### Dissertation Abstracts International

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report

makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

## **Brother to Brother**

This guide features step-by-step tutorials for mastering verbal, arithmetic, and clerical questions for entry-level civil service exams, advice on application procedures, and the inside scoop on the civil service job market.

## **West's federal supplement. [First Series.]**

Peterson's Master the Case Worker Exam provides you with an effective review of Hospital Environment, Social Services, and Eligibility Specialist case worker exams. Case workers play an essential role in helping people solve financial, health, and social problems and improving their ability to function within society. Peterson's guide will help to prepare you for your career as a case worker.

## **Federal Regulation of Methadone Treatment**

## **The General Statutes of Connecticut**

The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

## **New Directions in Child Abuse and Neglect Research**

Much of health care today involves helping patients manage conditions whose outcomes can be greatly influenced by lifestyle or behavior change. Written specifically for health care professionals, this concise book presents powerful tools to enhance communication with patients and guide them in making choices to improve their health, from weight loss, exercise, and smoking cessation, to medication adherence and safer sex practices. Engaging dialogues and vignettes bring to life the core skills of motivational interviewing (MI) and show how to incorporate this brief evidence-based approach into any health care setting. Appendices include MI training resources and publications on specific medical conditions. This book is in the Applications of Motivational Interviewing series.

### **Paralysis Resource Guide**

Provides the foundation for casework practice in Child Protective Services (CPS). Describes the basic stages of the CPS process and the steps necessary to accomplish successfully each stage: intake, initial assessment/investigation, family assessment, case planning, service provision, and evaluation of family progress and case closure. Designed primarily for CPS caseworkers, supervisors, and administrators. Glossary. Bibliography.

### **A Little Boy**

This book is a collection of true stories that happened in the life of the author Del Hart on a dairy farm in Central Pennsylvania. After Del was blessed with his own children, he would often lie with one of them in bed at bedtime and tell these stories loud enough in order that all four children could hear in the adjoining bedrooms before they went to sleep. All the stories deal with Del's family. His family consisted of his mom and dad, Judy, Rod, his twin sister Deb, and Matthew. Judy was three years older than Del, and Rod was one year older. Matthew was born fourteen years later than his other brothers and sisters. For this reason, Matthew is not mentioned in many of the stories. Even though the stories occur at different times in Del's early life, they all begin with the same sentence. Del's children loved this group of words and would often start the story by reciting this sentence. Their dad would then choose a story, from memory, and finish it. Del's children, Leah, Thomas, Lydia, and Timothy, heard one story each night and, in time, heard these stories many times. However, Picking Up Pears, The Bees Nest and Deb's Shoe, and The Cow Story were some of their favorites. Del would like to thank his children for the special times he shared with them during these bedtime stories. The stories you are about to read have all been heard by Del's children many times. Del hopes that you will enjoy these stories as his children did.

### **Becoming a Caseworker**

Religion, Welfare, and Social Service Provision: Common Ground delves deeply into the partnerships forged between

religious communities, government agencies and nonprofits to deliver social services to the needy. These pages offer a considered examination of how local faith entities have served those in their midst, and how the provision of those services has been impacted by evolving social policies. This foundational volume brings together the work of more than two dozen leading researchers, each providing long overdue scholarly inquiry into religiously affiliated helping and the many possibilities that it holds for effective cooperation.

### **Permanent Supportive Housing**

The present handbook offers, in a quick reference format, an overview of key considerations in the implementation of participatory responses to crime based on a restorative justice approach. Its focus is on a range of measures and programmes, inspired by restorative justice values, that are flexible in their adaptation to criminal justice systems and that complement them while taking into account varying legal, social and cultural circumstances. It was prepared for the use of criminal justice officials, non-governmental organizations and community groups who are working together to improve current responses to crime and conflict in their community

### **Master the Civil Service Exams**

Offers an in-depth overview of the position, including personal and academic qualifications for social work. Includes lists of professional organizations, sources of further information, samples of casework examinations and sample degree criteria.

### **Associate Park Service Worker**

### **Social Experimentation**

### **Working with the Courts in Child Protection**

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations

to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. New Directions in Child Abuse and Neglect Research recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. New Directions in Child Abuse and Neglect Research identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

## **U.S. Tax Treaties**

Provides guidance to nonlawyers who work with the judicial system. Provides general and background information about the various applicable court systems, explains recent developments in the laws affecting child protection, and presents practical examples and tips to enhance the professional's performance in court-involved cases. Bibliography, glossary, and list of resources.

## **Parenting Matters**

## **The Adventure of Lily's Meeting Her First Bestfriend**

## **Motivational Interviewing in Health Care**

Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services agencies, and medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. Violence in Families takes the first hard look at the successes and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law

enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. Violence in Families provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. Violence in Families discusses issues that underlie all types of family violence, such as the tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors--social services, health, and law enforcement settings--and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, Violence in Families synthesizes what is known and outlines what needs to be discovered. This volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

## **Labor Arbitration Information System**

## **Child Protective Services**

## **Protecting Children In Substance-abusing Families**

Since 1970 the United States government has spent over half a billion dollars on social experiments intended to assess the effect of potential tax policies, health insurance plans, housing subsidies, and other programs. Was it worth it? Was anything learned from these experiments that could not have been learned by other, and cheaper, means? Could the experiments have been better designed or analyzed? These are some of the questions addressed by the contributors to this volume, the result of a conference on social experimentation sponsored in 1981 by the National Bureau of Economic Research. The first section of the book looks at four types of experiments and what each accomplished. Frank P. Stafford examines the negative income tax experiments, Dennis J. Aigner considers the experiments with electricity pricing based on time of use, Harvey S. Rosen evaluates housing allowance experiments, and Jeffrey E. Harris reports on health experiments. In the second section, addressing experimental design and analysis, Jerry A. Hausman and David A. Wise highlight the

absence of random selection of participants in social experiments, Frederick Mosteller and Milton C. Weinstein look specifically at the design of medical experiments, and Ernst W. Stromsdorfer examines the effects of experiments on policy. Each chapter is followed by the commentary of one or more distinguished economists.

## **Handbook on Restorative Justice Programmes**

### **Old Assumptions, New Realities**

This book provides a clinical guide to the psychiatric assessment of infants and young children, birth through five years, and their families. It offers a comprehensive, data-rich framework for conducting mental health assessments of infants, toddlers, and preschoolers. The book includes a step-by-step guide for evaluation and assessment, reviewing relevant literature and best practices for working with very young children. It begins with an overview of the purpose and principles of psychiatric assessment and offers a protocol for planning and executing a thorough evaluation. Chapters examine critical aspects of the assessment process, including children's relationships with parents/caregivers, assessment of parents, cultural considerations, and play behaviors. Chapters also provide illustrative case vignettes and information on specialized tools that can be adapted for use in a private office or training clinic. Topics featured in this book include: Play-based assessment models for accessing the inner world of young children. The effect of caregivers and their reflective functioning on the mental health of young children. The use of adult-report rating scales in the clinical assessment of young children. Psychopharmacologic considerations in early childhood. The Clinical Guide to Psychiatric Assessment of Infants and Young Children is a must-have resource for researchers, clinicians, and related professionals, and graduate students in infancy and early childhood development, pediatrics, social work, psychiatry, and public health. "The volume is both highly practical and up to date, impressively bridging the gap between science and practice. The book is an invaluable guide for students and trainees and an important reference for seasoned clinicians." David Oppenheim, Ph.D., University of Haifa "The book integrates relational, developmental and social-emotional health dimensions within each chapter, reviewing subjective and objective measures in a range of domains. The book is clear and user-friendly. I wholeheartedly recommend it!" Daniel S. Schechter, M.D., New York University School of Medicine "This important new volume provides multiple perspectives on the entire range of assessment methods and procedures used in early childhood mental health. This is a vital read for students and practitioners." Charles H. Zeanah, M.D., Tulane University

### **Religion, Welfare and Social Service Provision**

Designed for professionals in the fields of child welfare, mental health, health care, education, law, the faith community &

substance abuse prevention & treatment. Intended to help identify the various forms of parental substance abuse. Includes a section addressing the identification of substance-abusing clients. Reviews the characteristics of substance-abusing parents. Glossary. Bibliography. Charts & tables.

## **Welfare, the Family, and Reproductive Behavior**

## **Violence in Families**

## **Disability, Work, and Cash Benefits**

## **The Guaranteed Income**

## **School, Family, and Community Partnerships**

With case table.

## **Master the Case Worker Exam**

The Story is fiction book base on two little girls forming a true friendship. Lily meeting her first best friend and finding many things in common. These two girls learn to value their friendship. Since Lily is new student to the school and became a over the night popular kid.

## **Elder Mistreatment**

The Paralysis Resource Guide, produced by the Christopher & Dana Reeve Foundation, is a reference and lifestyle tool for people affected by paralysis. The book includes details on medical and clinical subjects related to all causes of paralysis, as well as health maintenance information. The fully-illustrated book provides a detailed overview of biomedical research, assistive technology, sports and recreation activities, legal and civil rights, social security and benefits, and numerous

lifestyle options.

## **Journal of Human Services Abstracts**

Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

## **Administrative Report to the Commissioners**

## **Clinical Guide to Psychiatric Assessment of Infants and Young Children**

The Associate Park Service Worker Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: motor vehicle operations and maintenance; park operation and maintenance, gardening; supervision; report writing and forms completion; reading comprehension; number facility including addition, subtraction, multiplication and division; safety, operation and maintenance checks of duty trucks and equipment; cleaning of park grounds and facilities; transport, cutting, removal, planting and pruning of trees; supervising subordinate staff and small mobile crews; dispatching vehicles and equipment from garages; inspecting and replacing park and playground equipment; horticultural duties in park areas; general repair work in park buildings; playgrounds or on equipment; recordkeeping duties in facilities; safeguarding property; reporting unsafe conditions/unusual incidents; preparing requests and/or ordering equipment and supplies for facilities; setting up equipment for special events; standards of employee conduct; and more.

## **Fair Employment Practice Cases**

The design of welfare programs in an era of reform and devolution to the states must take into account the likely effects of programs on demographic behavior. Most research on welfare in the past has examined labor market issues, although there

have also been some important evaluations of the effects of the Aid to Families with Dependent Children Program on out-of-wedlock childbearing. Much less information is available on other issues equally central to the debate, including effects on abortion decisions, marriage and divorce, intrafamily relations, household formation, and living arrangements. This volume of papers contains reviews and syntheses of existing evidence bearing on the demographic impacts of welfare and ideas for how to evaluate new state-level reforms.

### **The Assets Perspective**

Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly, policy makers and practitioners have sought ways to protect older Americans from physical, psychological, and financial abuse. Yet, during the last 20 years fewer than 50 articles have addressed the shameful problem that abusers—and sometimes the abused themselves—want to conceal. *Elder Mistreatment in an Aging America* takes a giant step toward broadening our understanding of the mistreatment of the elderly and recommends specific research and funding strategies that can be used to deepen it. The book includes a discussion of the conceptual, methodological, and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects. It also looks at problems in determination of a report's reliability and the role of physicians, EMTs, and others who are among the first to recognize situations of mistreatment. *Elder Mistreatment in an Aging America* will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected, including family members, caregivers, and advocates for the elderly. It will also be of interest to researchers, research sponsors, and policy makers who need to know how to advance our knowledge of this problem.

### **The Survey**

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and

other housing models to scale to address housing and health care needs.

## **Biennial Report**

The economy's struggles to overcome the lingering effects of the Great Recession presented unique but essential questions. The book considers a full range of data which considers how this recent experience has impacted households, providing a thorough and contemporary treatment of how the assets perspective has prompted changes within social policy.

## **A Roadmap to Reducing Child Poverty**

The way Americans live and work has changed significantly since the creation of the Social Security Administration in 1935, but U.S. social welfare policy has failed to keep up with these changes. The model of the male breadwinner-led nuclear family has given way to diverse and often complex family structures, more women in the workplace, and nontraditional job arrangements. *Old Assumptions, New Realities* identifies the tensions between twentieth-century social policy and twenty-first-century realities for working Americans and offers promising new reforms for ensuring social and economic security. *Old Assumptions, New Realities* focuses on policy solutions for today's workers—particularly low-skilled workers and low-income families. Contributor Jacob Hacker makes strong and timely arguments for universal health insurance and universal 401(k) retirement accounts. Michael Stoll argues that job training and workforce development programs can mitigate the effects of declining wages caused by deindustrialization, technological changes, racial discrimination, and other forms of job displacement. Michael Sherraden maintains that wealth-building accounts for children—similar to state college savings plans—and universal and progressive savings accounts for workers can be invaluable strategies for all workers, including the poorest. Jody Heymann and Alison Earle underscore the potential for more extensive work-family policies to help the United States remain competitive in a globalized economy. Finally, Jodi Sandfort suggests that the United States can restructure the existing safety net via state-level reforms but only with a host of coordinated efforts, including better information to service providers, budget analyses, new funding sources, and oversight by intermediary service professionals. *Old Assumptions, New Realities* picks up where current policies leave off by examining what's not working, why, and how the safety net can be redesigned to work better. The book brings much-needed clarity to the process of creating viable policy solutions that benefit all working Americans. A West Coast Poverty Center Volume

## **Cumulative Book Index**

For nearly three decades, methadone hydrochloride has been the primary means of treating opiate addiction. Today, about

115,000 people receive such treatment, and thousands more have benefited from it in the past. Even though methadone's effectiveness has been well established, its use remains controversial, a fact reflected by the extensive regulation of its manufacturing, labeling, distribution, and use. The Food and Drug Administration regulates the safety and effectiveness of methadone, as it does for all drugs, and the Drug Enforcement Administration regulates it as a controlled substance. However, methadone is also subjected to a unique additional tier of regulation that prescribes how and under what circumstances it may be used to treat opiate addiction. Federal Regulation of Methadone Treatment examines current Department of Health and Human Services standards for narcotic addiction treatment and the regulation of methadone treatment programs pursuant to those standards. The book includes an evaluation of the effect of federal regulations on the provision of methadone treatment services and an exploration of options for modifying the regulations to allow optimal clinical practice. The volume also includes an assessment of alternatives to the existing regulations.
