The Wednesday Wars

Unfaithful

In the three decades since the first SF film produced for television--1968's *Shadow on the Land*--nearly 600 films initially released to television have had science fiction, fantasy, or horror themes. Featuring superheroes, monsters, time travel, and magic, these films range from the phenomenal to the forgettable, from low-budget to blockbuster. Information on all such American releases from 1968 through 1998 is collected here. Each entry includes cast and credits, a plot synopsis, qualitative commentary, and notes of interest on aspects of the film. Appendices provide a list of other films that include some science fiction, horror, or fantasy elements; a film chronology; and a guide to alternate titles.

Take Me Out to the Ballgame

This is an anthology of 23 papers that were presented at the Thirteenth Cooperstown Symposium on Baseball and American Culture, held June 6-8, 2001, and co-sponsored by the State University of New York at Oneonta and the National Baseball Hall of Fame and Museum. Featuring keynote remarks from George Plimpton, author of *Home Run: The Best Writing About Baseball's Most Exciting Moment*, this Symposium examined such topics as baseball's myths, legends and tall tales. These essays, divided into sections titled "Mythic Heroes," "Media Mythology," "Myth and Mystery" and "Myths in Progress," go

beyond the quick and easy judgments of the media and offer instead the longer, more informed views of scholars and researchers.

Cyborgs, Santa Claus and Satan

A 2008 Newbery Honor Book In this Newbery Honor-winning novel, Gary D. Schmidt offers an unforgettable antihero. The Wednesday Wars is a wonderfully witty and compelling story about a teenage boy's mishaps and adventures over the course of the 1967-68 school year in Long Island, New York. Meet Holling Hoodhood, a seventh-grader at Camillo Junior High, who must spend Wednesday afternoons with his teacher, Mrs. Baker, while the rest of the class has religious instruction. Mrs. Baker doesn't like Holling—he's sure of it. Why else would she make him read the plays of William Shakespeare outside class? But everyone has bigger things to worry about, like Vietnam. His father wants Holling and his sister to be on their best behavior: the success of his business depends on it. But how can Holling stay out of trouble when he has so much to contend with? A bully demanding cream puffs; angry rats; and a baseball hero signing autographs the very same night Holling has to appear in a play in yellow tights! As fate sneaks up on him again and again, Holling finds Motivation—the Big M—in the most unexpected places and musters up the courage to embrace his destiny, in spite of himself.

The Legend of Bass Reeves

The Family You've Always Wanted

This is not a book about one thing. It's not a 250-page dissertation on leadership, teams or motivation. Instead, it's an agenda for building organizations that can flourish in a world of diminished hopes, relentless change and ferocious competition. This is not a book about doing better. It's not a manual for people who want to tinker at the margins. Instead, it's an impassioned plea to reinvent management as we know it—to rethink the fundamental assumptions we have about capitalism, organizational life, and the meaning of work. Leaders today confront a world where the unprecedented is the norm. Wherever one looks, one sees the exceptional and the extraordinary: Business newspapers decrying the state of

capitalism. Once-innovative companies struggling to save offsenescence. Next gen employees shunning blue chips for socialstart-ups. Corporate miscreants getting pilloried in the blogosphere. Entry barriers tumbling in what were once oligopolisticstrongholds. Hundred year-old business models being rendered irrelevantovernight. Newbie organizations crowdsourcing their most creativework. National governments lurching towards bankruptcy. Investors angrily confronting greedy CEOs and complacentboards. Newly omnipotent customers eagerly wielding their power. Social media dramatically transforming the way human beingsconnect, learn and collaborate. Obviously, there are lots of things that matter now. But in aworld of fractured certainties and battered trust, some thingsmatter more than others. While the challenges facing organizationsare limitless; leadership bandwidth isn't. That's why you have tobe clear about what really matters now. What are the fundamental,make-or-break issues that will determine whether your organizationthrives or dives in the years ahead? Hamel identifies five issuesare that are paramount: values, innovation, adaptability, passionand ideology. In doing so he presents an essential agenda forleaders everywhere who are eager to move from defense to offense reverse the tide of commoditization defeat bureaucracy astonish their customers foster extraordinary contribution capture the moral high ground outrun change build a company that's truly fit for the future Concise and to the point, the book will inspire you to rethinkyour business, your company and how you lead.

Baseball as America

Many feel bombarded by images and experiences of broken families. This is not how God intended families to be! So often we examine the traits of unhealthy families, but Gary Chapman paints a biblical portrait of what a loving, stable family looks like. This book is not just to be read, but experienced. Chapman details five timeless characteristics that create a healthy family environment: A heart for service Husbands and wives who relate intimately Parents who guide their children Children who obey and honor parents Husbands who love and lead In Dr. Chapman's own words, "What happens to your family does make a difference not only to you and your children, but to the thousands of young observers who are in search of a functional family."

There's trivia, and then there's knowledge—deep, extensive, obsessive knowledge—masquerading as trivia. It's the kind of trivia that, if you know the answer, makes you feel triumphant, and if you don't, gives you an education. The kind of trivia based not on what we shouldn't be expected to know, but on what we should—if we're to consider ourselves true fans. Dennis Purdy, author of the just-published *Team-by-Team Encyclopedia of Major League Baseball*, has been collecting baseball trivia since before he could shave, and now presents the best of the best: a massive collection of over 1,000 trivia games. Not solo questions, but half-page games, every one involving matching multiple players to their accomplishments, or evaluating multiple clues to discover a mystery subject's identity, or digging deep into a round-up of terms, nicknames, phrases, awards, events, individual teams, locations, and more. The games cover three centuries of baseball history. Home run calls and the announcers who made them famous. The peculiar geography of a baseball field—where's the garden? the gateway? the firing line? Inimitable slang: cackler, chucker, clinker, and squibber. The lesser-known career feats of

Leonard Maltin's Movie & Video Guide

This work focuses on the baseball movie genre in the years following World War II, beginning with the 1948 biopic *The Babe Ruth Story* and ending with the 1962 Mickey Mantle-Roger Maris vehicle *Safe at Home!*, when the consensus was that conflict should be limited in American society by emphasizing economic growth and a strong stand against Communism. This study of selected films indicates, however, that this strategy was not entirely effective; while offering a certain amount of nostalgia, these films could not provide shelter from the storm gathering in postwar America which challenged conventional ideas of race, gender and class and broke in the 1960s.

It Happens Every Spring

Since the first baseball movie (*Little Sunset*) was released in 1915, Hollywood has had an on-again, off-again affair with the sport. The resulting relationship has produced a wide array of films, some good (*Field of Dreams*, *Pride of the Yankees*), some obscure (*Roogie's Bump*, *Hot Curves*) and some flops (*The Slugger's Wife*, *The Babe Ruth Story*). This is a detailed look at the 81 baseball films released from 1915 through 1991. Each entry includes full cast and production credits, year of release, production company, a synopsis, and a critique of the movie. Behind-the-scenes and background information is included. A separate section examines baseball short subjects and baseball in nonbaseball films. An extensive bibliography completes the work.

Masters of Disaster

How to harvest water and nutrients, select drought-tolerant plants, and create natural diversity Because climatic

uncertainty has now become "the new normal," many farmers, gardeners and orchard-keepers in North America are desperately seeking ways to adapt their food production to become more resilient in the face of such "global weirding." This book draws upon the wisdom and technical knowledge from desert farming traditions all around the world to offer time-tried strategies for: Building greater moisture-holding capacity and nutrients in soils Protecting fields from damaging winds, drought, and floods Harvesting water from uplands to use in rain gardens and terraces filled with perennial crops Delecting fruits, nuts, succulents, and herbaceous perennials that are best suited to warmer, drier climates Gary Paul Nabhan is one of the world's experts on the agricultural traditions of arid lands. For this book he has visited indigenous and traditional farmers in the Gobi Desert, the Arabian Peninsula, the Sahara Desert, and Andalusia, as well as the Sonoran, Chihuahuan, and Painted deserts of North America, to learn firsthand their techniques and designs aimed at reducing heat and drought stress on orchards, fields, and dooryard gardens. This practical book also includes colorful "parables from the field" that exemplify how desert farmers think about increasing the carrying capacity and resilience of the lands and waters they steward. It is replete with detailed descriptions and diagrams of how to implement these desert-adapted practices in your own backyard, orchard, or farm. This unique book is useful not only for farmers and permaculturists in the arid reaches of the Southwest or other desert regions. Its techniques and prophetic vision for achieving food security in the face of climate change may well need to be implemented across most of North America over the next half-century, and are already applicable in most of the semiarid West, Great Plains, and the U.S. Southwest and adjacent regions of Mexico.

Born into slavery, Bass Reeves became the most successful US Marshal of the Wild West. Many "heroic lawmen" of the Wild West, familiar to us through television and film, were actually violent scoundrels and outlaws themselves. But of all the sheriffs of the frontier, one man stands out as a true hero: Bass Reeves. He was the most successful Federal Marshal in the US in his day. True to the mythical code of the West, he never drew his gun first. He brought hundreds of fugitives to justice, was shot at countless times, and never hit. Bass Reeves was a black man, born into slavery. And though the laws of his country enslaved him and his mother, when he became a free man he served the law, with such courage and honor that he became a legend.
