English for Business Communication. Students Book.

ABOUT THE BOOK: This book includes practical tools for handling stress based on solid biblical principles. Christian families experience stress just like any other family. They go through crises and conflicts, sin and sickness, fear and failure. Children and teens wrestle with pressures their parents never imagined. Loving families sometimes fight. Faithful people still struggle with finances. Yes, being Christian does not exempt anyone from the stressors of regular life. At work, in school, and around the community, believing families struggle with many issues that add stress to their lives. This book speaks to parents, teens, and children. It can help adults in the workplace and kids in schools. Within these pages are solutions for resolving conflict, dealing with bullies, managing time and money, and building sound relationships. You will learn how to develop spiritual, physical, emotional, mental, and behavioral skills to manage life's stress effectively. No one can escape all the sources of stress, but you can discover God's guidance in achieving peace in the midst of turmoil.-----ABOUT THE AUTHOR: Dr. Jere Phillips has over forty years of experience in ministry, including service as a pastor, denominational leader, writer, and seminary professor. He has served at Mid-America Baptist Theological Seminary since 2001. Phillips earned his MDiv and PhD degrees from New Orleans Baptist Theological Seminary. Dr. Phillips also has written The Missionary Family: Managing Stress Effectively and Pastoral Ministry for the Next Generation. Jere and his wife, Glenda, have two married daughters and seven grandchildren.

The Limits of Defense

The Madman of Piney Woods

Chicago's extensive transit system first started in 1859, when horsecars ran on rails in city streets. Cable cars and electric streetcars came next. Where new trolley car lines were built, people, businesses, and neighborhoods followed. Chicago quickly became a world-class city. At its peak, Chicago had over 3,000 streetcars and 1,000 miles of track--the largest such system in the world. By the 1930s, there were also streamlined trolleys and trolley buses on rubber tires. Some parts of Chicago's famous "L" system also used trolley wire instead of a third rail. Trolley cars once took people from the Loop to such faraway places as Aurora, Elgin, Milwaukee, and South Bend. A few still run today.

While the elevated Chicago Loop is justly famous as a symbol of the city, the fascinating history of its subways is less well known. The City of Chicago broke ground on what would become the "Initial System of Subways" during the Great Depression and finished 20 years later. This gigantic construction project, a part of the New Deal, would overcome many obstacles while tunneling through Chicago's soft blue clay, under congested downtown streets, and even beneath the mighty Chicago River. Chicago's first rapid transit subway opened in 1943 after decades of wrangling over routes, financing, and logistics. It grew to encompass the State Street, Dearborn-Milwaukee, and West Side Subways, with the latter modernizing the old Garfield Park "L" into the median of Chicago's first expressway. Take a trip underground and see how Chicago's "I Will" spirit overcame challenges and persevered to help with the successful building of the subways that move millions. Building Chicago's subways was national news and a matter of considerable civic pride--making it a "Second City" no more!

Bob Odenkirk is a legend in the comedy-writing world, winning Emmys and acclaim for his work on Saturday Night Live, Mr. Show with Bob and David, and many other seminal TV shows. This book, his first, is a spleen-bruisingly funny omnibus that ranges from absurdist monologues ("Martin Luther King, Jr's Worst Speech Ever") to intentionally bad theater ("Hitler Dinner Party: A Play"); from avant-garde fiction ("Obituary for the Creator of Madlibs") to free-verse poetry that's funnier and more powerful than the work of Calvin Trillin, Jewel, and Robert Louis Stevenson combined. Odenkirk's debut resembles nothing so much as a hilarious new sketch comedy show that's exclusively available as a streaming video for your mind. As Odenkirk himself writes in "The Second Coming of Jesus and Lazarus," it is a book "to be read aloud to yourself in the voice of Bob Newhart."

“Wheel books” were once found in the uniform pockets of virtually all junior officers and many senior petty officers. Each small notebook was unique to the Sailor carrying it, but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties. Often used as a substitute for experience among neophytes and as a portable library of reference information for more experienced personnel, those weathered pages contained everything from the time of the next tide, to leadership hints from a respected chief petty officer, to the color coding of the phone-and-distance line used in underway replenishments. In that same tradition, the Naval Institute has created and aptly named the Wheel Book series, portable libraries culled from USNI’s vast array of information that has accumulated for more than a century. Articles from the Institute’s flagship publication Proceedings are combined with selections from USNI’s oral history program and from Naval Institute Press books to create unique guides on a wide array of relevant professional subjects. Just as the “wheel books” of yesterday served the fleet well, the Naval Institute Wheel Books of today provide supplemental information, pragmatic advice, and cogent analysis on topics important to modern naval professionals. The pinnacle of leadership in a military organization is command. Article 0801 of Navy Regulations defines both the authority and the responsibility of command as “absolute.” This Naval Institute Wheel Book provides practical guidance and food for thought that actual and would-be commanders can use to carry out that absolute authority while being absolutely responsible. Included in this specially-selected collection is the sage advice of those who have commanded as well as the expectations of those who are commanded. Aspirants as well as practitioners will do well to exploit this selected survey of what Fleet Admiral Chester Nimitz described as the “one purpose” for entering the Navy.

One of the early pioneers in the manufacture of trucks, Sterling is synonymous with rugged well-engineered trucks with a reputation for reliable service in off-road, heavy-duty applications—mining, construction, and logging. Distinctive engineering hallmarks included wood-lined frames and the continued use of chain drive long after its abandonment by other manufacturers. Established in Milwaukee, Wisconsin, production of Sternberg trucks began in 1907, becoming Sterling in 1915. Acquired by the White Motor Company in 1951, Sterling-White production ended in 1953. This Photo Archive chronicles this unique truck through large-format archival photographs and detailed captions.

ABOUT THE BOOK: Younger pastors are looking for practical help in the language of their generation. Pastoral Ministry for the Next Generation integrates contemporary issues and biblical principles. Pastors of all ages will find details for the "how to's" of nearly every aspect of church ministry. Pastoral ministry is timeless. Certain aspects of this life and work endure through all generations until the Lord returns. Yet, the milieu of ministry constantly changes. People expect their ministers to baptize them, marry them, and bury them, but marriage in today's culture involves questions for next-generation ministers that their grandfathers never imagined. Next-Gen ministry requires thoughtful processing of biblical foundations and contemporary applications. Dr. Jere Phillips has incorporated thirty years as pastor and over sixteen years of teaching young pastors to provide a biblically based, future-focused approach. This book was written for young pastors but can help ministers of any generation, especially new pastors. **** ABOUT THE AUTHOR: Dr. Jere Phillips has served churches as pastor and church staff member in several states and has preached in over 300 churches. He also was State Missions Director for the Tennessee Baptist Convention and Executive Director at the West Virginia Convention of Southern Baptists. In addition, he has been involved for many years in international missions work, training pastors and denominational leaders in 13 countries. A prolific writer, he has published over 200 articles and lessons with a total circulation of over 20 million. He is also the author of The Missionary Family: Managing Stress Effectively. He and his wife, Glenda, have two married daughters and seven grandchildren.

The Complete Book of Farmall Tractors details the complete evolution of the popular marque's iconic models. The engaging text includes series evolution, historical context, and technical details, accompanied by beautiful contemporary and historic images. In 1923, International Harvester revolutionized the tractor world by conceiving the Farmall brand, a revolutionary new line of all-purpose tractors designed for small- to medium-sized farms. Eventually offering an array of engine and equipment options, by the 1930s Farmalls were bestowed with letters as their model names, from the compact A, B, and C models to the larger H and M tractors. Fittingly known as the "Letter Series," the tractors were even given a streamlined design by famed industrial designer Raymond Loewy. Not surprisingly, they went on to become some of the most widely produced and best-selling American farm tractors of all time, to be followed beginning in 1954 with the numbered Hundred Series models. By 1947, Farmall had built over 1 million tractors. Amazingly, many are still in use today, not just as collector vehicles, but often as working farm tractors. In The Complete Book of Farmall Tractors, tractor historian Robert Pripps explores the entire range of Farmall tractors, from their inception to their final model year in 1973. Pripps includes all models, from Diesel and LPG versions to orchard tractors. Pripps also explains the evolution of Farmall lines and gives coverage to the entry-market Cub unveiled in 1947, as well as the Hundred Series, right up to the cancellation of the Farmall name in 1973. Through engaging text and fascinating photography, The Complete Book of Farmall Tractors preserves the story of the legendary pioneering machines in detail. The book's content is organized chronologically, and its detailed text shines a light on Farmall's long history and evolution. Beautiful images, both modern and historic, bring the story to life and thorough spec tables highlight key technical and performance specifications. The result is the ultimate reference to some of the most popular farm tractors in history.

Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and Environmental Innovation tells the story of how financial innovation – a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these

new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Stephanie Maher, endlessly improvisational, endlessly edgy, recently sponsored a new kind of movement exercise at her widely-regarded Stolzenhagen dance retreat: deconstructing and reconstructing books, especially books on contact, dance, and choreography. Her own contribution to the output - *Sorry, Bill* - tore apart her own correspondence around dance theory and (lovingly) one of the fundamentals of her choreographic education, only to reconstruct it all into a work of edgy improvisational collage. Stephanie's subtitle tells it all: - a project demanding practice and action over dead objects and ideas Maher's fans and students will love the abandon, the reckless ride through ideas, sexuality, art, dance, and movement. Newcomers will be fascinated by her madcap sense of play. Dance libraries everywhere will have to create a new call number to contain the stream of forthcoming books on contact and movement-inspired art. www.mead-hill.com
