nothing to Envy*. . . . Elegantly structured and written, [it] is a groundbreaking work of literary nonfiction.”—John Delury, Slate “At times a page-turner, at others an intimate study in totalitarian psychology.”—The Philadelphia Inquirer

Child Development and the Aims of Road Safety Education

Millions of people, in the US and other parts of the world, face the grim prospect of losing their driving privileges, their mobility, and to a great extent their freedom, due to a deterioration in their eyesight or a disabling eye disease. Driving with

Confidence is an empowering tool. Its message is simple: In many cases, people with low vision can and do receive, retain and safely exercise their driving privileges. The book presents a clear, no-nonsense discussion on the realities of low vision conditions, together with a practical program designed to help low vision individuals maximize their chances of retaining and/or extending their driving privileges. It also provides a detailed description of driving vision regulations in every state in the US. Site of interest: www.BiopicDriving.org which is a non profit group concerned with advocating the use of bioptics for driving. Contents: The Freedom to Drive Vision and Driving — Facts and Fiction The Medical Side of Low Vision Thinking about Driving Getting Ready to Drive Learning to Drive On the Road — Driving with Low Vision If All Else Fails — How to Get Where You Want Without a Car Conclusion — Daring to Succeed Appendices: Federal Legislation Information/Aid Sources Terms You Should Know Low Vision Driving Aids State Vision Requirements Bibliography Index Readership: Visually impaired people and their families, optometrists, ophthalmologists, low vision researchers, legislators, DMV administrators and laypersons. Keywords: Low Vision; AMD; Biopic; Vision Aids; Driving and Vision; US Driving; Aging and Driving; Driving in America; Safe Driving Reviews: "... Local researcher, Dr Eli Peli, wrote 'Driving With Confidence' to help people with impaired vision stay on the road." NewsCenter 5's Heather Unruh Boston ABC affiliate WCVB Channel 5 "... we have found your book, 'Driving with Confidence: A Practical Guide to Driving with Low Vision', to be a wonderful resource." Joanne Schwartzberg, MD Director Aging and Community Health, American Medical Association's Older Drivers Project "This helpful book, printed in LARGE TYPE, contains facts, information, advice and reference materials that will enable those facing deterioration in their vision to make informed decisions about their ability to continue driving." Visionlink Newsletter of International Library, Archives & Museum of Optometry "Driving with Confidence fills a large gap in the low vision literature and provides a clearly written discussion of viable options and alternatives for driving with low vision ... because countries outside the US are also dealing with these same issues regarding drivers with low vision and the use of optical enhancement devices, I believe the material contained in Peli and Peli would be of strong interest internationally." Visual Impairment Research "The book is clearly written and well structured ... it will inform and empower its intended audience." CE Optometry "I will be enthusiastically recommending this book to my more astute patients (and their families) if they have a reasonable chance of being able to drive safely and legally and are trying to gain greater perspective than I can offer in a clinic visit. I will also recommend this book as a reference for any eye doctors, rehabilitation specialists, and driving instructors who work with a lot of partially sighted patients." Optometry and Vision Science "I strongly support the Peli's main advocacy theme, which is that visually impaired individuals should be afforded more opportunities to demonstrate their potential for safe driving ... I recommend this book to eye care practitioners as a useful source of information, and a resource to share with their visually-impaired patients." Do you study until you know the material backwards and forwards, but still have trouble passing your test? It's not your fault. There are tons of books and classes out there that will teach you how to learn and how to study, but that is only half of the equation. To do well on tests, you need to do more than study, you need to learn how to effectively take tests. This book will teach you how to develop the skills to be a confident and successful test taker. I have a two Masters' Degrees, a Bachelor's Degree, and I have tested for and obtained some very difficult professional certifications: Project Management Professional (PMP,) Certified Information Systems Security Specialist (CISSP,) Certified Strength and Conditioning Specialist (CSCS,) Advanced Emergency Medical Technician (AEMT,) Firefighter, and many others. In other words, I passed a lot of tests and I can teach you how you can do the same. I will teach you the things you need to do beyond merely studying, how to prepare and put yourself in the right mind set to ready to perform on test day. We will go over all sorts of different testing formats, from multiple choice to formal interviews and audits. I will give you tips and strategies on how to best approach each different style of test and how to maximize your time on test day. The tactics and techniques in this book are what I have distilled over three decades of taking some of the hardest tests out there. The concepts are easy, but it will take a lot of practice, and the sooner you get started the better, so open up to page one and let's get ready to Ace Your T

Safe at Home

On April 28, 1946, a small group of American wives and children arrived at the port of Bremerhaven, West Germany, the first of thousands of military family members to make the trans-Atlantic journey. They were the basis of a network of military communities--"Little Americas"--that would spread across the postwar German landscape. During a 45-year period which included some of the Cold War's tensest moments, their presence confirmed America's resolve to maintain Western democracy in the face of the Soviet threat. Drawing on archival sources and personal narratives, this book explores these enclaves of Americanism, from the U.S. government's perspective to the grassroots view of those who made their homes in Cold War Europe. These families faced many challenges in balancing their military missions with their daily lives during a period of dynamic global change. The author describes interaction in American communities that were sometimes separated, sometimes connected with their German neighbors.

In this brash and audacious debunking of the myths and manipulation that brought the world to oil addiction, alt fuel expert Marc J. Rauch brilliantly lays out how ethanol can change the planet for the better--and along the way helps us navigate the noise of petroleum advocates. The Ethanol Papers is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, The Ethanol Papers is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.

Teenagers are by far the most dangerous age group on the road: a 16-year-old is 12 times as likely as older drivers to die in a crash as a single occupant; put two young teens in a vehicle, and the odds of death and injury nearly double. Safe Young Drivers helps to address this enormous problem. It is an indispensable guide for teaching teens to drive. Intended for parents and teens to use together, it addresses parental issues such as how to choose a car for your teen, and provides teens with simple instruction and important tips to remember. With simple graphics, a complete index, and a section called Some ABCs for the Road, Safe Young Drivers is a valuable tool for all new drivers and their teachers.

The Complete Book of Locks and Locksmithing

A brazen guide for sane Americans to bypass trench warfare and win our life or death struggle for civilization. Are we in phase 8 of America's 250 year civil war? This book explores the possibility of using agility -- winning political battles with the shifting dexterity of jiu jitsu -- that never occurs to many politicians or strategists. Sure, talk show hosts milk each day's outrage for humor, indignation and ratings. But does anyone consider ways to get off the hoary, insipid "left-right political axis" and maneuver in three dimensions? Amid the latest tweet-storm and news-grabbing stunt, what pundit ever steps back to ask "Hey, what actually just happened?" Across today's fast-changing political landscape, Brin explores how to confront our neighbors not with familiar chasms, but commonalities - things both you and they know to be true. How to counter the all-out war against facts and all fact-using professions, including science and the "fake news" media. Using actual outcomes to demolish comfy oft-told narratives -- by seeking better strategies against deficits, at engendering a healthy economy and even at fostering open-creative-competitive enterprise. Polemical Judo ranges from electoral cheating to

the economy; from saving the planet to troubles with Russia and China; from conspiracies to racism, to forging a Big Tent Coalition. It also explores more extreme "exit strategies" -- impeachment, indictment, the 25th Amendment and all that, as well as incorporating bold ideas from Lincoln, FDR, MLK and the Greatest Generation. Because those brave geniuses fought earlier battles for us. And they won. plus tactics, tactics, tactics that you've never seen before. They might -- or might not work. But shouldn't someone at least try some of them? David Brin's best-selling novels include *The Postman* (filmed in 1997) plus explorations of our near-future in *Earth* and *Existence*. His award-winning novels and short stories explore vividly speculative ideas through a hard-science lens. His nonfiction book, *The Transparent Society*, won the American Library Association's Freedom of Speech Award for exploring 21st Century concerns about security, secrecy, accountability and privacy.

This book depicts the Indian Railways, part and parcel of the life of every Indian. The first part is a curious housefly's account of its journey on the Coromandel Express. Eager to see the world beyond its habitat, the fly sees many different places and people before the train is halted in the face of a super cyclone. What happens to the passengers? How do different people react in the face of disaster? Does anybody come to their aid? Can they resume their journey? The second part is a collection of fascinating threads interwoven into a beguiling narrative: • Why did the daughter of a Station Master vanish from the colony one fine morning • ?How a Station Master is tormented by a cobra's presence in his quarters. • Why a tea stall contractor invites the wrath of a Commercial Officer. • What happened to the coolie apprehended during a security drive? • Does the rodent elimination drive end in success or disaster? • Does the future son-in law of G.M Sahib get special treatment from the Railway staff? • How an old lady and a newly married girl display similar emotions when confronted by their spouses. • What happened to the family stuck in traffic congestion; do they make their train? The author, a retired Railway Officer, brings out the joys and woes, victories and failures of both railway main and rail users in a delightfully humorous style. The eventful journey on the Coromandel Express and the other stories about railway life, are bound to keep readers happily engaged to the very last page.
