A book of inspiration for everyone. Praise for Inspiration to Live Your MAGIC (TM) This book is filled with real life stories of courage, leadership, wisdom and love. A must read for all young people. Our world is a better place because of the choices each of these people made in their life journey. Jay Ball, President & CEO Junior Achievement of Northern Alberta Larry Anderson's own story is compelling and inspiring enough, never mind the stories contained in Inspiration to Live Your MAGIC (TM). From young people with a belief that child labour is wrong, to world class philosophers, Larry Anderson captures the spirit and essence of inspiration. In this volume you will find stories of children, women and men who followed their dreams. These inspired individuals changed their communities, their nation and the world. From politics, diplomacy, entertainment, the arts and science, their stories demonstrate the triumph of the human spirit. From the slums of Calcutta, to the halls of Government, the Courts and the glitz of Las Vegas, these individual stories are victories of faith over fear. A must read for all, this book is truly inspiring. Robert Philp Provincial Court Judge Edmonton, Alberta, Canada These seventy-five biographies showcase people from all age groups, backgrounds and cultures. What they share is a passion and commitment to make their dreams come true and to make a difference for others in the process. Read Inspiration to Live Your MAGIC (TM), you will be inspired. Bill Trainor, Retired Teacher I love the way "Inspiration to Live Your MAGIC (TM) is written. It captures your attention and is easy to read and understand. I not only learned but it evoked a yearning inside me to live my own magic. Thank you. Jeannie Lungard, Teacher, Psychologist

Interchange Teacher's Edition 3

One of the world's foremost nuclear physicists (celebrated for his theory of radioactive decay, among other accomplishments), George Gamow possessed the unique ability of making the world of science accessible to the general reader. He brings that ability to bear in this delightful expedition through the problems, pleasures, and puzzles of modern science. Among the topics scrutinized with the author's celebrated good humor and pedagogical prowess are the macrocosm and the microcosm, theory of numbers, relativity of space and time, entropy, genes, atomic structure, nuclear fission, and the origin of the solar system. In the pages of this book readers grapple with such crucial matters as whether it is possible to bend space, why a rocket shrinks, the "end of the world problem," excursions into the fourth dimension, and a host of other tantalizing topics for the scientifically curious. Brimming with amusing anecdotes and provocative problems, *One Two Three . . . Infinity* also includes over 120 delightful pen-and-ink illustrations by the author, adding another dimension of good-natured charm to these wide-ranging explorations. Whatever your level of scientific expertise, chances are you'll derive a great deal of pleasure, stimulation, and information from this unusual and imaginative book. It belongs in the library of anyone curious about the wonders of the scientific universe. "In *One Two Three . . . Infinity*, as in his other books, George

Gamow succeeds where others fail because of his remarkable ability to combine technical accuracy, choice of material, dignity of expression, and readability."
