Managing Criminal Justice Organizations

Introductory Criminology: The Study of Risky Situations takes a unique and intuitive approach to teaching and learning criminology. Avoiding the fragmentation of ideas commonly found in criminology textbooks, Marcus Felson and Mary A. Eckert develop a more practical, readable structure that engages the reader and enhances their understanding of the material. Their descriptive categories, simultaneously broad and realistic, serve better than the usual philosophical categories, such as "positivism" and "classicalism," to stimulate students' interest and critical thinking. Short chapters, each broken into 5-7 sections, describe situations in which crime is most likely to happen, and explain why they are risky and what society can and can't do about crime. They create a framework to organize ideas and facts, and then link these categories to the leading theories developed by criminologists over the last 100 years. With this narrative to guide them, students remember the material beyond the final exam. This fresh new text was created by two professors to address the main points they encounter in teaching their own criminology courses. Problems solved include: reluctant readers, aversion to abstract thinking, fear of theory, and boredom with laundry lists of disconnected ideas. Felson, a leader in criminology theory with a global reputation for innovative thinking, and Eckert, an experienced criminal justice researcher, are uniquely qualified to reframe criminology in a unified arc. By design, they offer abstractions that are useful and not overbearing; their prose is readable, and their concepts are easy to comprehend and remember. This new textbook challenges

instructors to re-engage with theory and present the essence of criminological thought for adult learners, coaching students to grasp the concept before any label is attached and allowing them to emerge with deeper understanding of what each theory means and offers. Lean, with no filler or fluff like stock photos, Introductory Criminology includes the authors' graphics to crystallize and expand concepts from the text.

Understanding Criminological Research

Why do individuals exposed to the same environment turn out so differently, with some engaging in crime and others abiding by societal rules and norms? Why are males involved in violent crime more often than females? And why do the precursors of serious pathological behavior typically emerge in childhood? *Criminals in the Making: Criminality Across the Life Course, Second Edition*, by John Paul Wright, Stephen G. Tibbetts, and Leah E. Daigle, addresses key questions surrounding criminal propensity by discussing studies of the life-course perspective—criminological research that links biological factors associated with criminality with the social and environmental agents thought to cause, facilitate, or otherwise influence a tendency towards criminal activity. The book provides comprehensive, interdisciplinary coverage of the current thinking in the field about criminal behavior over the course of a lifetime. Additionally, it highlights interventions proven effective and illustrates how the life-course perspective has contributed to a greater understanding of the causes of crime.

A unique text/reader that takes a comprehensive, interdisciplinary approach to the study of criminology Providing an

affordable alternative to the standard textbook, this new edition of the authors' popular text/reader provides instructors and students the best of both worlds – authored text with carefully selected accompanying readings. Now thoroughly updated with new articles, new content, and new statistics, tables, and figures, this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories, concepts, and research from sociology, psychology, genetics, evolutionary biology, and the neurosciences. The new edition is divided into 15 sections that mirror chapters in a typical criminology textbook. New to This Edition: A new Section 11 on Mass Murder and Terrorism makes coverage of these high-interest topics even more accessible. Section 10 now focuses only on murder, rape, robbery, aggravated assault, and domestic violence, making it easier for students to absorb the material. New articles appear in the structural theories section, the sections devoted to violent crime, and throughout the text/reader as needed. The authors now more closely link sections on types of crime to sections on theory to give readers a more cohesive understanding of the connections between the two. Contemporary criminologists' favored theories (drawn from a survey of 770 criminologists) now appear in a table to give readers insight into the professional opinion today on criminological theories. Features: Each Section has a 15-page introduction (a "mini-chapter") that contains vignettes, photos, tables and graphs, end-of-chapter questions, and Web exercises, followed by three to four supporting readings. Theory Section introductions contain a unique table that compares and contrasts the theories presented, while theory concluding sub-sections focus on policy and crime prevention. A "How to Read a Research Article" guide (which appears prior to the first reading) illustrates key aspects of a research article. The book's readings are drawn from carefully selected, edited journal articles appropriate for an undergraduate audience.

The SAGE Guide to Writing in Criminal Justice Research Methods

This highly acclaimed criminology text presents an up-to-date review of rational choice theories, including deterrence, shaming, and routine activities. It also incorporates current examples of deterrence research regarding domestic violence, drunk driving, and capital punishment, and features thought-provoking discussion of the relativity of crime. It examines contemporary efforts to redefine crime by focusing on family violence, hate crimes, white-collar misconduct with violent consequences, and other forms of human behavior often neglected by criminologists. Extensive discussion of evolving laws is included, and while the prevalence of the scientific method in the field of criminology is highlighted, the impact of ideology on explanations of crime is the cornerstone of the book. Comprehensive introductory textbook that looks at competing answers to the question, "Why do people commit crimes?" Student-friendly figures, features, highlights, and full-color photos. Each chapter includes learning objectives, discussion questions, and lists of key terms and concepts, key criminologists, and important legal cases. Introduction to Criminology

Introduction to Criminology, Why Do They Do It?, Second Edition, by Pamela J. Schram Stephen G.
