African Higher Education

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

Constitutionalism in Africa

The bestselling title, developed by International experts - now updated to offer comprehensive coverage of the core and extended topics in the latest syllabus. - Covers the core and supplement sections of the updated syllabus - Supported by the most comprehensive range of additional material, including Teacher Resources, Laboratory Books, Practice Books and Revision Guides - Written by renowned, expert authors with vast experience of teaching and examining international qualifications We are working with Cambridge International Examinations to gain endorsement.

Theory and Design of Digital Communication Systems

"Check your knowledge of all the essential syllabus content and concepts - Specifies the skills and knowledge that students need to acquire during the course - Highlights common misconceptions and errors - Tests knowledge with practice questions and answers at the back of the book - Get it right with common misconceptions and errors highlighted This title has not been through the Cambridge International Examinations endorsement process"--Publisher description.

The River and the Source

This report is a useful tool for countries starting to recycle aggregates or construction and demolition waste. It contains the latest developments in this field, introduces a completely new approach to the procedure of proportioning concrete mixtures with recycled aggregate, references recent publications, opinions and discrepancies in relation to the durability of recycled concrete, such as freeze-thaw standards, studies of chloride penetration and diffusion, and sulfate attacks, the use of the fine fraction This volume will be of interest to recyclers, researchers and consumers.

A Handbook for Curriculum and Instruction

Aviation 2009

This report aims to improve understanding of equity in tertiary enrollment in Sub-Saharan African countries, to examine the extent to which inequity inhibits the ability of African universities to effectively drive improvements in overall quality of life and economic competitiveness, and to identify effectiveness of government equity policies.

Mathematics Revision Guide: IGCSE

This collection of essays brings together critical and considered responses to matters of constitutionalism in the context of the most recent political evolutions in many African countries. They are concerned with the struggles for progressive constitutionalism, and review historical developments and future challenges. Some specific subjects discussed are: pan- Africanism and constitutionalism; culture, ethnicity and citizenship with reference to Ruanda and Senegal; equality, discrimination and constitutionalism in Muslim Africa; gender and affirmative action in post-1995 Uganda; constitution making in Eritrea; and the challenges of antiquated constitutional doctrines and values in Commonwealth Africa. The contributors are prominent scholars in the fields of politics, law and human rights and include Ola Abu Zeid, Antonia Kalu, Ali Mazrui, Oloka-Onyanyo and Sylvia

Tamale.

Learning Language Through Literature

Explores several facets of higher education in Africa, including a history of available resources, the scope of such education in each African nation, and current issues affecting the system.

Inheritance

First published in 1982, this work revolutionized the theory and practice of education reform. Now 25 years later, the fourth edition of Fullans groundbreaking book continues to be the definitive compendium to all aspects of the management of educational change--a powerful resource for everyone involved in school reform.

The New Meaning of Educational Change

As her beloved grandfather, chief of the Maori tribe of Whangara, New Zealand, struggles to lead in difficult times and to find a male successor, young Kahu is developing a mysterious relationship with whales, particularly the ancient bull whale whose leg

Social Protection, Growth and Employment

In 1995, this novel won both the Jomo Kenyatta Literature Prize, and the Commonwealth Writers Prize Best First Book in the Africa Region. Now reprinted, it remains in great demand. An epic story spanning cultures, it tells the lives of three generations of women. It traces the story of Akoko in her rich traditional Luo setting, through to the children who live and die in the 20th century.

Cambridge IGCSE Physics 3rd Edition plus CD

In January 2003, Kenya—seen as the most stable country in Africa—was hailed as a model of democracy after the peaceful election of its new president, Mwai Kibaki. By appointing respected longtime reformer John Githongo as anticorruption czar, the new Kikuyu government signaled its determination to end the corrupt practices that had tainted the previous regime. Yet only two years later, Githongo himself was on the run, having discovered that the new administration was ruthlessly pillaging public funds. "Under former President Moi, his Kalenjin tribesmen ate. Now it's our turn to eat," politicians and civil servants close to the president told Githongo. As a member of the government and the president's own Kikuyu tribe, Githongo was expected to cooperate. But he refused to be bound by ethnic loyalty. Githongo had secretly compiled evidence of official malfeasance and, at great

personal risk, made the painful choice to go public. The result was Kenya's version of Watergate. Michela Wrong's account of how a pillar of the establishment turned whistle-blower, becoming simultaneously one of the most hated and admired men in Kenya, grips like a political thriller. At the same time, by exploring the factors that continue to blight Africa—ethnic favoritism, government corruption, and the smug complacency of Western donor nations—It's Our Turn to Eat probes the very roots of the continent's predicament. It is a story that no one concerned with our global future can afford to miss.

A Historical Review and Analysis of Army Physical Readiness Training and Assessment

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over

decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other

professionals who seek to understand the nature and impact of examinations of different types and in different settings.†? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning “I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.†? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Public Examinations Examined

A critical analysis of the development of education in Kenya between 1895 and 1991.

Betrayal in the City

This useful sourcebook contains 12 chapters written by experienced classroom practitioners in Hong Kong. One theme appears constantly in these chapters: that in the English language classroom, whether at primary, secondary, or tertiary

levels, high interest and positive motivation occur through active learning when literary texts, literary techniques and literariness are featured. In this book, full coverage is given to the use of poetry, prose and drama in language learning and teaching at all three levels of the education system. The tasks and activities described here have been shown to work with all bands of students. This book is ideally suited both for practising teachers and participants in teacher education programmes in Hong Kong and the rest of S.E. Asia. It will be particularly useful for primary and secondary teachers of English wishing to incorporate appropriate and relevant teaching activities so as to meet the goals of the new Target Oriented English Language Curriculum.

Politics and Governance of Basic Education

The Koopman Operator in Systems and Control

Providing the underlying principles of digital communication and the design techniques of real-world systems, this textbook prepares senior undergraduate and graduate students for the engineering practices required in industry. Covering the core concepts, including modulation, demodulation, equalization, and channel coding, it provides step-by-step mathematical derivations to aid understanding of

background material. In addition to describing the basic theory, the principles of system and subsystem design are introduced, enabling students to visualize the intricate connections between subsystems and understand how each aspect of the design supports the overall goal of achieving reliable communications. Throughout the book, theories are linked to practical applications with over 250 real-world examples, whilst 370 varied homework problems in three levels of difficulty enhance and extend the text material. With this textbook, students can understand how digital communication systems operate in the real world, learn how to design subsystems, and evaluate end-to-end performance with ease and confidence.

It's Our Turn to Eat

This guide helps educators implement a continuous school improvement system through application of the seven correlates of effective schools. The authors discuss each correlate, update the knowledge base, and incorporate practical ideas from practitioners in the field. A comprehensive description of practices enables educators to build and sustain a school culture that accommodates the learning expectations and needs of all students.

The Idea of History

Newly restored and re-edited edition of the philosophic classic.

Medieval Literature and Civilization

This book provides a broad overview of state-of-the-art research at the intersection of the Koopman operator theory and control theory. It also reviews novel theoretical results obtained and efficient numerical methods developed within the framework of Koopman operator theory. The contributions discuss the latest findings and techniques in several areas of control theory, including model predictive control, optimal control, observer design, systems identification and structural analysis of controlled systems, addressing both theoretical and numerical aspects and presenting open research directions, as well as detailed numerical schemes and data-driven methods. Each contribution addresses a specific problem. After a brief introduction of the Koopman operator framework, including basic notions and definitions, the book explores numerical methods, such as the dynamic mode decomposition (DMD) algorithm and Arnoldi-based methods, which are used to represent the operator in a finite-dimensional basis and to compute its spectral properties from data. The main body of the book is divided into three parts: theoretical results and numerical techniques for observer design, synthesis analysis, stability analysis, parameter estimation, and identification; data-driven techniques based on DMD, which extract the spectral properties of the Koopman operator from data for the structural analysis of controlled systems; and

Koopman operator techniques with specific applications in systems and control, which range from heat transfer analysis to robot control. A useful reference resource on the Koopman operator theory for control theorists and practitioners, the book is also of interest to graduate students, researchers, and engineers looking for an introduction to a novel and comprehensive approach to systems and control, from pure theory to data-driven methods.

The Archaeology of Mobility

This book is open access under a CC BY 4.0 license. Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the “Silicon Savannah”. The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

Death at the Well

These original contributions to the study of medieval literature and civilization in Britain and Scandinavia are published as a memorial to Norman Garmonsway, Chair of English at King's College, University of London, who died in 1967. The aim has been to offer to the public a book of essays which have a direct bearing upon his central academic interests and which is thus structured, in some measure, after his mind. He saw the study of the language and literature (together with the history and archaeology) of early Britain and Scandinavia as forming a single coherent discipline and this conception of unity in diversity can be glimpsed both in the range of matters which he chose to write upon and in many of his individual pieces. These essays will also appeal to the interested non-specialist, reflecting the fact that Norman Garmonsway was, despite his erudition, the very antithesis of the remote and secluded scholar.

What Effective Schools Do

"This is a well crafted, timely book that comes at a time when so much is happening in higher education contexts across the world. Clearly, it is in response to these global (and selectively local) trends that Kariwo, Gounko and Nungu bring together an impressive lineup of both established and emerging scholars who

achieve a comprehensive and critically constructed perspective on tertiary education systems. Collectively, the chapters in this work shall expand the epistemic boundaries of the area and its affiliated disciplines, and the book as a whole will greatly benefit interested scholars, students, education policy makers and the public at large. " - Ali A. Abdi, Professor, University of Alberta

When the Sun Goes Down and Other Stories from Africa and Beyond

Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Sharing Higher Education's Promise Beyond the Few in Sub-Saharan Africa

The Whale Rider

First published in 1976, this play from one of Africa's foremost dramatists is in the classic cannon. It is an incisive examination of the problems of independence and freedom in post-colonial Africa states, where few believe they have a stake in the future. In the words of one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future". Francis Imbuga is a playwright and actor. He is the recipient of the Kenya National Academy of Sciences Distinguished Professional Award in Play Writing.

The Fabric of Peace in Africa

Africa has experienced dozens of conflicts over a variety of issues during the past two decades. Responding to these conflicts requires concerted action to manage the crises - the violence, the political discord, and the humanitarian consequences of prolonged fighting. It is also necessary to address the long-term social and economic impacts of conflict, to rebuild communities, societies and states that have been torn apart. To accomplish this requires the involvement of institutions and groups rarely considered in formal official African conflict management activities: schools, universities, religious institutions, media, commercial

enterprises, legal institutions, civil society groups, youth, women and migrants. These groups and organizations have an important role to play in building a sense of identity, fairness, shared norms and cohesion between state and society – all critical components of the fabric of peace and security in Africa. This volume brings together leading experts from Africa, Europe and North America to examine these critical social institutions and groups, and consider how they can either improve or impede peaceful conflict resolution. The overarching questions that are explored by the authors are: What constitutes social cohesion and resilience in the face of conflict? What are the threats to cohesion and resilience? And how can the positive elements be fostered and by whom? The second of two volumes on African conflict management capacity by the editors, *The Fabric of Peace in Africa: Looking beyond the State* opens new doors of understanding for students, scholars and practitioners focused on strengthening peace in Africa; the first volume, *Minding the Gap: African Conflict Management in a Time of change*, focused on the role of mediation and peacekeeping in managing violence and political crises.

A History of Modern Education in Kenya (1895-1991)

"The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his "Blue Book" how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains

true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield "Chip" East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit," due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Digital Kenya

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning.

Internationalizing Curriculum Studies

Education in Kenya Since Independence

The global financial and economic crisis beginning in 2008 has highlighted and reinforced the need for effective social protection mechanisms that prevent households from falling into poverty while also being sustainable, thus helping families to improve their earnings permanently. Meanwhile, social protection policies must be consistent with labour market mechanisms and with employment policy in order for either or both to be as beneficial as possible. This volume, using a broad definition of social protection, takes an in-depth look at selected programmes and their interaction with employment generation and growth in India, Kenya, Malawi, Mexico, Peru and Tajikistan. It focuses on poverty and aims to explore how social and economic policies can be better integrated to simultaneously advance social welfare, employment outcomes and inclusive growth.

Blossoms of the Savannah

This revision tool is a must for all Cambridge IGCSE Maths students. It can be used as an ongoing reference book or as an aid for final exam preparation. All areas of the CIE syllabus are covered and examples are used that are typical of past-paper

questions with each step fully explained, answers provided and grade descriptions available.

World Economic Situation and Prospects 2020

Facing Forward

The field of electronic publishing has grown exponentially in the last two decades, but we are still in the middle of this digital transformation. With technologies coming and going for all kinds of reasons, the distribution of economic, technological and discursive power continues to be negotiated. This book presents the proceedings of the 20th Conference on Electronic Publishing (Elpub), held in Göttingen, Germany, in June 2016. This year's conference explores issues of positioning and power in academic publishing, and it brings together world leading stakeholders such as academics, practitioners, policymakers, students and entrepreneurs from a wide variety of fields to exchange information and discuss the advent of innovations in the areas of electronic publishing, as well as reflect on the development in the field over the last 20 years. Topics covered in the papers include how to maintain the quality of electronic publications, modeling processes and the increasingly prevalent issue of open access, as well as new systems,

database repositories and datasets. This overview of the field will be of interest to all those who work in or make use of electronic publishing.

A Comparative Analysis of Higher Education Systems

Merchant of Venice (Folger Ed.)

This book seeks to understand how to internationalize curriculum without imperializing or imposing the old, colonial, and so-called first-world conceptualizations of education, teaching, and learning. The collection draws on the groundbreaking work of Dwayne Huebner in order to invite scholars into conversation with histories of curriculum studies and to posit them within it, opening up new spaces to work in and through curricular issues. This book will appeal to scholars, teachers, and students looking to reconceptualize international curriculum development and theory.

Positioning and Power in Academic Publishing: Players, Agents and Agendas

TRB's Transportation Research Record: Journal of the Transportation Research

Board, No. 2106 includes 16 papers that explore sketch models for air transport demand estimation, supporting aircraft manufacturers to systematically formulate and implement sustainable development strategies, mixed logit analysis of international airline choice, conceptual framework for collecting online airline pricing data, quantifying the relationship between airline load factors and flight cancellation trends, and a modeling framework for airline competition in the U.S. domestic network. This issue of the TRR also examines depeaking strategies for improving airport ground operations productivity at midsize hubs, a modeling framework for airport terminal planning and performance evaluation, route choice control of automated baggage handling systems, value of flight cancellation and cancellation decision modeling, resource allocation in flow-constrained areas, prioritizing aircraft operations at congested airports, design of ground delay programs, considering hydroplaning in runway geometric design, characterizing the distribution of safety occurrences in aviation, and analysis of the workload of training captains.

Progress of Recycling in the Built Environment

While everybody recognizes the development challenges facing Sub-Saharan Africa, few have put together coherent plans that offer real hope for any feasible and general improvement. Facing Forward combines an evidence-based plan that not only recognizes the deep problems but provides specific prescriptions for

dealing with the problems. In the simplest version, focus on the skills of the people and do it in a rational and achievable manner. †“ Eric Hanushek, Paul and Jean Hanna Senior Fellow, Hoover Institute, Stanford University This book offers a clear perspective on how to improve learning in basic education in Sub-Saharan Africa, based on extremely rigorous and exhaustive analysis of a large volume of data. The authors shine a light on the low levels of learning and on the contributory factors. They have not hesitated to raise difficult issues, such as the need to implement a consistent policy on the language of instruction, which is essential to ensuring the foundations of learning for all children. Using the framework of “From Science to Service Delivery,†? the book urges policy makers to look at the entire chain from policy design, informed by knowledge adapted to the local context, to implementation. Facing Forward: Schooling for Learning in Africa is a unique addition to the literature that is relevant for African policy makers and stakeholders. †“ Professor Hassana Alidou, Ambassador of the Republic of Niger to the United States and Canada As the continent gears itself up to provide universal basic education to all its children by 2030, it has to squarely address the challenge of how to improve learning. Facing Forward helps countries to benchmark themselves against each other and to identify concrete lines of action. It forces policy makers to think “where do I go from here?†? “what do I do differently?†? and to examine the hierarchy of interventions that can boost learning. It rightly urges Ministries of Education to build capacity through learning by doing and continuous adaptation of new knowledge to the local context. Facing Forward will unleash

frank conversations about the profound reforms that are required in education policy and service delivery to ensure learning for every child on the continent. †“ Dr. Fred Matiang’I, Cabinet Secretary for the Interior and Coordination of National Government, Government of Kenya (former Cabinet Secretary for Education) Facing Forward couldn’t have come at a more opportune time as countries in the region, including Mauritius, focus more on learning outcomes rather than simply on inputs and processes in education systems. The book underscores the important point that African countries need not exclusively model themselves on high-performing education systems in the world. Much can as well be learnt from other countries at the same level of development, or lower, by virtue of the challenges they have faced and successfully overcome. This presents opportunities for greater peer-sharing and networking with these countries. Indeed a number of key focus areas are highlighted in the book that demonstrate good practices worthy of being emulated. These cover domains as diverse as enabling factors leading to improved student progression, strengthened teacher capacity, increased budgetary allocation with a focus on quality, as well as improved technical capacity of implementing agencies in the region. †“ Hon. (Mrs.) Leela Devi Dookun-Luchoomun, Minister of Education and Human Resources, Tertiary Education and Scientific Research, Republic of Mauritius

Cambridge IGCSE Mathematics Study and Revision Guide

There have been edited books on the archaeology of nomadism in various regions, and there have been individual archaeological and anthropological monographs, but nothing with the kind of coverage provided in this volume. Its strength and importance lies in the fact that it brings together a worldwide collection of studies of the archaeology of mobility. This book provides a ready-made reference to this worldwide phenomenon and is unique in that it tries to redefine pastoralism within a larger context by the term mobility. It presents many new ideas and thoughtful approaches, especially in the Central Asian region.

Clinical Supervision

Presents the story of Antonio who risks his life to borrow money from his enemy, Shylock, and is saved by Portia, an heiress posing as a lawyer
